as such, comments on observed conditions given in this report should not be taken	as a guarantee that a problem does not exist.	
The following chart is to assist the intended user in understanding the scope of a co	mplete visual inspection for appraisal purposes:	
Complete Visual Inspection Includes:		
List the amenities		
View readily observable exterior areas		
View readily observable interior areas		
Note quality of materials and workmanship		
Measure the exterior of the improvements		
Observe the floor plan and room layout		
Assess the functional utility of the property Not the subject's conformity to the market area		
Note style/design		
Observe the general condition of the improvements		
Observe a representative sampling of closets, windows,		
electrical switches, and doors		
Photograph exterior and view site around the improvements		
Complete Visual Inspection Does Not Include:		
Testing or activating mechanical systems		
Activating appliances		
Observation of crawl spaces and attics		
Observation of areas not readily accessible Building code compliance issues		
Moving furniture or personal property		
Mold Assessment, Radon Assessment		
Removing (or moving) floor coverings		
Testing or inspection of the well and septic		
Reporting personal property		
Roof condition report beyond an observation from the ground level		
If the cost approach was used it represents the "replacement cost estimate," and is		
insurance purposes. The definition of "market value" on page 4 of this report is not		
presented, a cost service and other sources such as local builder cost figures was umethods: market extraction, allocation, the developmental method or from a review		everai
methods. Market extraction, anocation, the developmental method of normal review	and analysis of sales of similar sites within the market area.

19-000290-02-1 File # 19-016

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, additions, or deletions to the intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE:

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: to the following assumptions and limiting conditions:

The appraiser's certification in this report is subject

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the report, the appraiser has no property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such or warranties, express or implied. The appraiser will not be makes no quarantees responsible for conditions that do exist or for any engineering or testing that might be required to discover whether such conditions Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

19-000290-02-1 File # 19-016

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized any one to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

	Liquidation Value Addendum								
Client: Union B	ank & Trust, Jamie Tyson								
Subject Property:	1321 Kasba Ct								
City: Virginia Be	ach	State: \/A	Zip:	23464-8809					

SUBJECT PROPERTY IDENTIFICATION

The term liquidation value is defined in <u>The Dictionary of Real Estate Appraisal</u>, Fifth Edition as follows

The most probable price that a specified interest in real estate property is likely to bring under all of the following conditions:

- Consummation of a sale will occur within a severely limited future marketing period specified by the client.
- The actual market conditions currently prevailing are those to which the appraised property interest is subject.
- The buyer is acting prudently and knowledgeably.
- The seller is under extreme compulsion to sell.
- The buyer is typically motivated.
- The buyer is acting in what he or she considers his or her best interest.
- A limited marketing effort and time will be allowed for the completion of a sale.
- Payment will be made in cash in U.S. dollars or in terms of financial arrangements comparable thereto.
- The price represents the normal consideration for the property sold, unaffected by special or creative financing concessions granted by anyone associated with the sale.

The following data and analysis is offered as an addendum to the appraisal report, and cannot be relied upon without the complete appraisal report, with specific attention to the discussion of market conditions and normal market exposure. As specified by the client, the liquidation value is based upon the following market exposure: Less Than 30 days 🗙 60 days

DEVEL	OPMENT	OFLIGI	IIDATION	VALUE

The appraiser has relied upon the following method(s) to develop an opinion of liquidation value. Market value as reported within this appraisal report correlates with liquidation value (see comments below) Market Analysis (See Comparable Grid on following page).

Statistical Analysis (See comments below).

Secondary Analysis - e.g. Interviews with market participants, peers, news media research, etc (See comments below).

Alternative Analysis – (See comments below).

Comments Regarding the Methods Used:

All 4 closed comparable sales in the appraisal report were marketed for less than 60 days. The active listing has been on the market for over 200 days. Looking at the subject's neighborhood of Glenwood, there have been 92 sales over the last year. 72 of these sales occurred with 60 days or less of exposure time. The other 20 occurred with a median marketing time of 87 days. This data indicates that approximately 78% of homes in the subject's neighborhood are priced competitively and require under 60 days of exposure time.

