The professionals who completed site services, prepared, and reviewed this report include but are not limited to:

**Authored by:**  **Date:** 10/26/2020

Nicole McPhee, Environmental Technician  
Fulcrum Environmental Consulting, Inc.

**Authored by:**  **Date:** 10/26/2020

Ashley L. Yellick, GIT, Project Scientist  
Fulcrum Environmental Consulting, Inc.

**Reviewed by:**  **Date:** 10/26/2020

Jeremy M. Lynn, LHG, PMP, Hydrogeologist  
Fulcrum Environmental Consulting, Inc.

**Report Integrity:**

Fulcrum Environmental Consulting, Inc.'s scope of service for this project was limited to those services as established in the proposal, contract, verbal direction, and/or agreement. This report is subject to applicable federal, state, and local regulations governing project-specific conditions and was performed using recognized procedures and standards of the industry. Scientific data collected in situ may document conditions that may be specific to the time and day of service, and subject to change as a result of conditions beyond Fulcrum's control or knowledge. Fulcrum makes no warranties, expressed or implied as to the accuracy or completeness of other's work included herein. Fulcrum has performed these services in accordance with generally accepted environmental science standards of care at the time of the inspection. No warranty, expressed or implied, is made.

## 1.0 Introduction

Fulcrum Environmental Consulting, Inc. (Fulcrum) was retained by the Mazzola Law Office to complete a Phase I Environmental Site Assessment (ESA) of six parcels of real property located at 551 Wisconsin Avenue in Tieton, Washington (Subject Site).

Historical review indicates that the Subject Site has been used primarily for fruit storage since construction in the 1930s. The Subject Site currently consists of a 61,600 square foot warehouse, a mechanical building with an attached leased office space, two mobile homes and associated outbuildings, asphalt parking lot and storage areas, and RV parking. Recently, the warehouse has been leased out for storage of miscellaneous items including but not limited to vehicles, boats, antique and office furniture, vehicle parts and accessories, and empty ammunition boxes.

*Subject Site Location*

The purpose of a Phase I ESA is to assess existing and potential *Recognized Environmental Conditions* related to past uses of the Subject Site, and past and present activities of adjacent properties. Land use and development history are researched to identify *Recognized Environmental Conditions*. Methods used to assess the site include: review of historical records and aerial photographs; interviews with persons knowledgeable of the site; a detailed site survey; and review of local, state, and federal regulatory lists.

Russ Mazzola is the trustee for the estate of Gary Trepanier, the legal site owner. Fulcrum understands that the purpose of this Phase I ESA is to assist with environmental due diligence as to assist with pending auction and sale of the Subject Site. For purposes of this ESA the User is defined as Mazzola Law Office, Inc.

Fulcrum's Phase I ESA identified the following *Recognized Environmental Conditions* associated with the Subject Site:

- Historical Underground Storage Tank (UST Site ID 4741)

Fulcrum identified the following *de minimis Environmental Conditions* associated with the subject site:

- *De minimis* petroleum staining

Fulcrum's Phase I ESA identified the following *Business Environmental Risks* associated with the Subject Site:

- Suspect onsite well
- Elevator Hydraulic System
- Controlled Atmosphere Refrigeration System
- Floor Drain in Mechanical Building
- Miscellaneous Chemical and Petroleum Product Containers
- Asbestos Containing Materials

- Lead Containing Materials
- Lighting and Electrical Components

Further detail of Fulcrum's Findings and Conclusions are presented in Sections 9 through 11.

## 2.0 Scope of Services

---

Fulcrum has performed this Phase I ESA in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) International E1527-13 Standard Practice for Environmental Site Assessments, Phase 1 Environmental Site Assessment Process (Practice). Work described herein is intended for the exclusive use of the User. Third party reliance may not be appropriate and shall occur at the User's sole risk. Consistent with industry standard, information within this Phase I ESA is valid up to six months, after which information herein is considered dated. Limitations and exceptions to the method are reviewed in Sections 2.0, 10.0 and 12.0 of this report. This report was prepared by, or under the direction of an Environmental Professional, as defined by the Practice, Subsection X.2. Qualifications of the personnel who completed this Phase I ESA are presented in Appendix A.

In conformance with the Practice, Fulcrum has completed the following elements:

- Visual reconnaissance of the subject property with photographic documentation of selected points of interest.
- Review and interpretation of historical aerial photographs, topographic maps, and city directories, as reasonably accessible and available.
- Review of reasonably accessible data for information regarding historical land use that could have involved the manufacture, generation, use, storage, and/or disposal of hazardous substances.
- Review of county, state, and federal agency lists of known or potential hazardous waste sites and sites currently under investigation for potential environmental violations utilizing Environmental Data Resources (EDR), of Shelton, Connecticut as the primary resource for agency listing.
- Inquiries of appropriate municipal, county, and state office and regulatory agencies, owners, and/or neighbors for information regarding water and sewer services, environmental violations or incidents, and/or status of enforcement actions.

### 2.1 Practice-Defined Environmental Concerns

Environmental concerns are reported as a Recognized Environmental Condition (REC), Controlled Recognized Environmental Condition (CREC), Historical Recognized Environmental Condition (HREC), de minimis Environmental Condition, or Business Environmental Risk. The four Environmental Conditions are defined by the Practice as:

*A Recognized Environmental Condition* means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

*A Controlled Recognized Environmental Condition* is a recognized environmental condition resulting from past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a No Further Action letter or equivalent, or

meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use restrictions, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I ESA report, and as a recognized environmental condition in the conclusions section of the Phase I ESA report.

*A Historical Recognized Environmental Condition* is a past release of any hazardous substance or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the environmental professional considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.

*A de minimis Environmental Condition* is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

*Recognized Environmental Conditions* are identified as both significant and documented environmental conditions, such as a leaking underground storage tank or groundwater contamination, or potentially significant conditions, such as potential for groundwater impact from offsite sources.

Concerns that are either outside the scope of the Practice, or do not meet the practice definition of a REC, CREC, HREC, or *de minimis* Environmental Condition are identified as Business Environmental Risks. Business Environmental Risks are non-practice scope considerations that could have a material environmental or environmentally-driven impact on business associated with current or planned site use that the User may want to take into consideration at the time of a land transaction, lease, or development planning as they may impact project cost, site management, or scheduling.

## 2.2 User Responsibility

Consistent with the Practice, it was the User's responsibility to provide the following to Fulcrum:

- Request and provide to the Environmental Professional, a title search report(s) and chain of ownership report prepared for the site, including any information on environmental liens, rights-of-way, and easements; activity and use limitations; and a listing of all known former site owners and operators (since 1940 or first development, whichever is earlier).
- Provide all specialized knowledge, experience, or site history for the site. This type of information includes, but is not limited to, information of a historical nature, such as aerial photographs, site

photographs, or similar documents; contracts or legal documents regarding the Subject Site; and contact information for the current site owner(s) and operator(s).

- Complete a standard environmental questionnaire to include a review of site history, current site use, adjacent land use, and any known environmental conditions on the site.

See Appendix B for User Provided documents.

### 2.3 Significant Assumptions

No significant assumptions were made as a portion of this report.

### 2.4 Limitations and Exceptions

The conclusions documented in this report have been prepared for specific application to this project and have been developed in a manner consistent with the level of care and skill normally exercised by members of the environmental science profession. No warranty, expressed or implied, is made. This report is for the exclusive use of the User and their assigned representatives.

Potential remains for the presence of unknown, unidentified, or unforeseen environmental impacts associated with hidden conditions. If new information is developed in future site work that may include excavations, borings, or other studies, re-evaluation of the conclusions of this report and amendments may be required.

### 2.5 Special Terms and Conditions

Fulcrum's training and expertise facilitates investigation of materials and conditions typically outside the ASTM guidelines. The scope of work for this project requires additional services not typically included within the ASTM defined scope-of-service. Included in this Phase I ESA are regional radon level information and reported National Wetland Inventory locations near the Subject Site.

Considerations that are not addressed under Fulcrum's scope of work include, but are not limited to: evaluation of regulatory compliance; hazardous building materials such as asbestos containing materials, lead containing materials, and lighting and electrical components; wetlands determination; endangered species determination; indoor air quality; health and safety; clandestine drug manufacturing or impact; and cultural and historic resources.

### 2.6 User Reliance

Work described herein is intended for the exclusive use of the User. Third party reliance may not be appropriate and shall occur at the User's sole risk. Consistent with industry standard, information within this Phase I ESA is valid up to six months, after which information herein is considered dated. Limitations and exceptions to the method are reviewed in Sections 2.0, 10.0 and 12.0 of this report.

