PLEASE NOTE THE FOLLOWING STATEMENTS:

- A: The inspection covered only the readily accessible areas of the understructure including sills, joists, subflooring and sub-structure support timbers which were visible. It was made only in those areas which were readily accessible and was made in areas where moisture conditions were most likely to occur. No inspection was made in areas which required the breaking apart, dismantling or removal of any object and no inspection was made of any portion of the property other than the foundation and the understructure below the floor level of the first main floor.
- B. The inspection did not include areas which were obstructed or inaccessible at the time of inspection.
- C. This is not a structural damage report. Neither is this a warranty as to the absence of moisture.
- D. This report is not a guarantee against future moisture damage or moisture conditions, but is indicative of the conditions of the understructure on the date of inspection.
- E. If damage from moisture or fungi is discovered, it is the responsibility of the property owner to determine whether the damage requires repair by having a licensed building contractor or a structural engineer inspect and estimate the necessary repairs, or submit in writing that the damage does not warrant repair.
- F. This report does not in any way relate to an inspection for infestation or damage from wood destroying insects. Results of any inspection for wood destroying insects infestation or damage is the subject of an entirely separate inspection and report which is in no way involved with the preparation of this report.
- G. This report is not in a comprehensive moisture report regarding the entire structure but only discloses the results of an inspection of the understructure as described in A above. Therefore, this report should not be relied upon in lieu of a physical inspection of the entire premises by any interested parties or persons.
- H. The inspection procedures used in performing the inspection followed the standard guidelines for moisture inspections as outlined in the NPCA's Technical Release No. 54009A.