The median sales price of the 72 sales that were exposed to 60 days or less was \$308,500 with a median gross living area of 2031 square feet. The median sales price of the 20 sales that were exposed for more than 60 days on the market was \$201,000 with a median gross living area of 12,100 square feet. This data indicates that there is no improvement in value with a longer exposure time or decrease in value with a shorter exposure time.

Given the above data, the estimated market value provided within this appraisal report correlates with the liquidation value.

FHA/VA Case No.

File No. 19-016

Borrower	N/A						
Property Address	1321 Kasba Ct						
City	Virginia Beach	County	Virginia Beach City	State	VA	Zip Code	23464-8809
Lender/Client	Union Bank & Trust, Jamie Tyson						

No consideration has been given to personal property in the final value estimate. Any personal property items listed in the contract have no significant effect on the appraisal report.

This is a Summary Appraisal Report which is intended to comply with the reporting requirements set forth under Standards Rule 2-2(b) of the Uniform Standards of Professional Appraisal Practice for a Summary Appraisal Report, as such it represents only summary discussions of the data, reasoning, and analysis that were used in the appraisal process to develop the appraiser's opinion of value.

The purpose of this appraisal is to determine market value and the use of the real estate appraised is as a residence.

Data was gathered through the city records as well as the MLS listing service. Real estate listings were also consulted to verify condition, extent of renovation, etc. The appraiser did not have the benefit of an inspection into the comparables. Therefore, in cases of conflicting data between these sources, the appraiser used her best judgment as to the comparables' marketing characteristics and amenities.

This appraisal report is in compliance with the USPAP statement #8 regarding electronic transmission of appraisal reports and signature security. I have sole control over the affixing of my signature on this report.

The appraiser is not a home inspector. Only a visual inspection of accessible areas was completed. This appraisal report cannot be relied upon to disclose defects in the property.

A borrower or third party may receive a copy of the appraisal report, however, this does not mean the borrower or third party are the intended user.

Of note, information regarding sales concessions for transactions/comparables is not disclosed in the MLS listings by agents and is not typically available for sales that are not new construction. As such, no adjustments were made for sales concessions.

It is noted that the DOM (days on market) in the Sales Comparison grid is indicative of the most recent listing for that comparable. It is not uncommon for properties to have been listed or changed a few times before it is priced correctly and sells.

The source of the definition of market value for this report was that referenced by Part 323.2(g) of Title XI - FIRREA.

The estimated market value is based on a 60 day exposure time.

I have considered relevant competitive listings and/or contract offerings in performing this appraisal.

I completed a previous appraisal on the subject property on 2/12/2018.

It is noted that Austin Boyles significantly assisted in developing this appraisal report to include site inspection, comparable inspections, data entry, comparable research and analysis, and reconciliation. The appraiser, Jennifer Garrison, completed the inspection of both the subject and comparables, completed the final comparable selection, reviewed all analysis, and determined final value estimate.

An exterior only inspection of the subject property was completed. Its general condition does not appear to have changed since a prior interior inspection completed on 02/12/2018. The subject's condition is assumed based on this previous inspection and current exterior only inspection.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high-level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

FHA/VA Case No.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

03

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

05

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and uporades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

RFP Comments (if any):

EXTERIOR ONLY 2055 INCLUDE THE USPAP ADDENDUM IN THE APPRAISAL INCLUDE THE ENGAGEMENT LETTER IN THE ADDENDUM OF

THE APPRAISAL

Per new USPAP guidelines please include a comment describing the Highest and Best Use of the Subject Property.

1. 2055 appraisal must have a clear and descriptive photograph that shows

the front of the subject property.