### 3.0 Detailed Site Description

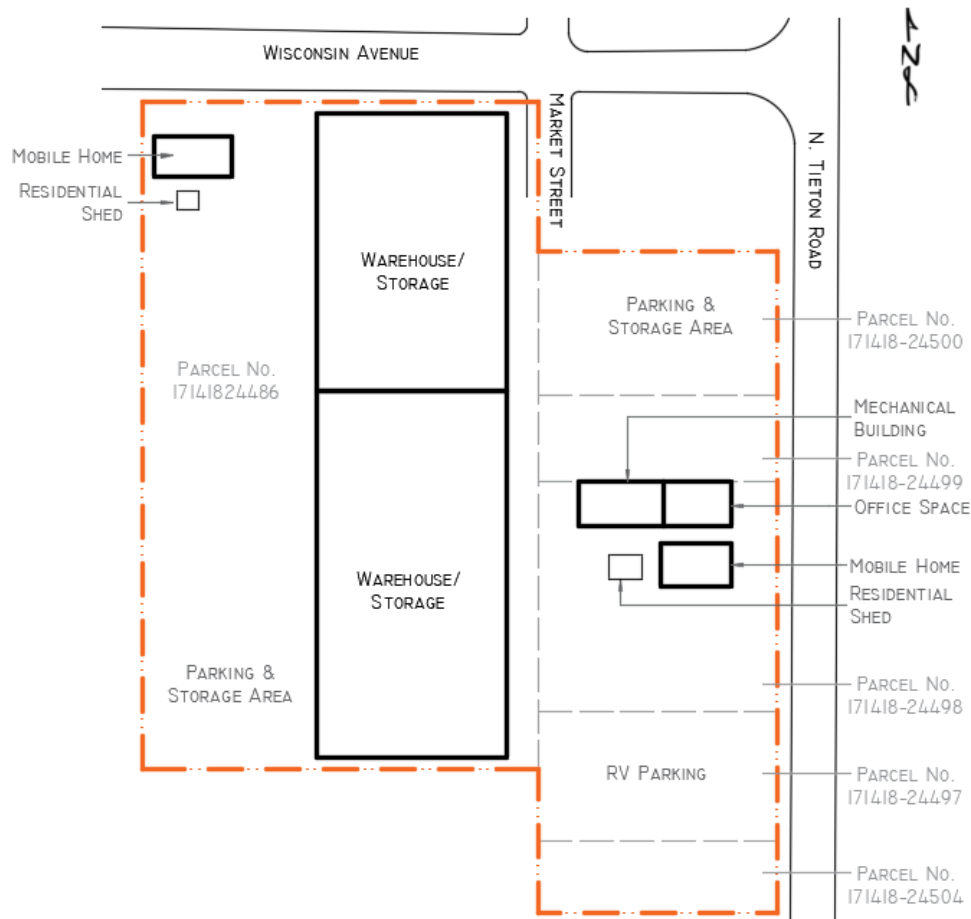

The Subject Site is located south of Wisconsin Avenue at 551 Wisconsin Avenue in Tieton, Washington.

The property is approximately 4.78 acres in size and is developed with a warehouse, a mechanical building with an attached leased office space, two mobile homes and associated outbuildings, asphalt parking lot and storage areas, and RV parking.

See Figure 2 for a Site Location and Adjoining Properties map and Figure 3 for a Site Detail map.

**Table 1: Tax Parcel Numbers, Parcel Address, and Acreage**

Parcel Number	Address	Area (Acres)	Property Designated Use
171418-24486	551 Wisconsin Ave	3.0	63 Service - Business
171418-24497	80 North Tieton	0.39	15 Mobile Home Park
171418-24498	90 and 100 North Tieton	0.58	63 Service - Business
171418-24499	500 Market Street	0.23	46 Automobile Parking
171418-24500		0.39	46 Automobile Parking
171418-24504		0.19	99 Other Undeveloped Land

*Subject Site Development*

### 3.1 Adjoining Properties

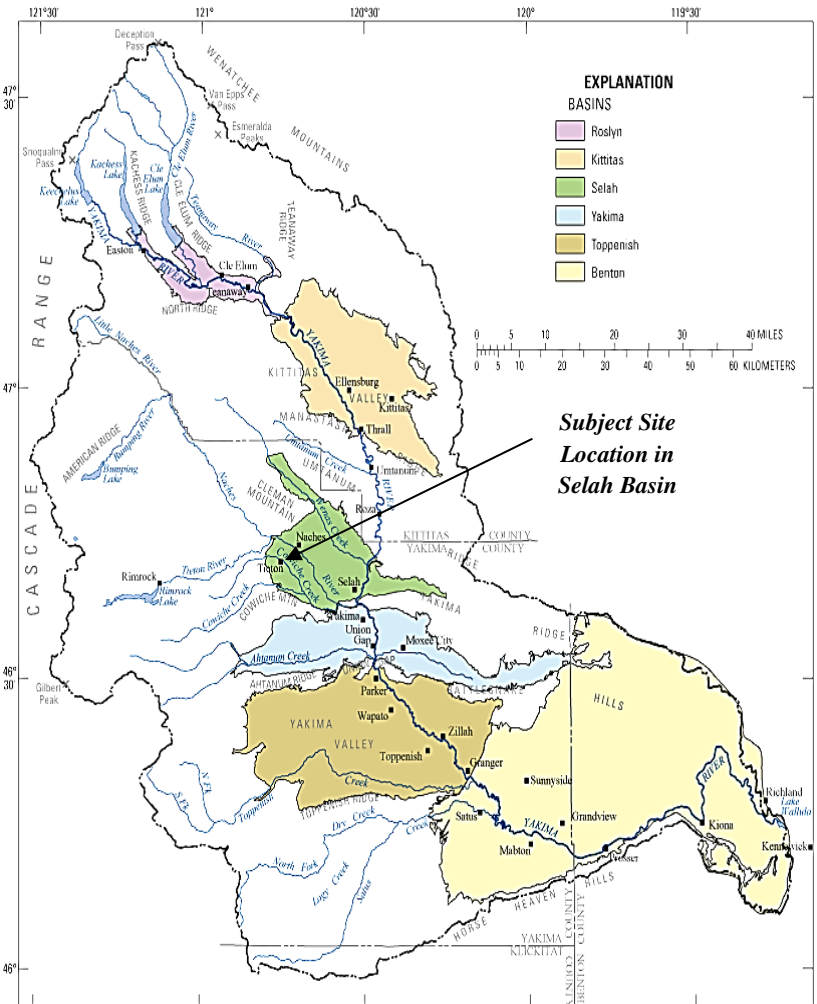

The adjoining properties generally consists of:

- The north adjoining property consists of 500 Market Street Condominiums and single family residential homes.
- The east adjoining property consists of North Tieton Road and undeveloped land.
- The south adjoining property consists of CPC International food storage warehouse.
- The west adjoining property consists of City of a Memorial Park owned by the City of Tieton.

### 3.2 Regional Geological Setting

From a regional setting, the Subject Site is located within the Yakima Folds Geomorphic Province (YFGP) on the northern portion of the Columbia River Plateau. The Columbia River Basalt Group is comprised of a number of geologic formations. The three youngest formations of the Columbia River Basalt Group are present in the Yakima region. These basalt formations, as well as the interbedded and overlying sedimentary lithologies of the Ellensburg Formation comprise the near surface stratigraphy of the Yakima Region. Quaternary alluvial sediments and landslide deposits are present in the valley environments. Anticlinal ridge and synclinal valley structures of the Yakima Fold Belt dominate the topography.

The six identified aquifer basins include the Roslyn, Kittitas, Selah, Yakima, Toppenish, and Benton Basins. The Subject Site is within the Kittitas Basin.

Six Structural Aquifer Basins - Courtesy of USGS

The Selah Basin is located in the central portion of the YRB and encompasses approximately 170-square miles. The basin is bordered by the Umtanum Anticline to the north and northeast, the Yakima Ridge to the south and southeast, and the Cowiche Mountains to the west. The basin is characterized by a series of folds striking in a northwest-southeast direction.

The basin fill deposit stratigraphy is divided into three hydrogeologic subunits. The upper unit is comprised of alluvial deposits dominating the Wenas Creek, Cowiche Creek, Naches River, and Upper Yakima River floodplains and range in thickness from 0 to 90-feet. The second unit consists of unconsolidated alluvial

fan, loess, terrace, and Thorp gravel deposits underlying the upper unit and range in thickness from 0 to 290-feet. The third and deepest unit consists primarily of consolidated Ellensburg Formation and similar continental sedimentary deposits and ranges in thickness from 0 to 1,920-feet. The Selah Basin ranges in total thickness from 0 to 1,920-feet with the greatest thickness present in the north-central portion of the basin.

### 3.3 Local Physical Setting

Topographic elevation is approximately 1,920 feet above mean sea level (msl) as identified by the EDR GeoCheck and provided by the United States Geological Survey (USGS) Historical Topographic Map dated 2013. The Subject Site topography is nearly flat. The local topographic gradient dips gradually to the east to southeast. See Appendix C for complete EDR GeoCheck documentation.

### 3.4 Soil Type

Two soil types are present at the Subject Site and are identified as *Logy cobbly silt loam* and *Yakima silt loam* by the U.S. Department of Agriculture's (USDA) Natural Resource Conservation Service (NRCS) Web Soil Survey (WSS). In addition, the EDR GeoCheck provided Soil Conservation Service (SSURGO) data and soil descriptions.

