EDR Inquiry # 4127362.3

Contact: Cris Smith

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EM, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

Tetra Tech EM, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

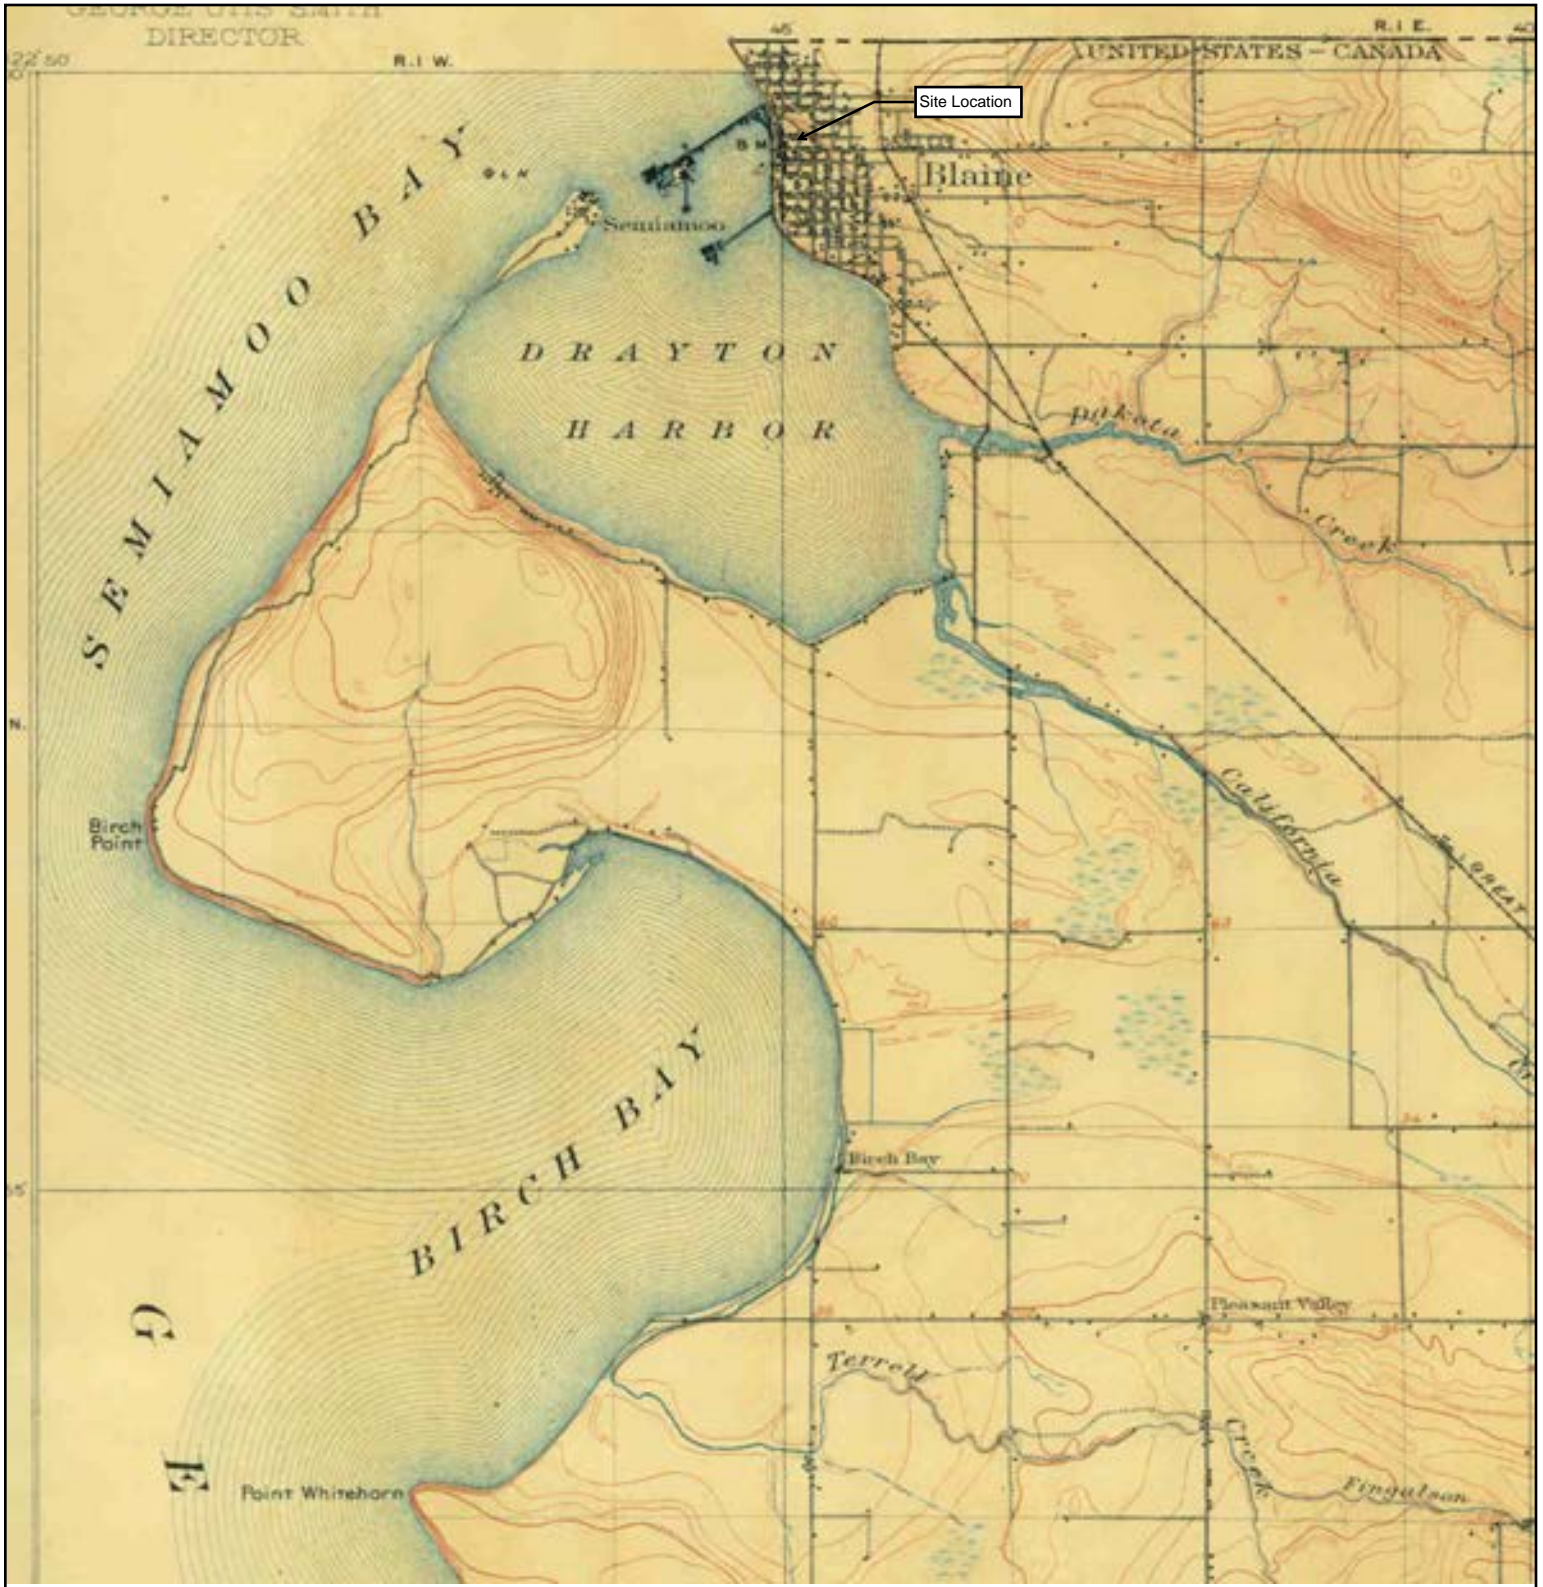

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

9.5 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Frank Stipe
Tetra Tech Archaeologist
Bothell, Washington
frank.stipe@tetratech.com
(425) 482-7821

