# APPRAISAL AND REPORT IDENTIFICATION

This Report is one of the following types:

Appraisal Report (A written report prepared under Standards Rule 2-2(a), pursuant to the Scope of Work, as disclosed elsewhere in this report.) Restricted Appraisal Report (A written report prepared under Standards Rule 2-2(b), pursuant to the Scope of Work, as disclosed elsewhere in this report, restricted to the stated intended use by the specified client or intended user.)

# **Comments on Standards Rule 2-3**

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.

- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.

- Unless otherwise indicated, I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved. - Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

- I have no bias with respect to the property that is the subject of this report or the parties involved with this assignment.

- My engagement in this assignment was not contingent upon developing or reporting predetermined results.

- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.

- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.

- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification (if there are exceptions, the name of each individual providing significant real property appraisal assistance is stated elsewhere in this report).

-Appraiser calculates gross living area based on the ANSI Measurement Standard and the appraiser certifies he adheres to the standard. In addition, appraiser has completed additional training and is a certified Home Measurement Specialist.

**Reasonable Exposure Time** (USPAP defines Exposure Time as the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.) My Opinion of Reasonable Exposure Time for the subject property at the market value stated in this report is: 0-3 Months

#### **Comments on Appraisal and Report Identification**

Note any USPAP-related issues requiring disclosure and any state mandated requirements:

EXPOSURE TIME: the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.

Exposure time is a retrospective opinion based on an analysis of past events assuming a competitive and open market. As information, the Fannie Mae definition of market value includes exposure time, so it is required for any appraisal where the Fannie Mae definition is used, such as lender work.

<b>STATEMENT OF ASSUMPTIONS &amp; LIMITING COP</b>	NDITIONS		,
- The appraiser will not be responsible for matte		e that affect either the property be	ing appraised or the title to it. The
appraiser assumes that the title is good and mar			
on the basis			
of it being under responsible ownership.			
- The appraiser may have provided a sketch in the	a approiaal rapar	t to abow approvimate dimension	a of the improvements, and any such
	ie appraisai repor	t to show approximate dimensions	s of the improvements, and any such
sketch			
is included only to assist the reader of the report		property and understanding the a	appraiser's determination of its size.
Unless otherwise indicated, a Land Survey was I			
If so indicated, the appraiser has examined the	available flood m	aps that are provided by the Feder	ral Emergency Management Agency (or
other			
data sources) and has noted in the appraisal rep	ort whether the su	biect site is located in an identifie	ed Special Flood Hazard Area, Because
the appraiser is not a surveyor, he or she makes			
- The appraiser will not give testimony or appear			
arrangements to do so have been made beforeha		ne or she made an appraisar or th	e property in question, unless specific
		as astimated the value of the land	in the east annuage at its highest and
- If the cost approach is included in this apprais	al, the appraiser h	as estimated the value of the land	in the cost approach at its highest and
best			
use, and the improvements at their contributory	value. These sepa	rate valuations of the land and im	provements must not be used in
conjunction			
with any other appraisal and are invalid if they a	re so used. Unless	otherwise specifically indicated,	the cost approach value is not an
insurance			
value, and should not be used as such.			
- The appraiser has noted in the appraisal report	any adverse cond	ditions (including, but not limited t	to needed repairs depreciation the
presence	any autoree con	anono (molaanig) sat not mintoa (	io, noodoù ropuno, doproblation, tio
of hazardous wastes, toxic substances, etc.) obs	orved during the i	nonaction of the subject property	or that he or she became aware of
	served during the i	inspection of the subject property	, of that he of she became aware of
during the	alaal IInlaaa atka	will a stated in the environment	ut the ennuelees has no knowledge of env
normal research involved in performing the appr	aisai. Oniess othe	rwise stated in the appraisal repo	n, the appraiser has no knowledge of any
hidden or unapparent conditions of the property	, or adverse enviro	onmental conditions (including, bi	ut not limited to, the presence of
hazardous	-		
wastes, toxic substances, etc.) that would make	the property more	or less valuable, and has assume	ed that there are no such conditions and

# SCOPE OF WORK

This appraisal report is prepared for Anna M. Humnicky to estimate the market value of the subject property. The analysis consists of an inspection of the subject property from the street only, FMLS and MLS listings and sales, dialogue with agents, CoreLogic data, tax records, and public information.

# MARKET CONDITIONS

There is ample financing available in the market at this time with typical loans at 80% to 90% loan to value ratio. Interest rates of 4% to 9.5%, 0-3 discount points. Discount points are not a major factor in this area. There are some adjustable rate mortgages available. No unusual concessions were found. Typically adjustments are not made for seller paid concessions. On average in the Atlanta market, seller paid closing costs range between 0-5%, dollar for dollar adjustments for these concessions are not warranted.

# ZONING COMPLIANCE

No survey has been provided to this appraiser which may reveal any encroachments, easements, zoning violations, flood zones, or other matters of interest that could warrant modifications of the appraised value. Appraised value is predicated on the assumption that the subject site constitutes a legal "lot of record" and is in compliance with all local, state and federal ordinances, acts and/or regulations. Each municipality will have different zoning and building ordinances which can be extremely detailed. Statements regarding these ordinances are intended only in the most general sense. The subject is zoned for single-family use and is being used as such. Only in this general sense is it considered to legally comply with the local zoning ordinance. The appraiser has not made a detailed comparison of every property characteristic relative to local zoning and building ordinances that affect this property.

