## EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was conducted by Tetra Tech, Inc. (Tetra Tech) for Bank of America, N.A. (BANA). This Phase I ESA was performed in general accordance with the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM International (ASTM) Designation: E 1527-05, for the Gridley facility herein referred to as the “Site,” located in Gridley, California.

The Site is an approximate 0.25-acre parcel of land improved with an approximate 5,950-square foot commercial bank building constructed in 1962. The remainder of the Site consists of, paved parking, grassed areas, and landscaped areas.

According to the historical information reviewed, the Site has been developed since at least 1884. From 1884 to 1957 the Site was developed with one structure occupied by numerous businesses during that time. According to the Sanborn Maps, the Site was use by the following businesses: Gridley Herald Printing, “Furring Goods”, barber shop, shoe maker, general store, “Milly”, office, “Meat, Creamery, and Cigars”. The Site was vacant land in the 1962. The current building was constructed in 1962.

### Findings and Opinions

Typical cleaning and maintenance supplies in containers of 5-gallons or less were observed in the building. No leaks, spills, stains, or pools of liquid were observed in association with the containers; therefore, the containers do not represent recognized environmental conditions (RECs) to the Site.

Minor staining from automotive fluids and vehicular traffic was observed on the paved parking lot. The staining is considered de minimis.

Multiple asbestos survey reports for the Site, completed at various times between 2008 and 2011, were provided by BANA review. Building materials identified as ACM included wall board with joint compound, wall texture, floor tile mastic, and vinyl floor tile. Posted asbestos signs were observed in several areas of the building. The Site building materials appeared to be in good condition at the time of the Site reconnaissance; therefore, suspect and confirmed ACM are not a concern at this time.

---

Environmental Data Resources, Inc. (EDR) provided an environmental database search for the Site and surrounding area in accordance with current ASTM-specified minimum search distances.

The Site was identified on the Facility and Manifest Data (HAZNET) database in the EDR Radius Map report. The Site was listed on this database because it disposed of asbestos containing waste in 2004. Based on its nature, the listing of the Site on the HAZNET database is not considered a REC.

The following facilities were identified in the EDR Radius Map report within the ASTM-specified minimum search distances: four Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG) facilities, one Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor (ENVIROSTOR) facility, one Spills, Leaks, Investigations and Cleanup (SLIC) facility, fourteen Leaking Underground Storage Tank (LUST) facilities, three Underground Storage Tank (UST) facilities, one Recycler Database (SWRCY) facility, eight Historical (Hist) UST facilities, six Statewide Environmental Evaluation and Planning System (SWEEPS) facility, ten "Cortese" Hazardous Waste & Substances Sites List (CORTESE) facility and one Proposition 65 (Notify 65) facility. Off-site facilities of potential concern are discussed in detail below.

- The Civic Center Gridley, located at 685 Kentucky Street, approximately 400 feet northwest of the Site was listed in the EDR database as a "closed" LUST facility. Tetra Tech reviewed a report obtained from the California State Water Resources Control Board GeoTracker Website (<http://geotracker.waterboards.ca.gov>) titled "Review For No Further Action, Underground Storage Tank Case #040 163, Gridley Civic Center, 685 Kentucky Street, Gridley, Butte County" prepared by the California Regional Water Quality Control Board, Central Valley Region (RWQCB) and dated August 3, 2005. According to this report this facility had one 15,000-gallon and one 20,000-gallon fuel oil USTs in 1914 and 1920 respectively. No information was provided on the removal of the USTs. In May 1997, approximately 330 cubic yards of petroleum hydrocarbon contaminated soil was removed from the facility. Additional soil borings in 1999 and 2000 found no groundwater contamination and minimal soil contamination on the facility. Groundwater beneath this facility was found to flow to the southwest. The RWQCB recommended no further action for the facility. Based on the site status of this facility, it is not considered a REC.

- 
- Fourteen LUST facilities were identified within one-half mile of the Site. All fourteen LUST facilities have a “closed” status and therefore are not considered RECs

Based on distance, regulatory status, topographic location, and/or assumed groundwater flow direction, the remaining facilities identified in the EDR Radius Map report do not represent a REC.

### **Conclusions**

No RECs were identified in connection with the Site or surrounding properties.