Mr. Stipe has 9 years of experience completing Phase 1 inspections for development and communications clients. He is also a qualified archaeologist who meets and exceeds the Secretary of the Interior's Standards and Guidelines for archaeology. He has successfully completed Section 106 projects for the Bureau of Land Management, various Department of Transportation agencies, US Forest Service, The Nature Conservancy, and numerous third-party clients, such as municipalities, energy companies, and commercial clients.

Current Responsibilities

Tetra Tech. – Bothell, Washington

(June 2005- present)

Bothell, Washington

- Complete Phase I environmental surveys and complete associated documentation;
- Managing small- and large-scale projects that involved archaeology and cultural resources, such as cell tower, timber, energy, construction, ACOE permits, military facility and utility projects;
- Respond to RFP's. prepare contracts, evaluate-create-maintain project budgets
- Cultural resource monitoring for soil remediation, utility installation, and unexploded ordnance disposal;
- Evaluating historic structures for visual impacts;
- Tribal Consultation
- Completing reports designed to comply with Section 106 regulations; and cultural resource summaries for EA and NEPA reports.
- Knowledge of Federal, State and Local regulations concerning archaeology and communicate that information to non-archaeologists

Education

MA, University of Leicester, 2008

BA, Anthropology, James Madison University, 1998

AA, Liberal Arts, Northern Virginia Community College, 1996

Certifications and Training

40-Hour HAZWOPER (2014)

AHERA training (2014)

Practical loss control training (2006)

PM 100 project management training (2005)

First aid/CPR (2014)

Defensive driving (2002)

Trimble unit training (2002)

Total station training (1999)

Recent Project Work

Phase I Survey for Cellular Tower Facilities to satisfy Section 106 of the NHPA (2005-2014).

Principal Investigator. Projects have been completed in Washington, Alaska, Oregon, Idaho, Montana and Wyoming. Approximately 400 cultural resource projects and 600 Phase I projects have been completed. Projects entail a physical survey of the project area which may include a pedestrian survey and shovel test probes.

Irondale/Port Hadlock Sewer Plant (2011). Conducted a cultural resource survey for a sewage treatment plant and sewage lines located in Irondale and Port Hadlock, WA. Investigation included historical document research, WA DAHP Database research, pedestrian survey and shovel testing. This survey was undertaken to help Jefferson County fulfill their obligations to complete Section 106 requirements. All project components were completed within budget and on time.

Farm Labor Camp Survey (2010). Conducted a cultural resource survey for a 6 acre project located along the Walla Walla River near College Place, WA. Investigation included pedestrian survey and shovel testing. This survey was undertaken to help an agency client fulfill their obligations to complete Section 106 requirements. All project components were completed within budget and on time.

Excavation Monitoring Ketchikan, AK (2007). Archaeological monitor for soil remediation, cleanup of prior canning and processing plant waste. Identified cultural resources present within excavation cleanup boundaries and access paths.

Jefferson County Culvert Surveys (2010). Principal Investigator. Jefferson County, WA.

Archaeological Investigation of 3 proposed culvert replacement projects located along the Hoh River. Investigation included pedestrian survey and shovel testing. This survey was undertaken to help Jefferson County fulfill their obligations to complete Section 106 requirements. All project components were completed within budget and on time.