# HIGHEST AND BEST USE

To determine the Highest and Best use of the subject property as improved, the appraiser conducted a thorough analysis. The analysis consisted of an inspection of the property, a study of the neighborhood, region and trends. The site's physical attributes and surrounding development were also considered. It is the appraiser's opinion that the Highest and Best use for the subjects site, as improved, is for the continued use as a single-family residence.

Based on the zoning, the subject site is cannot be subdivided. The subject site is approximately 102 feet wide. Within R75 zoning the site width needs to be at least 75 feet making this site too narrow for further subdivision. Therefore, the highest and best is as is.

# ADVERSE SITE CONDITIONS AND/OR EXTERNAL FACTORS

There is an extraordinary assumption that the site is free of all encroachments and easements as there was no inspection done of the property other than from the street.

# PROPERTY CONDITION

An interior inspection was not completed due to access not being allowed. Per the client, the appraisal has been completed under the hypothetical condition that the subject is in good and marketable condition. In addition to the home being in good condition, the home lacks any recent updates.

# <u>GP RESIDENTIAL: SALES COMPARISON ANALYSIS - SUMMARY OF SALES</u> <u>COMPARISON APPROACH</u>

The sales cited are located within close proximity and are considered to be comparable in general features to include location, design, appeal and quality of construction.

Comparable sales are chosen and adjusted according to effective age not actual age. An

#### Supplemental Addendum

Borrower/Client	N/A				
Property Address	2150 Plantation Rd				
City	Lawrenceville	County C	Gwinnett State	GA Zip Code	30044
Lender					

effective age of the subject is determined and comparables are analyzed using that age not actual year built. All comparables chosen are similar in effective age and adjusted accordingly. We are asked to report actual age within the report for the comparables. If an adjustment is deemed necessary it is made in comparison to effective age and a detailed explanation will be given. If no adjustments are made all comparables are similar in effective age to the subject.

Due to limited data of homes located on acreage proximity was expanded into similar school districts. In addition, homes located on lots that could possibly be subdivided were considered.

All comparables and listings used have been adjusted accordingly. A figure of \$60 a square foot for above grade living area has been used. Bathrooms have been adjusted at \$12,000. Basements have been adjusted at \$20 a square foot for below grade area and \$40 a square foot for the finished areas. This has been reported as one final total for the differences between the unfinished and finished areas in comparison to the subject.

In analyzing data in the subject's market area these adjustments appear to be what the typical buyer would pay for equal amenities. This is not considered the value that it would cost to rebuild such amenities. Homes with more than three bedrooms are considered excessive and the GLA adjustment takes this into consideration. Three bedrooms are enough for the average family to live comfortably.

With the subject's market area being comprised of mostly tract homes, minor differences in lot size warrant no adjustments. It appears that the minor differences in square feet do not affect the marketability of the homes.

With comparable seller concessions being within the market of 0%-5% of the sales price no adjustment is required.

Ideally, the appraiser uses the principle of substitution, identifying properties that have sold within the market that are reasonable substitutes for the subject property. As market-derived, relevant characteristics within the sales grid for each of the comparable properties are compared to the subject property, each of the differences found with the comparables are considered and adjusted where appropriate to mirror the subject. Only those differences that are recognized by the majority of buyers willing to pay more or less for the improvement are adjusted upward or downward in terms of price within the market of the subject property. These items are then adjusted for within the sales comparison grid.

In determining adjustments for the sales analysis within the form, the appraiser researches the market for paired or matched sales within the market. These sales must be as nearly identical as possible so that the appraisal can readily isolate small differences and determine from nearly identical properties what the market is willing to pay for a difference between the subject property and a comparable used within the sales analysis.

Although it is nearly impossible to perform an objective paired-sales analysis on every comparable for every difference to the subject property, this is the basis for which adjustments are to be derived within the market. In highly unique properties, in which there are significant differences between the subject and comparable properties, a matched-pair or paired-sales analysis to determine adjustments for the sales comparison grid may be nearly impossible.

Appraisers instead use expertise garnered from completing years of appraisals, researching current market data and in direct contact with local realtors as the source for making market-based estimates for the adjustment to each of the comparable sales within the sales comparison analysis.

# GP RESIDENTIAL: RECONCILIATION - RECONCILIATION AND FINAL VALUE COMPARISON

The estimate of value has been concluded by analyzing the subject's market area and by analyzing current sales and listings of homes comparable to the subject. The income approach was not utilized due to the lack of rental information and the neighborhood being predominately

Lender								

owner occupied. The cost approach is deemed unreliable in homes older than one year.

The values indicated by the comparable sales displayed were reconciled into a single value by giving the most weight to the comparable sales most similar to the subject, based on their gross adjustments, and proportionately less weight to the comparable sales that are less similar to the subject. This is not merely a mechanical process, but instead incorporates all the judgment and consideration given during the adjustment phase of the appraisal.

GLA and physical data taken from primary peer data and Gwinnett County tax records.

# • GENERAL PURPOSE APPRAISAL REPORT FORMS (GPAR)

The appraiser has been engaged to form an opinion of value. If subsequent developments or disagreements should arise, users of this appraisal agree that the appraiser may not be held liable for damages in excess of the amount he/she was paid for doing the appraisal.

Acceptance of, and/or use of, this appraisal report constitutes acceptance of the above conditions.

# • <u>COVID-19</u>

As of the effective date, the long term impact on the market from the COVID-19 virus is unknown; however, the market has demonstrated over the past 2+ years of the virus that there is no negative impact on marketability or value. This assumption has been taken into consideration with regards to the estimate of reasonable exposure time.

## PROFESSIONAL DESIGNATION

As of the date of this report, I William D. Hendley III, SRA have completed the continuing education program of the Appraisal Institute.