*Logy cobbly silt loam* is described as being well drained, and consists of silt to extremely gravelly loam and extremely gravelly coarse sand. *Yakima silt loam* is described as being well drained, and consists of silt loam to gravelly very fine sandy loam and extremely gravelly coarse sand.

### 3.5 Radon

Radon is a naturally occurring radioactive gas found in the Earth's rock and soil. Radon is formed by the natural breakdown of radium, which is a radioactive product of decaying uranium. Radon gas percolates up through porous soils and enters a home or building through gaps and cracks in the foundation or the insulation, and through pipes, sumps, drains, walls, or other openings. Radon gas is linked to serious health risks, such as lung cancer. Radon gas is considered a greater risk in buildings with basements or other soil penetrations that provide direct connection to occupant spaces.

According to the EDR report generated for the Subject Site, Yakima County is classified by the EPA as a radon Zone 2 with predicted average indoor radon screening levels ranging from two to four picocuries per liter of air (pCi/L). See Appendix D for the EDR Report. This range represents low levels of radon and is typical of levels found in local homes. Radon levels in homes or buildings are site-specific and can vary from structure to structure. Radon gas levels may be low in one building, but the next lot may have high indoor levels.

### 3.6 Wetlands

The EDR Radius Report identified two wetland areas in close proximity to the Subject Site. Fulcrum cross referenced the National Wetlands Inventory with the EDR Radius Report and identified four wetlands to be located approximately 0.09 to 0.15 miles from the Subject Site.

The wetland areas located approximately 0.15-miles from the subject site are considered Freshwater Forested/Shrub Wetland, classified as PFO1A, and two Freshwater Ponds classified as PUB/AB4H and PUBHh, and are based on color infrared imagery from 1981. The Forested wetland may have surface water present for exterior periods, especially early in the growing season, but absence by the end of the growing season in most years while the Freshwater Pond remains permanently flooded.

North Fork Cowiche Creek is located approximately 0.09-miles north and upgradient from the Subject Site and is recognized as a riverine system.

Fulcrum’s Floodplain Assessment was limited to review of the Federal Emergency Management Agency (FEMA) database of floodplains. The Subject Site was shown as not being located within a Flood Zone. The nearest Special Flood Hazard Area is shown along North Fork Cowiche Creek about 450 to 500 feet north of the Subject Site.

*Wetlands within Vicinity of Subject Site – National Wetlands Inventory Map*

### 3.7 Groundwater

One onsite well is known to exist, however, the EDR Radius Report did not identify any well logs for the Subject Site and groundwater depth has not been evaluated. According to well logs for the surrounding properties, groundwater depth is estimated to range from about 50 feet to greater than 120 feet below ground surface.

Regionally, groundwater flow gradient likely follows general topography gradient to the east and southeast towards the Naches River. Groundwater flow gradient can be used to assist in the potential impact to and from nearby properties. Potential impacts impose a risk from downgradient groundwater flow movement.

## 4.0 User Provided Information

Fulcrum requested the User to provide information about the Subject Site in order to assess what possible impacts previous site use may have had on current site conditions. See Appendix B for User provided information.

### 4.1 Reason for Performing this Assessment

Fulcrum understands that the purpose of this Phase I ESA is to assist with pending auction and sale of the Subject Site.

## 4.2 Title Records

Title documents were not received as a part of this Phase I ESA.

## 4.3 Specialized Knowledge or Experience

Other than information disclosed in Section 8.0, the User did not report specialized knowledge or experience regarding the Subject Site.

## 4.4 Commonly Known or Reasonably Ascertainable Knowledge

The User did not provide commonly known or reasonable ascertainable knowledge.

## 4.5 Property Valuation

Property valuation was not reviewed as a portion of the Phase I ESA. Any such review is the responsibility of the User.

# 5.0 Historical Review

---

Fulcrum's independently gathered research is presented in Sections 5.1 to 5.4, and is generally summarized in Section 9.0.

## 5.1 Regional History

The first farmers and orchardists came to the Tieton area in 1888. By 1909, a post office was established. Two years later, in 1911, the U.S. Department of Reclamation delivered water for irrigation. Soon after, in 1916, the Northern Pacific Railroad came and joined the town with the Naches railroad branch. It wasn't until 1942 that the City of Tieton was incorporated (City of Tieton, 2009).

Agricultural lands are irrigated with water originating from the Yakima-Tieton Irrigation District. The original open canal irrigation system was initially constructed in the 1910s and was used until 1986, at which point the open canal system was replaced with a new closed, pressurized system. Today, water is used to irrigate approximately 35,000 acres, 75 percent of which are cultivated as orchard. Other uses include hay, pastureland, and residential use (Yakima Tieton Irrigation District, 2016).

## 5.2 Historical Maps and Aerial Photographs

Fulcrum requested USGS Historical Topographic Maps, aerial photographs, and Sanborn Fire Insurance maps from EDR for the Subject Site and general area to assemble a narrative history of the Subject Site.

### 5.2.1 Historical Topographic Maps

Fulcrum requested USGS Historical Topographic Maps from EDR. Topographic maps were provided for the following years: 1899, 1901, 1971, 1981, and 2014.

The 1899 and 1901 topographic maps depict the Subject Site as undeveloped with a creek immediately north and northeast of the site running approximately northwest to southeast.

The 1971 and 1981 topographic maps depict the Subject Site with a large structure in the western portion of the subject site extending from the north property boundary to the south boundary of the Subject Site. Two small structures are developed in the northeast portion of the Subject Site. Railroad spur tracks of the Northern Pacific Railroad are depicted along the west side of the large onsite structure and extend offsite to the south. The City of Tieton has developed to the north, west, and south of the Subject Site.

The 2014 topographic map shows fewer structures on the map; observed changes appear to be associated with map formatting and presentation rather than changes in regional conditions. Railroad tracks are not shown on the 2014 map.

*1901 Historical Topographic Map*

*1981 Historical Topographic Map*

### 5.2.2 Historical Aerial Photographs

Aerial photographs of the subject property were acquired from EDR and the following years were available for review: 1939, 1949, 1956, 1964, 1970, 1981, 1996, 2006, 2009, 2013, and 2017.

The 1939 aerial photograph depicts the Subject Site developed with a large warehouse-like structure on the western portion of the property; and extends beyond the current site boundary. Railroad spur tracks are located onsite and west of the warehouse building. The eastern portion of the Subject Site appears to be developed with one structure at the location of the current mechanical building. Additional outbuildings and/or unidentifiable items are present within the eastern portion of the Subject Site.

The 1949 through 1964 aerial photographs depict changes to the roofing of the warehouses in the western portion of the Subject Site. No other significant changes are observed. The southern adjoining property depicts changes to the warehouse and the 1964 aerial photographs depicts multiple developments to the west adjacent property.

The 1970 aerial photograph shows the rectangular structure in the eastern portion of the Subject Site removed and three smaller structures developed in its place. Storage areas still observed in the eastern portion of the subject site. No other significant changes are observed.

The 1981 aerial photograph depicts changes in the roofing to the warehouses onsite. The eastern portion of the mechanical building has been demolished.

The 1996 aerial photograph shows the eastern portion of the Subject Site to be cleared, appearing to no longer be utilized as storage areas. The eastern portion of the mechanical building has been rebuilt. No other significant changes are observed.

The 2006 aerial photograph shows the warehouse in the southern portion of the subject site, extending beyond the Subject Site boundary, to have been removed. A single-family residence is observed in the northwest corner of the Subject Site. A structure, consistent with an onsite mobile home residence, is evident immediately south of the mechanical building. The warehouse located on the south adjacent property has also been removed.

The 2009 and 2013 aerial photograph depicts a new warehouse constructed along the southern boundary of the Subject Site where the previous warehouse was removed. The southeastern portion of the subject site appears to be developed as an RV park with multiple RVs/Mobile Homes present. The northeast portion of the subject site appears to be developed for automotive parking and a storage area.

The 2017 aerial photograph shows the area west of the warehouse to be utilized as a storage area. The previously warehouse constructed along the southern boundary of the Subject Site has been removed and two warehouses have been developed on the south adjacent property. No other significant changes are observed to have occurred to the Subject Site.

*1939 Aerial Photograph*

*1981 Aerial Photograph*

*2006 Aerial Photograph*

*2017 Aerial Photograph*

### 5.2.3 Sanborn Fire Insurance Maps

No Sanborn Fire Insurance Maps were reported by EDR to be available for the Subject Site.

## 5.3 County and Federal Agencies

### 5.3.1 Yakima County

Fulcrum submitted a public records request to Yakima County for “any building, planning, public, and fire department records, including septic tank and underground storage tank records” for the Subject Site. Yakima County reported that they do not have any responsive materials for the request and that records may be available from the City of Tieton.

Fulcrum reviewed online Yakima County Assessors records, including property cards maintained in the assessor’s office. The property cards and tax statements provide a general use and records of property transfers. Table 2 below provides a summary of information included on the tax cards. The Subject Site encompasses six parcels, which totals 4.78-acres. Various land uses are currently designated to each parcel.