Space Surveillance Station Projects (2012). Principal Investigator. California, Mississippi,

Arkansas. Archaeological Investigation of three Air Force antenna facilities. These facilities were 80-100 acres in size. Investigation included pedestrian survey, shovel test probes, facility interviews and known archaeological site documentation. This survey was undertaken to help a private client fulfill their obligations to complete Section 106 requirements. All project components were completed within budget and on time.

CRISTINA SMITH

Project Manager, Geologist/Hydrologist

Tetra Tech Inc. - Nashville

EDUCATION/TRAINING

Bachelor of Science, Geology, Ohio University, 1996
OSHA 40-hour HAZWOPER Training and annual refreshers, 1997 to present
Nuclear, Chemical, and Biological Antiterrorism Training, 2000
U.S. EPA Response Readiness Training, 2002
Microsoft Access, 2004
BASINS/WinHSPF Training Course, 2005
Low Impact Development Workshop, 2008

QUALIFICATIONS

Ms. Smith is a geologist with 14 years of professional experience in environmental consulting and water resources for local government. Her experience includes stream gaging and hydrology data management, watershed modeling, hydrogeological investigations, stormwater sampling and permitting, wet weather studies, Phase I/II Site Assessments, field sampling and subsurface investigations, and preparation of various technical reports, including feasibility studies, Spill Prevention Control and Countermeasures Plans (SPCC), Quality Assurance Project Plans (QAPP), Innovative Technology Evaluation Reports (ITER), and health and safety plans. She has provided extensive field management and technical support on several full-scale innovative remedial technology demonstrations for U.S. EPA and emergency response operations.

AREAS OF EXPERTISE

- Phase I/II Assessments
- Hydrogeologic Investigations/Evaluations
- Multi-Phase Site Investigations
- Stormwater Permitting and Plans

PROFESSIONAL EXPERIENCE

Hydrologic Data Management

Ms. Smith served as the hydrologist at the Miami Conservancy District (MCD) in Dayton, Ohio. MCD is a local government agency that provides flood control and water resource management in the Great Miami River watershed. The extensive flood control system includes 5 large earthen dams and 160 miles of levees. The hydrologist's duties included maintenance of an extensive precipitation and stream gage network, analysis of surface water data and compilation of reports, monitoring of stream levels and measurement of streamflow, forecasting of peak stages and coordination with field crew during high water events, assisting geologists and engineers with water resource projects, and responding to public data inquiries.

In addition, Ms. Smith worked with the U.S. Geological Survey on a joint effort to build and calibrate a detailed watershed model of the Great Miami River basin using BASINS/HSPF software. The model has the ability to forecast peak flow at 19 locations on the main stem and tributaries using observed

precipitation and temperature from MCD's network, and forecasted precipitation and temperature from the National Weather Service.

Surface Water and Sediment Sampling

Northern Kentucky Sanitation District #1 (SD1): Ms. Smith conducted surface water sampling associated with a wet-weather sampling project involving Ohio River tributary streams. Data from these projects is used to model and document the impacts of point- and nonpoint- source related pollution (including SSOs and CSOs) on water quality in the watershed and ultimately support compliance with a USEPA Consent Decree. These projects required round-the-clock mobilization capability, collection of samples for various chemical and biological parameters, in-stream measurements of various water quality parameters using a YSI datasonde, evaluation of data quality and preparation of reports. Tetra Tech is supporting SD-1's watershed-based approach, which involves modeling the pollutant load in each watershed. To date, Tetra Tech has completed work for an urban watershed (Taylor Creek) in the Newport/ Bellevue Kentucky area and is currently implementing a sampling program for two additional watersheds in Kenton County (Dry Creek and Pleasant Run Creek).

Clermont County: Ms. Smith served as project manager of a contract with Clermont County to conduct tasks associated with a county-wide water quality project. Tetra Tech is tasked with (1) conducting monthly sampling at 16 surface water locations, performing ISCO autosampler and flow meter maintenance, and calibration of in-situ YSI water quality meters at 5 locations; (2) collecting wet weather samples from five autosampler locations during specified rain events; (3) collecting surface water samples at two monitoring locations during three wet weather events; and (4) conducting flow rate studies at three locations.