---

# SECTION 1 INTRODUCTION

On August 13, 2012, Tetra Tech was authorized by Bank of America, N.A. (BANA) to conduct a Phase I Environmental Site Assessment (ESA) of the Gridley Facility herein referred to as the “Site,” located in Gridley, California (see Site Location Map, Site Layout Map, and Aerial Photograph in Sections 9.1 and 9.2). The Site is an approximate 0.25-acre parcel of land improved with an approximate 5,950-square foot commercial bank building constructed in 1962 and associated parking and landscaping improvements.

## 1.1 PURPOSE

The goal of this ESA is to identify whether recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or de minimis conditions are present on the Site. RECs are the presence or likely presence of any hazardous substances or petroleum products on a Site under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the Site or into the ground, groundwater, or surface water of the Site. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (Section 1.1.1 E 1527-05, ASTM International [ASTM] 2005). HRECs are environmental conditions which in the past would have been considered a REC, but which may or may not be considered a REC currently (Section 3.2.39 E 1527-05, ASTM 2005).

## 1.2 INVOLVED PARTIES

BANA is the only party that has been involved in shaping the scope of services needed to satisfactorily manage risks from their points of view. BANA is the only intended beneficiary of this report. Reliance on this report by parties other than BANA may result in reliance on assumptions whose extent and nature could distort the meaning and impact of the estimates given in this report. This could result in misinterpretation of these estimates and unwise actions based on those misinterpretations. As such, no party, except BANA, should rely upon estimates for the potential of hazardous materials to exist at the Site. With the consent of BANA, Tetra Tech is available to work with other parties in developing

---

probability estimates, given other parties unique risk management concerns. The guidelines used to define hazardous substances and petroleum products were obtained from the ASTM Standard of Practice E 1527-05. For the purposes of this report, the vicinity of the Site is defined as properties located within approximately 500 feet of the Site.

### **1.3 SCOPE OF WORK**

The scope of work (SOW), based on ASTM E 1527-05 Environmental Site Assessments: Phase I Environmental Site Assessment Process, is to identify whether RECs are present on the Site. Phase I ESAs typically are conducted in a four-phase process, including: records review; Site reconnaissance; interviews with current owners, and occupants of the Site, and local government agencies; and preparation of a report.

Deviations from ASTM 1527-05 are described in Section 5.3. Report limitations are provided in Section 6.

In addition to the Site visit, readily available resources including soil surveys, Site maps, aerial photographs, U.S. Geological Survey (USGS) topographic maps, and regulatory records were reviewed. A listing of referenced documents utilized during this assessment is provided in Section 7.

The sampling and analysis of asbestos, radon, mold, lead paint, lead-in-water, soil and/or groundwater samples, and the evaluation of wetlands, indoor and/or outdoor air quality, regulatory compliance, industrial hygiene, or noise impacts were beyond the scope of this evaluation. Similarly, the identification of endangered or protected plant and animal species or historical and archaeological areas was beyond the scope of this assessment, as were the identification and evaluation of geological or geotechnical hazards.

## SECTION 2

# GENERAL SITE CHARACTERISTICS

This section provides a brief description of the Site and adjoining facilities. Observations regarding the current land use of the Site and adjoining facilities made during the Site reconnaissance are described below.

### 2.1 SITE OWNERSHIP AND LOCATION

According to the Glenn County Assessor, the Site is owned by Bank of America NT and SA. The Site is located at 901 Hazel Street in Gridley, Glenn County, California.

### 2.2 ADJACENT PROPERTIES

The Site and vicinity are located in an area of residential, medical, and light commercial facilities. The use of the adjacent properties is summarized in the table below.

ADJACENT USES	
<b>North</b>	Hazel Street with a commercial building occupied by Déjà Vu (retail) and Studio J (real estate).
<b>East</b>	Kentucky Street with a commercial building occupied by AgData (computer programming) a hair salon and a title and escrow business.
<b>South</b>	A commercial building occupied by Twin Cities Martial Arts.
<b>West</b>	A commercial building occupied by KC Bar (Pub), a dollar store and barber shop.

Additional commercial and residential properties are located beyond the facilities listed above (see Site Location Map, Site Layout Map, and Aerial Photograph in Sections 9.1 and 9.2).

### 2.3 SITE DESCRIPTION AND CURRENT USES/OPERATIONS

The Site is improved with an approximate 5,950square foot single-story structure constructed of brick and concrete veneer on a concrete slab foundation with asphalt roof. The building was constructed in 1962. The interior of the building is finished with carpeting, ceramic floor tiles, vinyl floor tiles, drywall walls, painted ceiling tiles, and fluorescent lighting. The remainder of the Site consists of asphalt-paved parking areas, concrete sidewalks, and landscaped areas.