**Table 2: Site Parcel Details**

Parcel Number	Property Designated Use	Development	Year Built
171418-24486	63 Service - Business	61,600 ft <sup>2</sup> masonry-wall storage warehouse	1939
171418-24497	15 Mobile Home Park	12 Mobile Home Utility Hookups	2005
171418-24498	63 Service - Business	3,424 ft <sup>2</sup> masonry-wall storage warehouse (W), 216 ft <sup>2</sup> wood frame storage shed (S)	1962(W) 2006 (S)
171418-24499	46 Automobile Parking	2,400 ft <sup>2</sup> asphalt pavement	1970
171418-24500	46 Automobile Parking	4,000 ft <sup>2</sup> asphalt pavement	-
171418-24504	99 Other Undeveloped Land	Paved asphalt	-

Past property owners included the following transactions by grantor and date:

- Yakima County Sheriff – Sheriff Deed, September 20, 1996
- Snokist Growers – Statutory Warranty Deed, June 29, 1998
- Schultz Harris Partnership – Statutory Warranty Deed, October 30, 2001
- Gary Trepanier – Quit Claim Deed, October 7, 2003

The record of a Sheriff Deed indicates that the property was likely sold at auction due to bankruptcy.

No records were identified that suggest an environmental concern.

### 5.3.2 City of Tieton

Fulcrum submitted a public records request to the City of Tieton for records associated with the Subject Site. A representative of City Hall reported no records of an underground storage tank located on the Subject Site. The City also reported a well was located onsite but has since been removed along with the water rights. The exact location of the former well is unknown.

The City Hall representative also reported an underground tunnel is present connecting the north portion of the subject site to the Market Street Condos located across Wisconsin Avenue, the tunnel was reported to have been closed off sometime in the past. Additionally, the City reported a railroad owned by Burlington – Northern traveled near the western portion of the subject site, railroad ties and other indications of a

railroad were reported to have been found by city workers in the soccer fields located on the west adjoining property.

The City Hall representative reported to have found no records or indications of environmental concern. No other records, including permits or other documents relating to the Subject Site were provide by the City of Tieton.

### 5.3.3 Rights-of-Way and Easements

Title documents including rights-of-way and easements were not received as a portion of this Phase I ESA. No references to rights-of-way or easements were noted during Fulcrum’s review of county or city recorded documents, or Ecology Toxics Cleanup Program Web Reporting.

### 5.3.4 Environmental Liens

No references to environmental liens or covenants were noted during Fulcrum’s review of county or city recorded documents, or Ecology Toxics Cleanup Program Web Reporting.

## 5.4 City and County Directories

Fulcrum requested Polk Directory documentation from EDR. Directory listing for the following years were provided: 1992, 1995, 2000, 2005, 2010, 2014, and 2017. City Directories can be reviewed either by address or business name to identify significant changes in ownership, business names, or site activities.

Yakima County identifies the following addresses for the subject site: 500 Wisconsin Avenue; 551 Wisconsin Avenue; 80 North Tieton Road; and 90 North Tieton Road. Additional addresses possibly associated with the site include: 100 North Tieton Road.

The addresses 80 and 90 North Tieton and 441 Wisconsin Avenue Road do not appear in the City Directory Report.

- 551 Wisconsin Avenue:  
2010, 2014: Jesus Magana
- 100 North Tieton Road:  
1992: Snokist Growers; Snokist Tieton Whse  
1995: Snokist Growers

No other City Directory listings were identified for the subject site.

## 6.0 Regulatory Review

---

As part of this Phase I ESA, a search was completed of available federal and state environmental record sources. Fulcrum’s records search was supplemented by EDR in accordance with the Practice and industry standard. Database abbreviations are defined in a glossary within the EDR report.

EDR prepared a Radius Map™ Report with GeoCheck® for the Subject Site. The report provided the Practice required search radius around the Subject Site. The typical EDR Report includes more than 70 searched databases. Fulcrum completed review of site data presented in the EDR, including adjacent

properties of concern. See Appendix C for complete Radius Map™ Report.

## 6.1 Subject Site

The Subject Site was listed on the Radius Map™ Report under the Facility Index System/ Facility Registry System (FINDS), Underground Storage Tank (UST), and Facility/Site Identification System Listing (ALLSITES) databases as Snokist Tieton, Market Street (Facility/Site ID: 7455454) and was listed with the address 100 North Tieton Road.

Fulcrum requested UST records from Ecology; however, records were reportedly not available for review. The FINDS database identified the subject site in the Underground Storage Tank Program (ID: 4741). According to Ecology's online UST database, a steel diesel tank of unknown site and age was formerly located on the property. Piping construction was indicated as above ground. No indication of location was reported.

In 2007, Fulcrum completed review of Ecology's file for the UST site 4741 during review of an offsite facility. Fulcrum's 2007 review of Ecology's file indicated that a 1,000 to 4,999 gallon capacity UST utilized for diesel fuel storage was located on Market Street. The address of the site on Market Street was not listed in the records. The tank was reported as being constructed of steel and installed in 1956 without cathodic or leak protection systems. The tank was reported to be empty during removal in 1984. No record of soil or groundwater contamination was present within the file.

Due to insufficient information regarding the location and tank status during removal, Fulcrum is unable to evaluate the potential for adverse environmental impact to the subject site associated with the UST.

The FINDS database also identified the subject site in the Emergency Planning and Community Right-to-Know (EPCRA) program as a Tier 2 Hazardous Waste site. Fulcrum requested hazardous waste records from Ecology. A response was not received within the timeframe of this report.

## 6.2 Adjoining Properties

Fulcrum reviewed the EDR Radius Map™ Report for potential concerns regarding adjoining properties. Two adjoining properties were identified in the EDR Report:

### 6.2.1 Mighty Tieton

The Mighty Tieton site was identified in the Underground Storage Tank (UST) and ALLSITES databases and is located on the northwest adjoining property at the address 608 Wisconsin Street. Fulcrum requested UST records from Ecology. A response was not received within the timeframe of this report.

An *Underground Storage Tank – Site Assessment Report* authored by PLSA Engineering and dated November 16, 2016 was available on Ecology's online UST database. One 300-gallon unleaded gasoline UST was closed in place and one 1,000-gallon diesel UST was removed from the site in October 2016. The USTs were located south of the west portion of the onsite warehouse.

The assessment did not identify a release of petroleum product to site soil from the USTs. However, one sample collected from the north end of the closed-in-place 300-gallon tank (located beneath the warehouse building) was reported with a concentration of Methylene Chloride at 0.027 mg/Kg and above the MTCA

Method A cleanup level of 0.020 mg/Kg. This was speculated to be a product of past site use and not related to the UST.

A groundwater sample was collected from a monitoring well located immediately south of the former diesel UST; gasoline was documented at a concentration of 350 micrograms per Liter ( $\mu\text{g/L}$ ) and below the MTCA Method A cleanup level. PLSA speculates that the groundwater sample collected from the well consisted of perched rainwater runoff and/or perched irrigation water and likely did not represent actual groundwater conditions.

No other releases or spills were reported for the site. PLSA's report speculates that the well was left in place from a previous investigation and that no documentation indicating the reason of installation was identified.

*Mighty Tieton UST Site Assessment*

Based on results of the investigation, the Mighty Tieton site does not represent a *Recognized Environmental Condition* for the Subject Site.

### 6.2.2 CPC International Apple Company – Market Street

The CPC International Apple Company site was identified in the ALLSITES, FINDS, and Enforcement & Compliance History Information (ECHO) databases and is located on the south adjoining property at the address 403 Market Street. Fulcrum requested records from Ecology. A 2008 Tier Two Emergency and Hazardous Chemical Inventory identified about 1,000 pounds of anhydrous ammonia located near the “old Simplot Building” near the southeast property corner. A 2015 Tier Two Emergency and Hazardous Chemical Inventory reported the quantity had increased to about 12,070 pounds. No releases or spills were reported for the site.

Since no releases or other potential environmental risks were identified or reported, adverse impact to the Subject Site is unlikely.

### 6.2.3 CPC International Apple Company – Naches Avenue

The CPC International Apple Company was identified in the ALLSITES, Reported Spills (SPILLS), and Water Quality Permit System Data (NPDES) databases and is located at 909 Naches Avenue, immediately south and adjacent to the Subject Site.

An Emergency Release Notification reported a release of a total of 6,700 to 8,200 pounds of ammonia and 3,000 gallons of propane on August 17, 2004 at the 909 Naches Avenue location at or near Engine Room #5, #2, #1. The source or cause of the releases was a fire. The fire destroyed two large CPC cold storage buildings. Winds at the time of the fire were reportedly from the northwest.

Due to the gaseous phase of the release, impact to the Subject Site is not likely to have occurred.

## 6.3 Surrounding Areas

One offsite location was identified on the EDR Radius™ Map Report within 1-mile of the Subject Site that required further review include:

### 6.3.1 Upper Valley Farm Service/ Julie Ann Bosma

The Upper Valley Farm Service Center/ Julie Ann Bosma site was identified in the Leaking UST (LUST), UST, Independent Cleanup Reports (ICR), ALLSITES, and Confirmed and Contaminated Sites - No Further Action (CSCSL NFA) databases, is located at the address 19851 Summitview Road approximately 1,000 feet south of the subject site, and is cross-gradient with respect to inferred groundwater flow direction.