ORSANCO: Ms. Smith served as project manager of a wet weather study for the Ohio River Valley Water & Sanitation Commission (ORSANCO). Ms. Smith coordinated field activities for storm water sampling of several tributaries of the Ohio River. The sampling was part of a non-point source pollution study of the Ohio River Valley. Ms. Smith coordinated seven, two-person teams to collect surface water samples from six tributary locations during two specified rain events. Samples were collected continuously over a five-day period. Other project activities included a flow rate determination of one of the tributaries, and analysis of the influence of the Ohio River level on this tributary's flow rate.

U.S. EPA: Under Tetra Tech's GSA contract, Ms. Smith conducted research on and constructed a database of surface sediment samplers for U.S. EPA (EPA) Office of Research and Development. The database will be used to assist EPA and others in identifying and developing a sediment sampling device or tool for collecting an undisturbed sediment sample. The final database will be posted on the internet for public use.

Ms. Smith also has conducted surface water and sediment sampling of retention ponds and streams associated with various industrial sites in Ohio and Indiana. She has also conducted wastewater and sludge sampling of covered lagoons at a facility in Illinois.

Groundwater Contamination Investigations

Ohio EPA: Ms. Smith has conducted groundwater investigations for Ohio EPA in Miamisburg, Urbana, and Milford, Ohio. The investigations were conducted to determine sources of contamination in the towns and delineate the contamination plume, as well as assist in preparing a remediation plan. Activities included background research and sampling and analysis plan preparation, completion of auger and

Geoprobe borings, interpretation of subsurface lithology, groundwater sampling using a Geoprobe and a Hydropunch sampler, installation of monitoring wells, management of samples and investigation-derived waste, preparation of boring logs and a groundwater flow map, and preparation of the final report. She also conducted a groundwater investigation for Ohio EPA that included bedrock coring using air rotary techniques.

In addition to full-scale groundwater investigations, Ms. Smith has conducted groundwater sampling at numerous sites throughout Ohio, Kentucky, Indiana, and Pennsylvania, including quarterly and semi-annual groundwater sampling for two facilities of a major Midwest utility. She has also conducted oversight of groundwater sampling on several projects in the region.

Phase I/II Environmental Site Assessments (ESA)

Ms. Smith has reviewed and prepared numerous Phase I and Phase II ESA's and Transaction Screen reports for private and government clients throughout the United States. These assessments consisted of performing Phase I activities in accordance with ASTM guidelines and producing reports of the findings. Phase II activities were performed in accordance with ASTM guidelines and have included surface soil, sub-surface soil and groundwater sampling, data analysis, and production of reports documenting the nature of contamination. Sites have included Voluntary Action Program (VAP) and Brownfields sites, former UST locations, manufacturing facilities, office buildings, banking centers, hotels, and private land.

Asbestos Inspections

Ms. Smith has conducted numerous asbestos inspections in Ohio, Kentucky, Indiana, and Illinois. Sites have included inspections of homes, industrial and manufacturing buildings, warehouses, office buildings, and hotels. She has completed an asbestos and lead-based paint inspection in conjunction with a VAP Phase I ESA, and has completed inspections of over 100 buildings at the Rock Island Arsenal (RIA) in Rock Island, Illinois. Ms. Smith also compiled a database that will allow RIA to track asbestos-containing materials at the base. The database includes building descriptions, asbestos-containing materials descriptions, sample descriptions, analytical results, and hazard evaluations, which are linked to photographs and floor plans of each building. The database can be updated by RIA when abatements and renovations take place.