2. Photos must be provided for any exterior amenities that are given value.

3. All comparable must be inspected from the street and current original photos included, no MLS or Google Map Photos, unless notified by the appraiser first.

4. Appraisers who are assigned an appraisal must inspect and sign appraisal. 5. If currently listed or under contract, must be analyzed, not just cited.

6. If land value is given, as stated in the appraisal, need actual support for the land value.

7. Market Conditions Addendum and UAD not required.

8. All appraisal reports shall be written, providing adequate data analysis to support the appraisera s opinion of market value.

9. The development of the appraisal and the reporting of the value estimates must be objective, impartial and unbiased.

10. The appraiser is expected to make appropriate adjustments based on factual data supported by market evidence for all factors that influence

11. DO NOT CONTACT THE BORROWER/PROPERTY OWNER 12. Please provide a copy of the Engagement Letter in the addendum of the appraisal.

Liquidation Sale Value

We are defining a Liquidation Sale as one that would occur in a less than normal marketing period. The marketing period is defined as the period of time from the current date to the date a bona fide contract is signed. If Liquidation Sale Value estimated is requested, we require the appraiser to support the Liquidation Sale Value with some market evidence. This could

consist of comparable sales, or other relevant evidence.

The term liquidation value is defined in The Dictionary of Real Estate Appraisal, Fifth Edition as follows:

The most probable price that a specified interest in real estate property is likely to bring under all of the following conditions:

1. Consummation of a sale within a short time period.

- 2. The property is subjected to market conditions prevailing as of the date of
- 3. Both the buyer and the seller are acting prudently and knowledgeably.

- 4. The seller is under extreme compulsion to sell.
 5. The buyer is typically motivated.
 6. Both parties are acting in what they consider their best interests.
 7. A normal marketing effort is not possible due to the brief exposure time.
 8. Payment will be made in cash in U.S. dollars or in terms of financial
- arrangements comparable thereto.
- 9. The price represents the normal consideration for the property sold, unaffected by special or creative financing concessions granted by anyone associated with the sale.
- 10. Please provide a copy of the Engagement Letter in the addendum of the appraisal.

NEED AS IS AND A 60 DAY LIQUIDATION VALUE. MUST PROVIDE ACTUAL SUPPORT FOR THE LIQUIDATION VALUE. DO NOT CONTACT THE BORRWER/OWNER.

Fee: \$350.00

Delivery Date: 2/8/2019

Address Report To: Jamie Tyson

> Union Bank & Trust 4355 Innslake Drive Glen Allen, VA 23060

Deliver Hard Copies To (if applicable):

Property Contact(s):

David Clark, Account Officer Phone: 757-995-0430 david.clark@bankatunion.com

Bank Contact: Jamie R Tyson SRA

jamie.tyson@bankatunion.com

804-774-2083

Intended Use: The intended use of the appraisal is to establish a value of the real estate for loan

underwriting or classification decisions.

Intended Users: Union Bank & Trust and/or its affiliates. Delivery Instructions -Report and Invoice: Upload an electronic PDF copy of the completed final appraisal report and invoice (separate files) to RIMSCentral at www.rimscentral.com Include the RIMS No. on the appraisal and the invoice.

The Bank Job Manager may request that you mail hard copies of the appraisal after it has been reviewed and approved.

Contact the Property Contact within 3 days: Please make your initial contact with the Property Contact no more than 3 days from the date of this Letter of Engagement.

Minimum Appraisal Requirements. At a minimum the appraisal must meet the requirements of USPAP, FIRREA, the Interagency Appraisal and Evaluation Guidelines, and the requirements of Union Bank & Trust. Further, a statement to this effect must appear prominently in the appraisal report. Appraisals will be reviewed by or on behalf of the Bank for compliance with these requirements. You agree to make any revisions or corrections requested by the Bank, within the original scope of the assignment, without additional charge.