In 1991, four USTs including one 4,000-gallon diesel tank, one 8,000-gallon unleaded and 8,000-gallon leaded gasoline tanks, and one 10,000-gallon gasoline tank were removed from the site. Impacted soils were observed and removed at time of tank removal and were bio-remediated onsite. No impacted soils were reported to remain within the excavation area. No groundwater was encountered during tank removal or remediation excavation. In 1994 sampling of the bio-remediated soils confirmed all analytes below cleanup levels with the exception of benzene which was reported at 0.11 mg/Kg, which was at that time below the standard cleanup level. Ecology determined that the 1991 cleanup level could be used and issued the site a No Further Action status in 2012 and that the site was no longer a threat to human health and the environment.

Based on regulatory status, distance from the subject site, a lack of impact to groundwater, and inferred groundwater flow direction, adverse impact to the subject site is unlikely.

## 6.4 Orphan Sites

The orphan summary is a list of sites whose map locations were ambiguous due to inadequate site address or poor site location on file. No sites were listed on the orphan summary list.

## 6.5 Vapor Intrusion

Fulcrum completed a review of information available for the Subject Site and of the surrounding areas for sites within the required search radius in order to evaluate potential vapor encroachment concerns (VECs) to the Subject Site as presented in ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

While Methylene Chloride was identified by PLSA during UST removal at the northern adjacent Mighty Tieton site in 2016, Methylene Chloride was detected in one soil sample beneath the building and slightly above MTCA Method A cleanup levels. As the release of Methylene Chloride appears to be a localized beneath the Mighty Tieton building, in Fulcrum's opinion, the results do not represent a likely VEC concern for the Subject Site.

No VECs were identified associated with the Subject Site.

## 6.6 Conditions or Features Identified Onsite

### 6.6.1 Well Search

Review of the EDR database report and Ecology well log records did not identify any groundwater wells on the Subject Site. A total of 203 wells were identified with a 1-mile radius from the Subject Site. The

Washington State Department of Ecology (Ecology) well log database identified a total of 39 well logs within the same Public Land Survey System (PLSS) section as the Subject Site. Record review of nearby wells suggest that the localized Static water levels (SWL) range from 40 to 121 feet below ground surface. Regionally, groundwater flow gradient likely follows general topography to the east to southeast towards the Naches River.

### 6.6.2 Other Features

The EDR Radius Report identified no other pertinent features.

## **7.0 Site Reconnaissance**

---

On September 28, 2020, Jeremy Lynn, a Professional Hydrogeologist and Environmental Professional with Fulcrum, completed a site walk of the Subject Site. Additional follow-up site walks were completed on September 29, October 21, and October 26, 2020 for select leased spaces within the main facility warehouse building that were not accessible on September 28, 2020.

Fulcrum accessed all portions of the main facility warehouse building and mechanical building; however, the leased office space within the eastern portion of the mechanical building was not accessed. Additionally, Fulcrum did not access interior spaces of residential units or residential storage sheds.

See Appendix E for site photographs. See Figure 3 for referenced site features.

### **7.1 Adjacent Site Developments**

As presented in Section 3.1, Fulcrum observed the following adjacent property uses:

- The north adjoining property consists of 500 Market Street Condominiums and single-family residential homes.
- The east adjoining property consists of North Tieton Road and undeveloped land.
- The south adjoining property consists of CPC International food storage warehouse.
- The west adjoining property consists of City of a Memorial Park owned by the City of Tieton.

During the site walk, no areas of suspect environmental impact to the Subject Site were observed on adjoining or nearby properties.

### **7.2 Onsite Development**

#### 7.2.1 Site Inspection

The Subject Site is currently developed with the following:

- Main warehouse building;
- Mechanical building located east of the warehouse with attached leased office area on the east side of the building;
- Two mobile homes located within northwest corner and southeastern portion of the Subject Site both with associated storage sheds;
- Recreational vehicle stored area within southeast portion of Subject Site.

## Main Warehouse Building

The main warehouse building is located on the western half of the Subject Site and is constructed with a basement area that extends the entirety of the building footprint. The main floor of the warehouse consists of wood flooring on the northern and southern portions while the flooring in center portion of the building consists of concrete.

The northern portion of the warehouse building is generally used for storage of vehicles and miscellaneous items. The northern portion of the main floor additionally contained a water treatment system and water heater units located along the eastern exterior wall. The system did not appear to be in operation.

*Water Treatment Tank on Main Floor*

The main and 2<sup>nd</sup> floor of the center portion, as well as the 2<sup>nd</sup> floor within southern portion of the warehouse building is leased for general storage of surplus goods for auction and/or sale. Items observed included but were not limited to antique and office furniture, vehicle parts and accessories, and empty ammunition boxes.

An elevator is present in the central portion of the building along the eastern exterior wall. The elevator is operated by a hydraulic system which is located in the basement. The hydraulic system includes a reservoir tank and pump. Staining on the concrete floor and lower portion of walls adjacent to the pump system was evident. The lift mechanism portion of the system to raise the elevator car was not able to be observed; however, based on visible portions of the elevator system, the elevator car appears to be driven by a gear and chain system.

*Elevator Hydraulic System*

The center portion of the building additionally includes a 3<sup>rd</sup> floor that was vacant at the time of the site walk.

The main floor within the southern portion of the building is divided between storage of miscellaneous items by the site owner and leased space for snowmobile and motorcycle parts storage.

*Representative Air Handling Unit and Equipment*

The basement of the warehouse building is primarily constructed of concrete walls, foundation, and ceiling, and is designed for fruit box storage. Air handling units and associated refrigeration equipment is present throughout.

No floor drains were observed within the warehouse building; however, sumps with lift pumps were observed adjacent to the air handler units in the basement.

No designated chemicals or chemical storage areas were observed within the warehouse building.

*Representative Sump in Basement*

### Mechanical Building

The mechanical building and the attached eastern office space was inspected by Fulcrum. The eastern office space appeared to be of newer construction with metal siding. At the time of the site walk, the interior of the office space was used for storage of miscellaneous items. Vinyl tile was observed in select areas. No indication of underground tanks was observed.

The western portion of the building was of brick construction and contained refrigeration pumps and systems. The pumps were powered by electricity. A stairwell extended to a tunnel beneath the building; refrigeration piping extended through the subsurface tunnel from the southwest corner of the mechanical building into the warehouse building basement to the west.

A certificate for a compressed air tank, issued by Washington Department of Labor and Industries dated 1962, was present on the wall in the southeast portion of the mechanical room.

Fulcrum observed a well located in the northeastern corner of the mechanical room. The well appeared to be out of service. A floor drain was present near and south of the well and appeared to be piped, extending north toward the building exterior wall. A sink was located adjacent to the floor drain and discharged to the floor drain.

*Well Located in Mechanical Building*

*Subsurface Refrigeration Piping Tunnel*

### Mobile Home Units and Recreational Vehicle Parking

The general areas of the two mobile home units were visually inspected. The mobile homes were identified with typical utility service connections and adjacent storage sheds totaling approximately 200 square feet. Interior spaces were not visually inspected as both units were occupied. No indications of underground storage tank or other potential environmental concerns were observed in association with the mobile home units.

The general area of recreational vehicle parking was visually inspected. Power and water hookups are present and several occupied recreational vehicles were present. The area was graveled and no indications of historical use prior to recreational vehicle parking were identified.

*Mobile Home Unit in Northwest Portion of Subject Site*

*Recreational Vehicle Parking Area*

### 7.2.2 Site Petroleum Hydrocarbon Usage, Storage, and Disposal

Petroleum usage and storage at the time of the site visit were limited to the elevator hydraulic system in the warehouse building and storage of miscellaneous items and equipment.

Multiple 5-gallon buckets of hydraulic oil were identified in the elevator hydraulic system room. Oils and fuels were identified in containers ranging from aerosol cans to 55-gallon drums. Quantities were consistent with general storage throughout and remnant equipment within the mechanical building.

No areas of significant petroleum release were visually observed. No evidence of significant petroleum release was noted on the exterior of the building.

*De minimis* areas of localized petroleum staining were identified within the interior of the warehouse and mechanical building, as well as, gravel and paved surfaces through the subject site.

### 7.2.3 Site Hazardous Materials Usage, Storage, and Disposal

Hazardous materials usage and storage at the time of the site walk were limited to storage of miscellaneous items and equipment. Oils and fuels were identified in containers ranging from aerosol cans to 55-gallon drums. Quantities were consistent with general storage throughout and remnant equipment within the mechanical building.

No areas of chemical release were visually observed. No evidence of release of materials was noted on the

exterior of the building.

No other chemicals or hazardous materials usage, storage, or disposal were observed on site.

#### 7.2.4 Site Drainage

No drywells, catch basins, or infiltration swales were identified onsite. Roof drainage discharge directly to site surface with select downspouts draining to subsurface piping systems.