---

Air conditioning and heating is provided by roof-mounted electric units. The furnace elements of the package systems utilize natural gas. Pacific Gas and Electric (PG&E) provides electric service natural gas service at the Site. Domestic water, sanitary, and storm sewer services are provided by the City of Gridley.

## **2.4 FORMER SITE USES/OPERATIONS**

According to the historical information reviewed, the Site has been developed since at least 1884. From 1884 to 1957 the Site was developed with one structure occupied by numerous businesses during that time. According to the Sanborn Maps, the Site was use by the following businesses: Gridley Herald Printing, “Furring Goods”, barber shop, shoe maker, general store, “Milly”, office, “Meat, Creamery, and Cigars”. The Site was vacant land in the 1962 aerial photograph and according to the Glenn County Assessor’s office and Ms. Kimberly Smith, with Jones Lang LaSalle, the current building was constructed in 1962. Based on information from the aerial photo graphs, the Glenn County Assessor’s office and Ms. Kimberly Smith, with Jones Lang LaSalle, it is assumed that the building on the Site was constructed some time in 1962, after the 1962 aerial photograph was taken.

---

## **SECTION 3 ENVIRONMENTAL SETTING**

### **3.1 REGIONAL PHYSIOGRAPHIC CONDITIONS**

According to the USGS 7.5-minute series Gridley, State Topographic Quadrangle Map, the Site is approximately 90 feet above mean sea level (MSL) and is generally flat with no significant sloping. Storm water flows via sheet flow to multiple storm drains located in the asphalt parking surfaces of the facility and along Hazel and Kentucky Streets. The storm drains reportedly discharge to the local municipal storm sewer system.

### **3.2 SOIL CONDITIONS**

According to the U.S. Department of Agriculture, Natural Resources Conservation Service's Web Soil Survey ([websoilsurvey.nrcs.usda.gov](http://websoilsurvey.nrcs.usda.gov)), the soils on the Site are primarily of the Brentwood clay loam. The Brentwood series consists of Deep and moderately deep moderately well and well drained soils with moderately coarse textures.

### **3.3 GEOLOGIC CONDITIONS**

The Site is located within the northern section of California's Central Valley. The Central Valley is composed primarily of unconsolidated and semi consolidated alluvium, lake, playa and terrace deposits. Marine (California Geologic Survey 2010).

### **3.4 SURFACE WATER AND GROUNDWATER CHARACTERISTICS**

No surface water bodies were observed on the Site. The Feather River is located approximately 3 miles east of the Site.

Based on surface topography, as interpreted from the USGS topographic quadrangle map, the groundwater in the immediate area of the Site is assumed to flow to the southwest. The actual groundwater flow direction is locally influenced by factors such as surface topography, underground structures, oil and gas extraction, seasonal fluctuations, soil and bedrock geology, water wells, and other factors beyond the scope of this study.

---

## SECTION 4 RESULTS OF ASSESSMENT

The Site visit was conducted on May 2, 2012, by Mr. Brian Strand, a Tetra Tech Geologist. At the time of the Site visit, the weather was clear and visibility was good. The Site visit consisted of a walk-through of the on-Site structure and observations of the perimeter area of the Site to determine the presence of possible fuel tanks, drums, or other objects of environmental concern.

The Site grounds and the building interior were accessible for the reconnaissance. Ms. Janet Luquin Thao, a branch Sales and Service Specialist, granted access to the Site and accompanied Mr. Strand during the Site reconnaissance. Photographic documentation of the Site reconnaissance is presented in Section 9.3.

### 4.1 SITE ASSESSMENT OBSERVATIONS

#### Underground Storage Tanks (USTs) and Aboveground Storage Tanks (ASTs)

Evidence of USTs (fill pipes, vent pipes, etc.) and ASTs was not observed at the time of the Site visit.

#### Hazardous Substances and Petroleum Products

No hazardous substances or petroleum products were observed at the time of the Site visit.

Typical cleaning and maintenance supplies in containers of 5-gallons or less were observed in the building. No leaks, spills, stains, or pools of liquid were observed in association with the containers; therefore, the containers do not represent RECs.

#### Unlabeled Drums/Containers

Unlabeled drums or containers were not observed at the time of the Site visit.

#### Staining/Corrosion

Minor staining from automotive fluids and vehicular traffic was observed on the paved parking lot. The staining is considered de minimis.