Market Value Definition. The following definition of Market Value should to be used. It is based on Federal Register, 12 CFR Part 34, Subpart C, 34.42(g), dated August 24, 1990, used by the Federal Regulatory Agencies, as follows:

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

(1) Buyer and seller are typically motivated; (2) Both parties are well informed or well advised, and acting in what they consider their own best interests; (3) A reasonable time is allowed for exposure in the open market; (4) Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and (5) The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Appraiser License or Certification. The appraiser must hold the requisite state license or certification to perform the appraisal. A copy of the license or certification must be in the Addendum of the appraisal.

No Limited Liability Clause. We cannot accept a condition of the appraisal that the appraiser's liability is limited to the amount of the appraisal fee.

Engaged Appraiser Must Sign and Be Responsible for Work. Our agreement is with the engaged appraiser. This person must either do the work completely, or if he enlists the assistance of others, he must supervise the work, sign the report, and be fully responsible for the content of the appraisal.

Environmental Problems. In the course of the appraisal process, the appraiser should take reasonable steps to detect obvious evidence that the property may have been contaminated by hazardous substances, is located in a flood hazard or wetlands area, Chesapeake Bay Preservation Area (if located in Virginia) or Chesapeake Bay Critical Area (if located in Maryland), or includes improvements in which asbestos containing materials may be present. All such evidence discovered by the appraiser shall be immediately disclosed to the Bank; and the appraisal shall consider such evidence, as well as any evidence of same provided to the appraiser by the Bank or other parties, when estimating the market value of the property.

Prior Sales and Current Contracts or Listings. The appraiser must analyze and consider all prior sales or transfers of ownership in the last 3 years, or longer if necessary, and current listings for sale or contracts as they relate to the current value estimate. Merely stating the sales is not acceptable.

Cite Sources and Definitions of Building and Land Areas. The appraiser must cite the sources of the building and land areas used in the appraisal - i.e. field measurements, architectural plans, assessment records, survey, etc. Further, the appraiser must specifically define what the building areas represent - i.e. gross building area, net rentable area, net usable area, as defined by BOMA, etc. Actual field measurements are expected unless impractical.

Deferred Maintenance, Structural and Functional Deficiencies. These should be adequately described in the appraisal, and their effect on value should be considered. Include photos when possible.

Furniture, Fixtures, and Equipment (FF&E). As required by the Regulations, the contributing value of these must be reported separately from the real estate value.

Tax Assessment Analysis. If it is determined that the subject is significantly over or under assessed, an analysis with comparable assessments must be included. If it is likely that the assessment will significantly increase, this should be factored into the analysis.

Comparable Photos and Location Maps. The appraisal must include photos of all comparable improved sales and rentals, and location maps of all sales and rentals.

Adjustment grids. The appraisal must include adjustment grids for all comparable sales and rentals.

Confidential. This assignment is for the exclusive use of Union Bank & Trust. The Bank is your client. The appraiser must make all effort to ensure that no information is divulged concerning the subject of this assignment, the appraisal report, the analysis or conclusions to anyone other than the authorized representative of the Bank. All information not in the public domain regarding the subject property shall be treated as confidential.

Late Delivery of Appraisal. If the appraiser is running late on meeting the delivery date, for any reason, he must notify the Bank Contact in writing at least 5 days prior to the original delivery date.

Late Delivery Penalty. The Bank reserves the right to impose a financial penalty on the appraiser for late delivery of an appraisal in the amount of \$100 or 5% of the appraisal fee per day.

Unacceptability of Appraisal. If upon review, the appraisal report is considered unacceptable by the Bank for non-compliance issues, and requested changes and/or additions are not properly considered, the Bank may elect to refuse payment of the appraiser's invoice.

Copy of Letter of Engagement in the Addendum. Please include a copy of the Letter of Engagement in the Addendum of the appraisal.

Acceptance of this Engagement. Please indicate your acceptance of this engagement by responding appropriately in RIMS as soon as possible.