The western and southeastern portions of the subject site are gravel surfaced and stormwater is likely to infiltration directly to site soils. General topography of the site slopes gently to the east. In the event of a large storm event, and water collecting on asphalt surfaces, would flow with site topography.

#### 7.2.5 Utilities

Utilities at the Subject Site include:

- Electrical service is provided by Pacific Power.
- Refuse and recycling services are provided by the City of Tieton.
- Potable water is provided by the City of Tieton.
- Sewer/septic services are provided through the City of Tieton.
- There are no natural gas services at the Subject Site.

#### 7.2.6 Pits, Ponds, and Lagoons

Fulcrum inspected the Subject Site for the presence of sumps, pits, surface impoundments, wells, cisterns, oil-water separators, weir boxes, and septic tanks.

Multiple sumps are present in the basement associated with air handler units. Sumps contain lift pumps to clear collected water. There were no other sumps, pits, surface impoundments, wells, cisterns, oil-water separators, weir boxes, or septic tanks identified during the site walk.

## 8.0 Questionnaires & Interviews

---

Fulcrum provided an Environmental Questionnaire to the User; the form was not returned by the User.

Fulcrum interviewed Mr. Marty Lawrence, the site manager. Mr. Lawrence has worked for the site owner for approximately three years and is the primary site manager for the Subject Site. Mr. Lawrence was present with Fulcrum during all portions of the site walk.

Mr. Lawrence informed Fulcrum that the site was constructed sometime in the 1930s as a fruit storage warehouse and was connected to the northern adjacent Snokist facility via two underground tunnels. One of the two tunnels was visible in northwestern corner of the warehouse basement but was sealed with CMU blocks.

Mr. Lawrence additionally indicated that the main warehouse facility has been used for storage by the owner, Gary Trepanier, with portions leased to others. Mr. Lawrence indicated that the two mobile home units are occupied by renters, and long term residents occupy the recreational vehicle parking area. The eastern portion of the mechanical building is reported to be leased for office space.

Mr. Lawrence stated that no known underground storage tanks or natural gas fuel systems are known to be present at the site.

## 9.0 Findings and Opinions

---

Historical review indicates that the subject site was originally developed in the 1930s. A warehouse building was constructed in 1939, according to Yakima County records, and was reportedly originally used for fruit storage. A mechanical building was constructed east of the warehouse in or about 1962; however, aerial photographs show the mechanical building present in 1939. Site operations appear to have remained consistent until the facility was shutdown likely in the 1990s. The facility has since been utilized for miscellaneous storage, leased office space, two mobile homes, and recreational vehicle parking.

Changes to site operations are evident in aerial photographs with demolition of the eastern portion of the mechanical building between 1981 and 1996; and demolition of the southern offsite portion of the warehouse building between 1996 and 2006. The two mobile home units were placed at the site between 1996 and 2006.

Additionally, a railroad spur line was previously located on the western portion of the subject site west of the warehouse building as evident in historical aerial photographs and topographic maps. The line was first identified in 1939 aerial photograph and removed by 1996.

The site has historically utilized a controlled atmosphere refrigeration system with pumps and control systems present in the mechanical building, piping extending subsurface to the warehouse building, and air handling units throughout the warehouse. The system likely utilized ammonia for coolant. No large ammonia reservoir tanks were identified, however, are likely to have been removed once operations ceased.

### 9.1 Recognized Environmental Conditions

The scope of work for this Phase I investigation was not designed to conclusively determine whether conditions exist for environmental degradation. Rather this investigation was designed to identify significant and potentially significant Recognized Environmental Conditions. Fulcrum has performed this Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 for the Subject Site. Any exceptions to, or deletions from, this practice is described in Sections 2.0, 10.0 and 12.0 of this report.

Fulcrum's Phase I ESA identified the following *Recognized Environmental Conditions* associated with the Subject Site:

- Historical Underground Storage Tank (UST Site ID 4741)

Regulatory records indicate a UST was previously located on the subject site; Ecology reported that no response records were available for review. However, in 2007, Fulcrum completed review of the site file during review of an offsite facility. Limited detail was available, but Ecology's file indicated that a 1,000 to 4,999 gallon capacity UST utilized for diesel fuel storage was located on Market Street. The address of the site on Market Street was not listed in the records. The tank was reported as being constructed of steel and was installed in 1956 without cathodic or leak protection systems. The tank was reportedly empty during removal in 1984. No record of soil or groundwater contamination was present within the file.

Due to insufficient information regarding the location and tank status during removal, Fulcrum is unable to

evaluate the potential for adverse environmental impact to the subject site associated with the UST. Based on Fulcrum's review of the Subject Site, a UST may have been associated with the mechanical building with removal during the demolition of the eastern portion between 1981 and 1996.

## 9.2 *De Minimis* Conditions

A *de minimis Environmental Condition* is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Fulcrum identified the following *de minimis Environmental Conditions* associated with the subject site:

- *De minimis* petroleum staining

Localized suspect petroleum staining was identified within the gravel surfaced storage area west of the warehouse building and within the recreational vehicle parking area. Additionally, localized petroleum staining was observed on interior concrete surfaces of the mechanical room; and concrete and wood surfaced areas within the warehouse building.

## 9.3 Business Environmental Conditions

A *Business Environmental Risk* can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate and is not necessarily limited to those environmental issues required to be investigated in this practice.

Fulcrum's Phase I ESA identified the following *Business Environmental Risks* associated with the Subject Site:

- Suspect Onsite Well
- Elevator Hydraulic System
- Controlled Atmosphere Refrigeration System
- Floor Drain in Mechanical Building
- Miscellaneous Chemical and Petroleum Product Containers
- Asbestos Containing Materials
- Lead Containing Materials
- Lighting and Electrical Components

### 9.3.1 Suspect Onsite Well

A suspect well is located within the western portion of the mechanical building. Well logs were not identified for the Subject Site. Washington Administrative Code (WAC) 173-160, *Minimum Standards for Construction and Maintenance of Wells*, requires decommissioning of any wells no longer in use. Decommissioning of wells must be completed by a Washington State Licensed Well Driller.

### 9.3.2 Elevator Hydraulic System

An elevator system is present within the main warehouse building, extending from the basement to the 3<sup>rd</sup> floor. The complete elevator system was not able to be fully evaluated during the site inspection.

The system appears to be powered by a hydraulic system located within the basement. The hydraulic system includes an aboveground reservoir tank. Stained concrete floor and walls were observed in the elevator system mechanical room located within the basement, adjacent to the elevator shaft.

The elevator car lift mechanism was not observed and areas beneath the elevator car were not visible. However, based on visible portions of the system, the elevator car appeared to be driven by a system of gears and chains, rather than a subsurface hydraulic ram.

Due to the age of the hydraulic system, the stained concrete has the potential to contain polychlorinated biphenyls (PCBs). In Fulcrum's opinion, the localized staining on concrete with potential presence of PCBs does not meet the definition of a *Recognized Environmental Condition*.

### 9.3.3 Controlled Atmosphere Refrigeration System

Controlled atmosphere systems are primarily present with the mechanical building and include pumps, reservoir tank, and chiller units. Piping extends from the mechanical building through a subsurface tunnel and into the basement of the warehouse building. Air handling units are present in the basement and select locations within each floor of the warehouse.

Additionally, water heater and/or treatment tank system equipment is present within the main floor of the warehouse building. No sources of petroleum fuel systems or chemical storage was observed.

### 9.3.4 Floor Drain in Mechanical Building

At least one floor drain is present within the mechanical building. The drain is located adjacent to the suspect well. The drain appears to be piped, flowing north towards the exterior of the building. The discharge location was not identified. However, while the drain is located within the mechanical building, the area appears to have been utilized for water supply systems and pressure tanks, and not primarily for maintenance and repair operations. No floor drains were observed within the main warehouse building.

In Fulcrum's opinion, the presence of the drain adjacent to the suspect well does not meet the definition of a *Recognized Environmental Condition*.

### 9.3.5 Miscellaneous Chemical and Petroleum Product Containers

Miscellaneous chemical and petroleum product containers were identified throughout the warehouse and mechanical buildings. Containers ranged in volume from aerosol cans to 55-gallon barrels. Products included, but were not limited to, motor oil, hydraulic oil, lacquer thinner, and paints.

Quantities were consistent with site operations including general leased storage. No significant spills or leaks were identified.

### 9.3.6 Asbestos Containing Materials

Asbestos containing materials were used extensively from the early 1900s to the late 1970s, when the manufacture of most asbestos products was banned in the U.S. The ban did not include all products nor the use and application of asbestos products. Some of the onsite structures were constructed in the 1970s. Therefore, suspect ACM may be present in structures built after the initial ACM ban. Exposure to asbestos is a potential health concern when ACM is damaged during normal use or is ground, sanded, or abraded during renovation or demolition. ACM cannot be determined without sampling and analysis. ACM in good condition can be managed in place. Fulcrum considers this a *Business Environmental Risk*. Suspect materials identified included, but were not limited to:

- Roofing systems
- Fire doors
- Window sealants
- Vinyl tile

### 9.3.7 Lead Containing Materials

Painted surfaces on nearly every building may contain lead containing paint. Lead containing paint was used extensively for residential paint until the late 1970s and is still available for commercial, industrial, and specialty use. Exposure to lead in paint is a potential health concern, when paint is damaged during normal use or is ground, sanded, or abraded during renovations and/or demolition. Lead containing paint in good condition does not constitute a health hazard nor is it considered a health risk. Fulcrum considers this a *Business Environmental Risk*.