---

### Stressed Vegetation

No areas of dead, distressed, discolored, or stained vegetation that may be indicative of RECs were observed on the Site.

### Electrical Transformers/Equipment

One pad-mounted transformer is located in the ally west of the Site. A polychlorinated biphenyl label was not observed on the transformer. Evidence of a release was not observed in association with the electrical transformer; therefore, it is not considered a REC.

### Drywells, Sumps, Catch Basins, and Floor Drains

Drywells and sumps were not observed at the time of the Site visit.

Floor drains were observed in the restrooms. Evidence of staining was not observed in the vicinity of the drains and the drains reportedly discharge to the city sewer system.

### Pits, Ponds, Lagoons, and Pools of Liquid

No pits, ponds, or lagoons likely to contain hazardous substances, petroleum products or waste were observed on the Site or adjoining facilities.

### Wells

Evidence of irrigation, drinking water, or groundwater monitoring wells was not observed at the time of the Site visit.

### Solid Waste

No landfills, dumps, or evidence of burial activities were observed at the Site. No evidence of hazardous waste or non-hazardous waste disposal activities was observed at the Site at the time of the Site reconnaissance.

Two trash cans were observed along the east side of the Site and are serviced weekly by the City of Gridley.

---

### Process Wastewater

Process wastewater was not observed at the time of the Site visit.

### Septic System/Sewer

Evidence of a septic system was not observed at the time of the Site visit.

The Site is connected to the City of Gridley sewer system.

### Source of Potable Water

The Site is connected to the City of Gridley water system.

### Heating and Cooling Systems

Air conditioning and heating is provided by roof-mounted electric units. The furnace elements of the package systems utilize natural gas.

### Other Observations

Other potential environmental concerns were not observed at the time of the Site visit.

## **4.2 STANDARD ENVIRONMENTAL RECORD SOURCES**

Federal, state, and local records were reviewed to assess whether the Site or facilities within the approximate minimum search distance have experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search of the Site in general accordance with current ASTM standards. A copy of this report is included as Section 9.4.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases are reliable and comprehensive, there have been cases where the data presented are out of date and no longer reflective of actual facility conditions. The Government Records Searched/Data Currency Tracking section of the EDR Radius Map report in Section 9.4 identifies when each database was updated.

---

The Site was identified on the Facility and Manifest Data (HAZNET) database in the EDR Radius Map report. The Site was listed on this database because it disposed of asbestos containing waste in 2004. Based on its nature, the listing of the Site on the HAZNET database is not considered a REC.

The following facilities were identified in the EDR Radius Map report within the ASTM-specified minimum search distances: four Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG) facilities, one Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor (ENVIROSTOR) facility, one Spills, Leaks, Investigations and Cleanup (SLIC) facility, fourteen Leaking Underground Storage Tank (LUST) facilities, three Underground Storage Tank (UST) facilities, one Recycler Database (SWRCY) facility, eight Historical (Hist) UST facilities, six Statewide Environmental Evaluation and Planning System (SWEEPS) facility, ten "Cortese" Hazardous Waste & Substances Sites List (CORTESE) facility and one Proposition 65 (Notify 65) facility. Off-site facilities of potential concern are discussed in detail below.

- The Civic Center Gridley, located at 685 Kentucky Street, approximately 400 feet northwest of the Site was listed in the EDR database as a "closed" LUST facility. Tetra Tech reviewed a report obtained from the California State Water Resources Control Board GeoTracker Website (<http://geotracker.waterboards.ca.gov>) titled "Review For No Further Action, Underground Storage Tank Case #040 163, Gridley Civic Center, 685 Kentucky Street, Gridley, Butte County" prepared by the California Regional Water Quality Control Board, Central Valley Region (RWQCB) and dated August 3, 2005. According to this report this facility had one 15,000-gallon and one 20,000-gallon fuel oil USTs in 1914 and 1920 respectively. No information was provided on the removal of the USTs. In May 1997, approximately 330 cubic yards of petroleum hydrocarbon contaminated soil was removed from the facility. Additional soil borings in 1999 and 2000 found no groundwater contamination and minimal soil contamination on the facility. Groundwater beneath this facility was found to flow to the southwest (RWQCB 2005). The RWQCB recommended no further action for the facility. Based on the site status of this facility, it is not considered a REC.
- Fourteen LUST facilities were identified within one-half mile of the Site. All fourteen LUST facilities have a "closed" status and therefore are not considered RECs

---

Based on distance, regulatory status, topographic location, and/or assumed groundwater flow direction, the remaining facilities identified in the EDR Radius Map report do not represent a REC.