EPA Superfund Innovative Technology Evaluation (SITE) Program Demonstrations

Ms. Smith is currently managing the MatCon™ Demonstration at the Dover Air Force Base and the Tri-County Landfill in Illinois. The technology is a modified asphalt cover system that can be used at hazardous waste sites due to low permeability performance. Activities include completion of the Innovative Technology Evaluation Report (ITER), Technology Evaluation Report (TER), and Technology Capsule and Bulletin; continued monitoring of the cover at the Tri-County site and possibly 2 additional sites in Texas and New Mexico, additional analysis of infiltration using sealed double-ring infiltrometers, and completion of a journal article.

Ms. Smith has conducted field activities at several technology demonstrations for the remediation of LNAPL and DNAPL groundwater contamination. Technologies have included steam injection, six-phase heating, permanganate oxidation, surfactant-enhanced remediation, and electrokinetics/electroosmosis remediation. Sites have included Loring Air Force Base in Limestone, Maine; Cape Canaveral Air Force Base in Coco Beach, Florida; OK Tool in Milford, New Hampshire; and Offutt Air Force Base in Omaha, Nebraska. Field activities have included sampling of bedrock cores and straddle-packer testing to

characterize fractured bedrock, field methanol extractions, oversight of auger, air-rotary, and air-hammer drilling activities, logging of cores, and collection of subsurface samples.

Ms. Smith acted as field manager during the demonstrations of two innovative technologies to treat lead-contaminated soil at three sites along Moxahala Creek near Zanesville, Ohio. Ohio EPA has designated this area as a geographic initiative region with high priority for remediation due to the extensive lead contamination associated with former pottery factories in the area. Ms. Smith coordinated and conducted collection of soil and groundwater samples using a Geoprobe direct-push rig, and field analysis of samples for lead using x-ray fluorescence techniques. She assisted with the development of specialized assay techniques to monitor the effectiveness of the technologies in reducing human lead ingestion. She is currently conducting long-term monitoring at the site.

EPA Emergency Response Support

Ms. Smith currently supports the EPA Environmental Response Team (ERT) contract at the Erlanger, Kentucky warehouse facility. Under this contract, Tetra Tech performs rapid environmental assessments during radiological releases, chemical releases, oil spills, and other environmental episodes; maintains environmental monitoring, surveillance and response equipment for ERT and EPA's National Decontamination Team (NDT); models, collects, and presents environmental data; prepares technical procedures associated with environmental assessment techniques; and conducts advanced training. Ms. Smith's activities include management of equipment maintenance data using Microsoft Access and maintenance and calibration of environmental detection and sampling equipment.

Ms. Smith participated in sampling and cleanup activities under the EPA START program in response to Anthrax terrorism in Washington, D.C. These activities included wearing modified level C personal protective equipment, collecting wipe samples, air monitoring, decontamination, and reconnaissance activities.

Spill Prevention Control and Countermeasures (SPCC) Plans: Ms. Smith has completed several SPCC plans, including plans for Verizon Wireless MTSO facilities in: Cincinnati, Ohio; Dublin, Ohio; Columbus, Ohio; and Cleveland, Ohio.

Tier II Reporting of Hazardous Chemicals: In accordance with federal and state regulations, Ms. Smith prepared Tier II reports for hazardous chemicals located at Verizon Wireless facilities throughout Ohio, Kentucky, Michigan, and Georgia.

Stormwater Permitting: Ms. Smith is assisting Delta Air Lines with NPDES stormwater permitting requirements at their Dayton International Airport station. Activities include preparation of the 2002 annual report, coordination of the station's laboratory, preparation of a guidance documents summarizing monthly and annual sampling and reporting requirements, and training of the station's responsible personnel.

EMPLOYMENT HISTORY

2007 - Present	Geologist, Tetra Tech, Inc., Cincinnati, Ohio & Nashville, Tennessee
2004-2007	Hydrologist, Miami Conservancy District, Dayton, Ohio
1998 – 2004	Geologist, Tetra Tech, Inc., Cincinnati, Ohio
1997 – 1998	Technician, The Shepherd Color Company, Fairfield, Ohio,
1996 – 1997	Technician, Procter & Gamble, Sharonville, Ohio