### 9.3.8 Lighting and Electrical Components

Lighting and electrical equipment is a general term that refers to potential waste streams associated with all electrical equipment. Waste can include transformers and ballasts with polychlorinated biphenyls (PCB), non-PCB ballasts, mercury vapor tubes and bulbs (collectively referred to as lamps), mercury switches, and other waste streams. Electrical transformers have utilized mineral oil mixed with varying quantities of PCB as dielectric fluid since the early 1950s. PCBs were also commonly used in light ballasts prior to 1978. Light ballasts have also been shown to contain other hazardous materials besides PCB.

Access inside the warehouse, office spaces, and fruit processing areas were not available during the site walk. Lighting and electrical concerns expressed above have the potential to be present on the interior and exterior due to age of construction for the older additions of the property. Fulcrum considers this a *Business Environmental Risk*.

## **10.0 Data Gaps**

---

Fulcrum's Phase I ESA research attempted to identify and review reasonable ascertainable information regarding environmental conditions at the Subject Site. Sources of information that could not be reviewed, either because information could not be accessed or reviewed within the time limitations of this report, or because information for the Subject Site did not exist include the following:

Aerial Photographs: Aerial photographs are available on a limited basis and do not provided for regular review intervals. Photographs were provided by EDR for the subject site, photographs were not available prior to 1937.

Building Permits: Due to the industrial use of the Subject Site, building typically include detail associated with mechanical systems. In Fulcrum's opinion, the absence of building permits for the site is a data gap.

Sanborn Fire Insurance Maps: This property is an unmapped property in the Sanborn Library. No fire insurance maps were found for the subject site.

WA Dept. of Ecology: Fulcrum requested records associated with underground storage tank and hazardous waste records associated with the subject site, however, records were not available for review.

Title Documents: Title documents for the Subject Site were not provided. However, based on historical review, the site was originally developed as a fruit storage facility, consistent with current development.

Building Access: The eastern portion of the mechanical building is utilized for leased office space. Fulcrum was not able to access this portion of the building during the site walk.

In Fulcrum's opinion, the data gaps, including inability to review missing Washington State Department of Ecology, building permits, Sanborn Fire Insurance Maps records associated with systems is a significant concern and impeded its ability to assess environmental conditions on the subject site.

## 11.0 Conclusions

---

Fulcrum has performed this Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 for the defined Subject Site area. Any exceptions to or deletions from this practice are described in Section 2.0, 10.0 and 12.0 of this report. Fulcrum completed research into past and present activities, and current conditions of the property.

Fulcrum's Phase I ESA identified the following *Recognized Environmental Conditions* associated with the Subject Site:

- Historical Underground Storage Tank

Due to insufficient information regarding the location and tank status during removal, Fulcrum is unable to evaluate the potential for adverse environmental impact to the subject site associated with the UST. Based on Fulcrum's review of the Subject Site, a UST may have been associated with the mechanical building with removal during the demolition of the eastern portion between 1981 and 1996.

Fulcrum identified the following *de minimis Environmental Conditions* associated with the subject site:

- *De minimis* petroleum staining

Fulcrum's Phase I ESA identified the following *Business Environmental Risks* associated with the Subject Site:

- Suspect onsite well
- Elevator Hydraulic System
- Controlled Atmosphere Refrigeration System
- Floor Drain in Mechanical Building
- Miscellaneous Chemical and Petroleum Product Containers

- Asbestos Containing Materials
- Lead Containing Materials
- Lighting and Electrical Components

## 12.0 Limitations

---

Fulcrum Environmental Consulting, Inc. has performed professional services in accordance with generally accepted professional consulting principles and ASTM Practice E1527-13. No other warranty, expressed or implied, is made. The conclusions are based upon field observations and information research. Industry standard for Phase I ESA recommends that the information reported in Phase I ESA is accurate for six months from report date, after which the information presented is considered dated. Work described herein is intended for the exclusive use of the User. Any reliance on this report by a third party, is at that party's sole risk.

Services did not include evaluation of conditions and factors typically considered outside the scope of ASTM-based environmental assessments, except for those specifically identified in the proposal. Out-of-Scope considerations include, but are not limited to, evaluation of regulatory compliance; hazardous building materials such as asbestos containing materials, lead containing materials, and lighting and electrical components; wetlands determination; endangered species determination; indoor air quality; health and safety; clandestine drug manufacturing or impact; and cultural and historic resources.

Opinions contained in this report apply to conditions existing at the time services were performed. Fulcrum Environmental Consulting, Inc. is not responsible for the impact of changes in environmental standards, practices, or regulations subsequent to the performance of services. Fulcrum Environmental Consulting, Inc. does not warrant the accuracy of information supplied by others or the use of segregated portions of this report. Fulcrum Environmental Consulting, Inc. assumes no liability for conditions that were not included in our scope of work, or conditions not generally recognized as predictable when services were performed.

### Qualifications of Environmental Professionals

## Personnel Qualifications

### Environmental Technician: Nicole McPhee

Ms. McPhee grew up in Florida, ventured west in search of mountains, and graduated from Central Washington University with a Bachelor of Geology. While at CWU, Nicole attended field camp at the White Mountain Research Center in Bishop, California where she studied the nature and occurrence of formations to create cross sections and prepared mapping in ArcGIS. Prior to graduation, she also attended Geologic Field Methods field campus, a five-week course in Mitchell, Oregon and the Lost River Valley, Idaho. Prior to joining Fulcrum, Ms. McPhee was a Wild Horse Wind Farm Renewable Energy Center Intern where she educated the public on the operation of the first solar farm in Kittitas County, Washington.

Ms. McPhee's focus includes environmental investigation and remediation projects, including complex, high paced projects to remediate petroleum contamination associated with former smudge pot storage. She received her Underground Storage Tank Decommissioning and Washington State Site Assessors certificate. She has also assisted during a wide range of Fulcrum's projects including indoor air quality investigations and hazardous building materials surveys.

### Project Scientist: Ashley Yellick, GIT

Ms. Yellick graduated from North Dakota State University in 2013 with a Bachelor of Science in Geology. Ms. Yellick has completed over 100 Phase I ESAs and has experience completing soil vapor intrusion investigations, subsurface and groundwater investigations, soil classification, and remedial excavation oversight in Washington and Minnesota. Ms. Yellick is registered in the State of Washington as a Geologist In Training.

Ms. Yellick's education, training, and experience demonstrate that she is an Environmental Professional as defined by the Environmental Protection Agency's All Appropriate Inquiry, 40 CFR 312.

### Professional Geologist: Jeremy Lynn

Mr. Lynn graduated from the University of Idaho in 2006 with a Bachelor of Science in Geologic Sciences with an emphasis in hydrogeology. Mr. Lynn has experience managing subsurface and hydrogeologic investigations; stormwater control management design and implementation; wetlands assessments and delineation; and remedial design and oversight throughout the Pacific Northwest. Mr. Lynn additionally has experience in managing and designing groundwater protection systems under federal Resource Conservation and Recovery Act (RCRA); Atomic Energy Act (AEA); and Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) programs. Mr. Lynn is a Washington State Licensed Hydrogeologist and Project Management Institute certified Project Management Professional.

Mr. Lynn's education, training, and certifications demonstrate that he is an Environmental Professional as defined by the Environmental Protection Agency's All Appropriate Inquiry, 40 CFR 312.

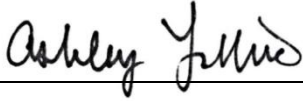

## Declarative Statements

We, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in ASTM E1527-13 and §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set in ASTM E1527-13 and 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***State and tribal leaking storage tank lists***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported

## EXECUTIVE SUMMARY

leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/13/2020 has revealed that there is 1 CSCSL NFA site within approximately 0.5 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

## EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

**FINDS:** The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2020 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto

## EXECUTIVE SUMMARY

sites within approximately 0.125 miles of the target property.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 09/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/12/2020
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 09/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/12/2020
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2020

## ***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019  
Date Data Arrived at EDR: 04/05/2019  
Date Made Active in Reports: 05/14/2019  
Number of Days to Update: 39

Telephone: 703-603-8704  
Last EDR Contact: 07/02/2020  
Next Scheduled EDR Contact: 10/12/2020  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/29/2020  
Date Data Arrived at EDR: 08/03/2020  
Date Made Active in Reports: 08/25/2020

Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: 800-424-9346
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 09/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/26/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/23/2020	Source: EPA
Date Data Arrived at EDR: 03/25/2020	Telephone: 800-424-9346
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2020	Telephone: (206) 553-1200
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020