The EDR Radius Map report identified 25 facilities that may be in the vicinity of the Site but that could not be properly mapped. Using visual reconnaissance performed during the Site visit, GoogleEarth aerial photographs, and an internet driving directions search engine, Tetra Tech determined that the orphan facilities were not located within the ASTM-specified minimum search distances.

### **4.3 RESULTS OF SITE HISTORY/LAND USE REVIEW**

Historical data regarding the Site and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may constitute RECs. The following sections describe the information available for the Site.

#### **4.3.1 Personnel Site Interviews**

A User Questionnaire was provided to Ms. Kimberly Smith, Site Manager with Jones Lang LaSalle. Ms. Smith returned the questionnaire on August 17, 2012. According to Ms. Smith, the building on the Site was constructed in 1962. Responses to the questionnaire questions are incorporated in the appropriate sections of the report and a copy of the questionnaires are included in Section 9.5.

#### **4.3.2 Municipal File Review**

##### Property Assessor's Office

According to the Glenn County Assessor's office, the current building was constructed in 1962 and consists of a 5,950square foot two-story structure.

##### County Environmental Department

Tetra Tech contacted the Glenn County Environmental Management Department regarding releases of hazardous or petroleum materials or other pertinent environmental conditions that may be associated with the Site. At the time of report submittal, a response had not been received. Once received, pertinent environmental information will be forwarded as an addendum.

##### Other

Other files reviewed were previously discussed in Section 4.2.

---

### **4.3.3 Aerial Photographs**

EDR provided aerial photographs for the following years: 1957, 1962, 1970, 1987, 1998, 2005, and 2006. An aerial photograph dated 2011 was obtained from Bing Maps. The Site appears to be developed with one structure in the 1957 aerial photograph and vacant land in the 1962 aerial photograph. The Site building is present beginning in the 1970 aerial photograph. The 1987 aerial photograph is blurry and determination of specific Site features is not possible. The Site appears similar to current conditions in the 1998, 2005, 2006 and 2011 aerial photographs. According and Ms. Kimberly Smith, with Jones Lang LaSalle, the building on the Site was constructed in 1962. Based on information from the Glenn County Assessor's office and Ms. Kimberly Smith, with Jones Lang LaSalle, it is assumed that the building on the Site was constructed some time in 1962, after the 1962 aerial photograph was taken.

The surrounding area consists primarily of land developed with commercial structures and residences in the 1957 to 1998 aerial photographs. The surrounding area appears similar to current conditions in the 2005, 2006, and 2011 aerial photographs.

The review of aerial photographs did not identify past uses of the Site or surrounding area indicating RECs for the Site. The EDR Aerial Photo Decade Package is included in Section 9.6. The Bing Maps 2011 aerial photograph is included in Section 9.2.

### **4.3.4 Sanborn® Map Report**

EDR provided Sanborn® Maps for the following years: 1884, 1890, 1902, 1909, 1924, and 1934. The review of these historic Sanborn® Maps is summarized below:

YEAR	COMMENTS
1884	<p><b>Site:</b> The Site appears to be a developed with three structures labeled as Misc. Supplies, Misc. Warehouse, and two stores.</p> <p><b>Surrounding Area:</b> The areas adjacent to the Site appear to be developed as commercial properties, including stables, offices and stores.</p>
1890	<p><b>Site:</b> The Site appears to be a developed with one structures with five suites labeled as a general store, Gridley Herald Printing, "Furring Goods", barber shop, and a shoe maker.</p> <p><b>Surrounding Area:</b> The areas adjacent to the Site appear to be developed as commercial properties, including Gridley Livery, The Leland Hotel, a butcher shop, a tailor and a general store.</p>
1902	<p><b>Site:</b> The Site appears to be a developed with one structures with five suites labeled as a general store, "Milly", an office and a store.</p> <p><b>Surrounding Area:</b> The areas adjacent to the Site appear to be developed as commercial properties, including Livery and Feed, General store, Drug Store, The Leland Hotel, a wagon shop, a restaurant, a bicycle shop, and residences.</p>
1909	<p><b>Site:</b> The Site appears to be a developed with one structure with five suites labeled as a general store, Meat, Creamery, Cigars, and Bills.</p> <p><b>Surrounding Area:</b> The areas adjacent to the Site appear to be developed as commercial properties, including Livery and Feed, general store, drug store, a bank, a restaurant, photos, and residences. A site labeled as the City Water Works was depicted approximately 400 feet northwest of the Site. This facility was depicted with a 15,000-gallon UST containing oil.</p>
1924	<p><b>Site:</b> The Site appears to be a developed with one structure with five suites labeled as a general store, meat, and tire shop/auto supplies.</p> <p><b>Surrounding Area:</b> The areas adjacent to the Site appear to be developed as commercial properties, labeled as soft drinks, cigars and pool, meat, jeweler, barber, lodge hall, general store, drug store, a bank, a restaurant, photos, and residences. A site labeled as the City Water Works was depicted approximately 400 feet northwest of the Site. This facility was depicted with a 20,000-gallon UST containing oil.</p>
1934	<p><b>Site:</b> The Site appears to be a developed with one structure with five suites labeled as a general store, and additional stores.</p> <p><b>Surrounding Area:</b> The areas adjacent to the Site appear to be developed as commercial properties, labeled as stores, moving pictures, jeweler, barber, lodge hall, general store, drug store, a bank, a restaurant, and residences. A site labeled as the City Water Works was depicted approximately 400 feet northwest of the Site. This facility was depicted with a 20,000-gallon UST containing oil.</p>

The review of the Sanborn® Maps did not identify historical uses of concern for the Site or surrounding properties. The 20,000 and 15,000-gallon oil USTs formerly located at the City Water Works Facility, approximately 400 feet northwest of the Site is not considered to be a REC because it is a "closed" LUST facility. See Section 4.2 (Civic Center Gridley) for more details. A copy of the Certified Sanborn® Map Report is included in Section 9.6.

---

#### **4.3.5 City Directories**

A City Directory Abstract was provided by EDR and covered the years 1985, 1990, 1996, 2001, 2005, and 2009. The Site address was listed for the years 1985, 1990, 1996, 2001, and 2005 and was listed as Bank AM, Bank AM Loan Info, Bank AM Customer SV, and Bank AM Banking Center. Addresses in the surrounding area were identified as commercial, office and restaurant facilities.

The review of the City Directory Abstract report did not identify past uses of the Site or surrounding area indicating RECs for the Site. A copy of the City Directory Abstract Report is included in Section 9.6.

#### **4.3.6 Historical Topographic Maps**

Historic topographic maps of the Site for the years 1895, 1912, 1952, and 1973 were provided by EDR and were reviewed for information regarding past uses of the Site. The scales of the 1895 and 1912 topographic maps are too small to determine the conditions of the Site or surrounding area. The Site is depicted within an urban area (pink shading) with no structures depicted in the remaining topographic maps.

The surrounding area is depicted in pink denoting urban development in the topographic maps.

The review of topographic maps did not identify past uses of the Site or surrounding area indicating RECs for the Site. A copy of the topographic map report is included in Section 9.6. A copy of the 1972 map is also included in Section 9.1.

### **4.4 PREVIOUS ENVIRONMENTAL REPORTS**

Prior asbestos reports were provided for review by BANA and are discussed in Section 4.6.

### **4.5 USER PROVIDED INFORMATION**

The following section summarizes information (if any) provided by BANA with regard to the ESA.

#### **4.5.1 Title Records**

Title records were not provided for review.

---

#### **4.5.2 Environmental Liens or Activity and Use Limitations**

Information regarding environmental liens or activity and use limitations was not provided for review.

#### **4.5.3 Specialized Knowledge**

BANA provided no specialized knowledge regarding RECs associated with the Site.

#### **4.5.4 Commonly Known or Reasonably Ascertainable Information**

BANA did not provide any other commonly known or reasonably ascertainable information, with regard to potential RECs.

#### **4.5.5 Valuation Reduction for Environmental Issues**

BANA provided no information regarding valuation reduction for environmental issues associated with the Site.

#### **4.5.6 Owner, Site Manager, and Occupant Information**

The Site is currently owned by BANA and managed by Jones Lang LaSalle.

#### **4.5.7 Reason for Performing Phase I ESA**

According to BANA, this Phase I ESA was requested to assess potential environmental concerns.

#### **4.5.8 Other**

BANA provided prior asbestos reports for the Site. The reports are summarized in Section 4.6.