	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2020	Telephone: (206) 553-1200
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/15/2020	Source: Department of the Navy
Date Data Arrived at EDR: 05/19/2020	Telephone: 843-820-7326
Date Made Active in Reports: 06/18/2020	Last EDR Contact: 08/04/2020
Number of Days to Update: 30	Next Scheduled EDR Contact: 11/23/2020
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/20/2020	Telephone: 703-603-0695
Date Made Active in Reports: 05/15/2020	Last EDR Contact: 08/24/2020
Number of Days to Update: 85	Next Scheduled EDR Contact: 12/07/2020
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/20/2020	Telephone: 703-603-0695

Last EDR Contact: 09/01/2020  
Next Scheduled EDR Contact: 12/14/2020  
Data Release Frequency: Semi-Annually

## **State- and tribal - equivalent CERCLIS**

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/13/2020  
Date Data Arrived at EDR: 04/15/2020  
Date Made Active in Reports: 07/01/2020  
Number of Days to Update: 77

Source: Department of Ecology

Next Scheduled EDR Contact: 10/26/2020  
Data Release Frequency: Quarterly

## **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 06/05/2020  
Date Data Arrived at EDR: 06/11/2020  
Date Made Active in Reports: 07/01/2020  
Number of Days to Update: 20

Source: Department of Ecology  
Telephone: 360-407-6132  
Last EDR Contact: 09/04/2020  
Next Scheduled EDR Contact: 12/14/2020  
Data Release Frequency: Annually

## **State and tribal leaking storage tank lists**

LUST: Leaking Underground Storage Tanks Site List

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 05/12/2020  
Date Data Arrived at EDR: 05/13/2020

## ***State and tribal Brownfields sites***

### **BROWNFIELDS: Brownfields Sites Listing**

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 04/13/2020

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## CDL: Clandestine Drug Lab Contaminated Site List

Illegal methamphetamine labs use hazardous chemicals that create public health hazards. Chemicals and residues can cause burns, respiratory and neurological damage, and death. Biological hazards associated with intravenous needles, feces, and blood also pose health risks.

Date of Government Version: 12/31/2019	Source: Department of Health
Date Data Arrived at EDR: 02/13/2020	Telephone: 360-236-3380
Date Made Active in Reports: 04/22/2020	Last EDR Contact: 07/28/2020
Number of Days to Update: 69	Next Scheduled EDR Contact: 11/16/2020
	Data Release Frequency: Varies

## HIST CDL: List of Sites Contaminated by Clandestine Drug Labs

This listing of contaminated sites by Clandestine Drug Labs includes non-remediated properties. The current CDL listing does not. This listing is no longer updated by the state agency.

Date of Government Version: 02/08/2007	Source: Department of Health
Date Data Arrived at EDR: 06/26/2007	Telephone: 360-236-3381
Date Made Active in Reports: 07/19/2007	Last EDR Contact: 06/02/2008
Number of Days to Update: 23	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

This report contains information about sites that are undergoing cleanup and sites that are awaiting further investigation and/or cleanup. Sites on the Hazardous Sites List (see above) are included in this data set.

Date of Government Version: 04/13/2020	Source: Department of Ecology
Date Data Arrived at EDR: 04/15/2020	Telephone: 360-407-7170
Date Made Active in Reports: 07/01/2020	Last EDR Contact: 07/15/2020
Number of Days to Update: 77	Next Scheduled EDR Contact: 10/26/2020
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/19/2020	Telephone: 202-307-1000
Date Made Active in Reports: 06/09/2020	Last EDR Contact: 08/19/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 12/07/2020
	Data Release Frequency: Quarterly

## AQUEOUS FOAM: Firefighting Foam Incidents

Aqueous film-forming foam-laced water running off from fuel spills, firefighting events and routine training sessions has put those chemicals in ground water, surface water, sediments, biota, and other natural resources of the state.

Date of Government Version: 03/28/2020	Source: Department of Ecology
Date Data Arrived at EDR: 04/02/2020	Telephone: 360-407-6116
Date Made Active in Reports: 06/24/2020	Last EDR Contact: 07/01/2020
Number of Days to Update: 83	Next Scheduled EDR Contact: 10/19/2020
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS: PFAS Contamination Site Location Listing

PFOS and PFOA stand for perfluorooctane sulfonate and perfluorooctanoic acid, respectively. Both are fluorinated organic chemicals, part of a larger family of compounds referred to as perfluoroalkyl substances (PFASs).

Date of Government Version: 04/21/2020	Source: Department of Ecology
Date Data Arrived at EDR: 04/23/2020	Telephone: 360-407-6116
Date Made Active in Reports: 07/10/2020	Last EDR Contact: 07/01/2020
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/19/2020
	Data Release Frequency: Varies

## Local Land Records

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 07/29/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2020	Telephone: 202-564-6023
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 09/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/12/2020
	Data Release Frequency: Semi-Annually

## Records of Emergency Release Reports

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 02/27/2020	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 03/24/2020	Telephone: 202-366-4555
Date Made Active in Reports: 06/18/2020	Last EDR Contact: 06/23/2020
Number of Days to Update: 86	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

### SPILLS: Reported Spills

Spills reported to the Spill Prevention, Preparedness and Response Division.

Date of Government Version: 06/08/2020	Source: Department of Ecology
Date Data Arrived at EDR: 06/17/2020	Telephone: 360-407-6950
Date Made Active in Reports: 09/01/2020	Last EDR Contact: 08/26/2020
Number of Days to Update: 76	Next Scheduled EDR Contact: 12/14/2020
	Data Release Frequency: Semi-Annually

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date Made Active in Reports: 03/06/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 07/31/2020
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/16/2020
	Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Next Scheduled EDR Contact: 12/14/2020  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 06/24/2020
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/12/2020
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## COUNTY RECORDS

### KING COUNTY:

#### LF KING: Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985	Source: Seattle-King County Department of Public Health
Date Data Arrived at EDR: 11/07/1994	Telephone: 206-296-4785
Date Made Active in Reports: N/A	Last EDR Contact: 10/21/1994
Number of Days to Update: 0	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SEATTLE COUNTY:

#### LF SEATTLE CITY: Abandoned Landfill Study in the City of Seattle

The Seattle Abandoned Landfill Survey was conducted in June and July of 1984 by the Health Department's Environmental Health Division at the request of the Mayor's Office. The primary objective of the survey was to determine if any public health problems existed at the predetermined 12 sites.

Date of Government Version: 07/30/1984	Source: Seattle - King County Department of Public Health
Date Data Arrived at EDR: 11/07/1994	Telephone: 206-296-4785

Number of Days to Update: 0	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SEATTLE/KING COUNTY:

#### LF SEATTLE/KING: Seattle - King County Abandoned Landfill Toxicity / Hazard Assessment Project

This report presents the Seattle-King County Health Department's follow-up investigation of two city owned and four county owned abandoned landfills which was conducted from February to December 1986.

Date of Government Version: 12/31/1986	Source: Department of Public Health
Date Data Arrived at EDR: 08/18/1995	Telephone: 206-296-4785
Date Made Active in Reports: 09/20/1995	Last EDR Contact: 08/14/1995
Number of Days to Update: 33	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SNOHOMISH COUNTY:

#### LF SNOHOMISH: Solid Waste Sites of Record at Snohomish Health District

Solid waste disposal and/or utilization sites in Snohomish County.

Date of Government Version: 09/23/2019	Source: Snohomish Health District
Date Data Arrived at EDR: 09/25/2019	Telephone: 206-339-5250
Date Made Active in Reports: 10/24/2019	Last EDR Contact: 09/14/2020
Number of Days to Update: 29	Next Scheduled EDR Contact: 12/28/2020
	Data Release Frequency: No Update Planned

### TACOMA/PIERCE COUNTY:

#### LF TACOMA/PIERCE: Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/12/2020  
Date Data Arrived at EDR: 05/12/2020  
Date Made Active in Reports: 07/27/2020

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

551 WISCONSIN AVENUE  
551 WISCONSIN AVENUE  
TIETON, WA 98947

### TARGET PROPERTY COORDINATES

Latitude (North):	46.703793 - 46° 42' 13.65"
Longitude (West):	120.753536 - 120° 45' 12.73"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	671733.0
UTM Y (Meters):	5174481.0
Elevation:	1920 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	6004805 TIETON, WA
Version Date:	2014
East Map:	5992523 NACHES, WA
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
53077C0675D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
53077C0678D	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
TIETON	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Logy cobbly

Soil Surface Texture: cobbly silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	cobbly silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 705 Min: 141	Max: 7.8 Min: 6.6
2	11 inches	33 inches	extremely gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 705 Min: 141	Max: 7.8 Min: 6.6
3	33 inches	59 inches	extremely gravelly coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 705 Min: 141	Max: 7.8 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: Yakima

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 705 Min: 141	Max: 7.8 Min: 6.1
2	12 inches	29 inches	gravelly very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 705 Min: 141	Max: 7.8 Min: 6.1
3	29 inches	59 inches	extremely gravelly coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 705 Min: 141	Max: 7.8 Min: 6.1

### Soil Map ID: 3

Soil Component Name: Harwood

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

#### Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

#### Ecology Well Logs

Source: Department of Ecology

Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid.

Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

### RADON

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Fulcrum Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