### **4.6 ASBESTOS**

Asbestos sampling and analysis was not included in the scope of work. However, the results of prior asbestos surveys are summarized below.

A Limited Asbestos Survey report, dated May 16, 2008 and completed by ATC Associates, Inc. (ATC), was provided by BANA for review. Twenty-five samples were collected for analysis. The samples identified as positive for asbestos included joint compound (< 0.25% chrysotile), wall texture (<0.25%

---

chrysotile), mastic (2% chrysotile), and white vinyl floor tile (< 1% chrysotile), and mastic (5% chrysotile).

An Asbestos Complete Interior Survey report, dated October 15, 2010 and completed by ATC, was provided by BANA for review. Twenty-five samples were collected for analysis. The samples identified as positive for asbestos included wall board with joint compound, wall texture, floor tile mastic, and vinyl floor tile.

A 2011 Annual Asbestos Notification report, dated November 1, 2011, was also provided by BANA for review and included a summary of the above-referenced asbestos survey reports and findings.

Posted asbestos signs were observed in several areas of the building. The Site building materials appeared to be in good condition at the time of the Site reconnaissance; therefore, suspect and confirmed ACMs are not considered a concern at this time.

#### **4.7 MOLD**

Mold sampling and analysis was not included in the scope of work. However, a limited, non-destructive, visual mold assessment was conducted at the Site during the Site reconnaissance. Tetra Tech did not observe evidence of mold or water damage during the Site reconnaissance; therefore, it is not a concern.

Mold is naturally occurring and levels of fungi will vary with testing locations and with time. This report was prepared in accordance with generally accepted environmental practice and procedures, the project Scope of Work, and the terms and conditions in the Agreement. Structural areas not assessed as part of the Scope of Work are not covered or commented on in this report. Tetra Tech's comments concerning mold growth do not imply that a complete assessment of mold growth occurred during our performance of the agreed upon scope of work. The assessment stated herein is a professional opinion; no other warranty is expressed or implied.

#### **4.8 RADON**

Radon sampling and analysis was not included in the scope of work. However, according to information provided by in the EDR Radius Map report, the Site is located in EPA Radon Zone 3, where average

---

indoor radon levels are less than 2 picoCuries per liter (pCi/L). . Site-specific radon testing was not conducted as part of this assessment.

The EPA has established a recommended “action level” of 4 pCi/L for homes and schools and recommends that buildings with radon levels higher than 4 pCi/L should be repaired. Since there is no known safe level of exposure to radon, EPA also recommends that repairs should be considered for radon levels between 2 pCi/L and 4 pCi/L.

## **SECTION 5 FINDINGS AND CONCLUSIONS**

### **5.1 KNOWN OR SUSPECT ENVIRONMENTAL CONDITIONS**

The following summarizes known or suspect environmental conditions in connection with the Site based on information collected during the ESA. The items may include RECs and HRECs.

The Site was identified on the Facility and Manifest Data (HAZNET) database in the EDR Radius Map report. The Site was listed on this database because it disposed of asbestos containing waste in 2004. Based on its nature, the listing of the Site on the HAZNET database is not considered a REC.

Typical cleaning and maintenance supplies in containers of 5-gallons or less were observed in the building. No leaks, spills, stains, or pools of liquid were observed in association with the containers; therefore, the containers do not represent RECs.

Multiple asbestos survey reports for the Site, completed at various times between 2008 and 2011, were provided by BANA review. Building materials identified as ACM included wall board with joint compound, wall texture, floor tile mastic, and vinyl floor tile. Posted asbestos signs were observed in several areas of the building. The Site building materials appeared to be in good condition at the time of the Site reconnaissance; therefore, suspect and confirmed ACM are not a concern at this time.

EDR provided an environmental database search for the Site and surrounding area in accordance with current ASTM-specified minimum search distances. Based on distance, regulatory status, topographic location, and/or assumed groundwater flow direction, the EDR-identified facilities do not represent RECs.

### **5.2 DE MINIMIS CONDITIONS**

Minor staining from automotive fluids and vehicular traffic was observed on the paved parking lot. The staining is considered de minimis.

### **5.3 DEVIATIONS/DATA GAPS**

There were no deletions or deviations from ASTM E 1527-05 with the exception of the following:

- 
- Interviews were not conducted with the adjacent property owners or tenants.
  - Time gaps of more than 5 years were noted in available historical information.
  - An environmental lien search was not requested by the client and was not obtained for the Site.

Tetra Tech does not believe that these deviations impact its ability to render an opinion regarding potential RECs or de minimis conditions for the Site.

#### **5.4 CONCLUSIONS**

Tetra Tech has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527-05 of the Gridley facility, located at 901 Hazel Street, Gridley, Glenn County, California (the Site). Any exceptions to, or deviations from, this practice are described in Section 5.3 of this report.

This assessment has revealed no evidence of RECs in connection with the Site.

## SECTION 6 LIMITATIONS

This report was compiled based partially on information supplied to Tetra Tech from outside sources and other information in the public domain. The conclusions and opinions herein are based on the information Tetra Tech obtained in compiling the report. This information is on file at Tetra Tech's office. Tetra Tech makes no warranty as to the accuracy of statements made by others that may be contained in the report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report, except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. Tetra Tech does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not ensure elimination of hazards or the fulfillment of client's obligations under local, state, or federal laws or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

Estimates and professional opinions are based upon information derived from the Site reconnaissance and from other activities described herein. BANA is herewith advised that the conditions observed by Tetra Tech are subject to change. Indicators of the presence of hazardous substances and petroleum products that were not indicated or observable at the time of the most recent Site reconnaissance may subsequently become present or observable.

Tetra Tech has used the standard of care recommended by Standard E 1527-05 developed by the ASTM. Because these standards of care only set forth minimums, any additional services and service enhancements that BANA has authorized are contained in the scope of services.

This ESA does not include a radon survey, lead paint sampling, an asbestos survey, or wetland delineation, although the results of previous surveys for these materials or features may have been reviewed for this report. This ESA report is based on information obtained from a variety of usually reliable sources, which are listed in the report. Tetra Tech does not guarantee the authenticity or reliability of the information it has received from outside sources.

---

This report is not a comprehensive Site characterization and should not be construed as such. This report presents opinions that are based on the findings of visually observable on-Site and off-Site conditions, a review of specific regulatory records and historical sources, and comments made by interviewees. ESAs, by their very nature, are limited. Tetra Tech has endeavored to meet the applicable standard of care and in so doing, is advising BANA of the ESA limitations. Tetra Tech believes this information is essential to help BANA identify and manage risks. These risks can be reduced, but cannot be completely eliminated through additional research. Tetra Tech will, upon request, advise BANA of the additional research opportunities available, their impact on risk, and their cost.

# SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, that we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a Site of the nature, history, and setting of the subject Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

We appreciate the opportunity to work with you on this project. If you have any questions concerning the findings and conclusions contained in this report, please call Ms. Judy Marth at (615) 252-4788.

Sincerely,

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/13/2012 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 06/14/2012 has revealed that there are 14 LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 SWEEPS UST sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## AQUIFLOW®

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. ## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BRENTWOOD

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## **9.5 USER QUESTIONNAIRE**

PHASE I ENVIRONMENTAL SITE ASSESSMENT
ASTM 1527-05 USER QUESTIONNAIRE

Please complete and fax to Judy Marth at (615) 254-4507 or e-mail to judy.marth@tetrattech.com. If you have any questions regarding this questionnaire, please contact your Facility Partner Environmental Coordinator. Thank you for your assistance.

Property Name: Gridley
Property Address: 901 Hazel Street, Gridley CA 95948

In order to qualify for one of the Landowner Liability Protections (LLPs)\* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments")\*\*, the user of the Phase I Environmental Site Assessment report must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site (40CFR312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes No X

If yes, please provide the details:
[Blank lines for details]

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40CFR312.26).

Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes No X

If yes, please provide the details:
[Blank lines for details]

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40CFR312.28).

As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No X

If yes, please provide the details:
[Blank lines for details]

---

---

---

**(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40CFR312.29).**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No

If yes, please provide the details: Unknown, I don't have knowledge of purchase price

---

---

**(5.) Commonly known or reasonably ascertainable information about the property (40CFR312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a) Do you know the past uses of the <i>property</i> ?	Yes	No	X
(b) Do you know of specific chemicals that are present or once were present at the <i>property</i> ?	Yes	No	X
(c) Do you know of spills or other chemical releases that have taken place at the <i>property</i> ?	Yes	No	X
(d) Do you know of any environmental cleanups that have taken place at the <i>property</i> ?	Yes	No	X

If yes, please provide the details: \_\_\_\_\_

---

---

**(6.) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40CFR312.31).**

As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes No X

If yes, please provide the details: \_\_\_\_\_
