Dear Mr. Mottlowitz:

ECS Midwest, LLC, (ECS) is pleased to provide GMX Real Estate Group with the results of our Phase I Environmental Site Assessment (ESA) for the referenced site. ECS services were provided in general accordance with ECS' proposal and generally meet the requirements of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and EPA Standards and Practices for All Appropriate Inquiry contained in 40 CFR Part 312.

If there are questions regarding this report, or a need for further information, please contact the undersigned at 847-279-0366.

**ENVIRONMENTAL PROFESSIONAL STATEMENT**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## **1.0 EXECUTIVE SUMMARY**

ECS was contracted by GMX Real Estate Group to perform an ASTM Standard E 1527-13, Phase I Environmental Site Assessment (ESA) of the former Fox Lake Dominick's Gas Station located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. ECS was not contracted to address non-scope considerations. This Executive Summary is an integral part of the Phase I Environmental Site Assessment report. ECS recommends that the report be read in its entirety.

The assessed area referred to as "site" or "subject site" is located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. According to the Lake County Assessors Office, the subject site consists of an approximate 25,264 square foot parcel of land which is identified as Property Index Number (PIN) 05-22-102-006. The subject site consists of a vacant paved lot with spots of gravel. The site is located in an area that can generally be described as commercial.

The site is bounded on the north by paved parking lot, followed by vacant land and is bounded on the east by Bank of America, followed by Route 12. The site is bounded on the south by two roadways, Frontage Road and Big Hollow Road and is bounded on the west by a paved parking lot, followed by a strip mall.

A regulatory database search report was provided by EDR. The database search involves researching a series of Federal, State, Local, and other databases for facilities and properties that are located within a specified minimum search distances from the site. The subject site was not identified within any of the searched governmental databases; however, the Illinois Office of the State Fire Marshal (OSFM) did provide information concerning the subject site.

**Dominick's # 1958**, 1296 South Route 12, (**subject site**) was identified on the OSFM searchable database. According to the OSFM database, the subject site previously maintained three underground storage tanks (USTs) - two 10,000-gallon and one 20,000-gallon gasoline. The USTs, which were installed in February of 2002, were composite double walled tanks with automatic leak detection, overfill protection, and spill containment devices installed. In August of 2014 the USTs were removed without incident. As further discussed in Section 7.2 of this report, soil samples collected upon removal of the USTs did not identify any exceedances of applicable regulatory levels. Given the fact that the USTs have been removed from the subject site and confirmatory samples did not identify soil impacts, the former on-site USTs are not considered to be a recognized environmental condition.

There were several additional facilities identified by the regulatory database search. Based on their distances, groundwater flow direction inferred from surface topography or regulatory status, these reported facilities do not represent RECs for the site.

ASTM Standard E 1527-13 defines a "data gap" as: "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information". Significant data gaps were not identified.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13 of the former Fox Lake Dominick's Gas Station located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. Exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property. Further investigation is not warranted at this time.

## **2.0 INTRODUCTION**

### **2.1 Purpose and Reason for Performing Phase I ESA**

The purpose of the ESA was to:

- evaluate the probability of impact to the surface water, groundwater and/or soils within the property boundaries through a review of regulatory information and a reconnaissance of the subject site and vicinity;
- evaluate historical land usage to identify previous conditions that could potentially impact the environmental condition of the site;
- conduct all appropriate inquiry as defined by ASTM Standard E 1527-13 and 40 CFR Part 312;
- evaluate the potential for on-site and off-site contamination; and,
- provide a professional opinion regarding the potential for environmental impact at the site and a list of Recognized Environmental Conditions (RECs).

The ESA should allow the Users the opportunity to qualify for landowner liability protection under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) provided certain stipulations are met. The landowner liability protections are: an innocent landowner, a contiguous property owner, or a bona fide prospective purchaser. The User must meet the protection stipulations detailed in CERCLA to qualify as well as meet the User Obligations contained within ASTM E 1527-13 standard.

The reason for conducting this ESA is to conduct all appropriate inquiries into the uses and prior ownership of the subject site pending real estate transaction.

### **2.2 Scope of Services**

The environmental assessment was conducted in accordance with ASTM E 1527-13 and EPA Standards and Practices for All Appropriate Inquiry (40 CFR §312.10). The environmental assessment was conducted under the supervision or responsible charge of an individual that qualifies as an environmental professional, as defined in 40 CFR §312.10.

ECS was contracted by GMX Real Estate Group to perform an ASTM Standard E 1527-13, Phase I Environmental Site Assessment (ESA) of the Fox Lake Dominick's Gas Station located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. ECS was not contracted to address non-scope considerations.

## **2.3 Limitations**

The ESA involved a reconnaissance of the site and contiguous properties and a review of regulatory and historical information in accordance with the ASTM standard and EPA regulation referenced herein. No non-scope considerations or additional issues such as asbestos, radon, wetlands or mold were investigated, unless otherwise described in Section 7.0 of this report.

The conclusions and/or recommendations presented within this report are based upon a level of investigation consistent with the standard of care and skill exercised by members of the same profession currently practicing in the same locality under similar conditions. The intent of this assessment is to identify the potential for recognized environmental conditions in connection with the site; however, no environmental site assessment can completely eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the site. The findings of this ESA are not intended to serve as an audit for health and safety compliance issues pertaining to improvements or activities at the site. ECS is not liable for the discovery or elimination of hazards that may potentially cause damage, accidents or injury.

Observations, conclusions and/or recommendations pertaining to environmental conditions at the subject site are necessarily limited to conditions observed, and or materials reviewed at the time this study was undertaken. It was not the purpose of this study to determine the actual presence, degree or extent of contamination, if any, at this site. This could require additional exploratory work, including sampling and laboratory analysis. No warranty, expressed or implied, is made with regard to the conclusions and/or recommendations presented within this report.

ASTM E1527-13 defines a "recognized environmental condition (REC)" as "the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: 1) due to release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment." For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form including solid and liquid at the surface or subsurface and vapor in the subsurface. Note: vapor migration in the subsurface is described in Guide E2600 published by ASTM. ECS has not conducted a Vapor Encroachment Screen in accordance with the E2600 guide.

A "*de minimis* condition" is a condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. *De minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

ASTM E1527-13 defines a "controlled recognized environmental condition (CREC)" as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition identified as a controlled recognized environmental condition does not imply that the Environmental Professional has evaluated or confirmed the adequacy, implementation or continued effectiveness of the required control that has been, or is intended to be, implemented.

ASTM E1527-13 defines a "historic recognized environmental condition (HREC)" as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the Environmental Professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria).

ASTM E1527-13 defines a "business environmental risk" as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice". Client-imposed limitations and site condition limitations, if encountered, are detailed in Section 6.1 Methodology and Limiting Conditions.

This report is provided for the exclusive use of GMX Real Estate Group. This report is not intended to be used or relied upon in connection with other projects or by other unidentified third parties. The use of this report by any undesignated third party or parties will be at such party's sole risk and ECS disclaims liability for any such third party use or reliance.

## **2.4 Data Gaps**

Data failures (historical data gaps) were identified during the historical research of this site. Use of the site was generally documented back to 1920. Historical information was missing for various periods. However, due to the apparent historical use of the subject site; the historical data gaps are not expected to impact our ability to render a professional opinion regarding the subject site. No other data gaps were identified.

### **3.0 SITE DESCRIPTION**

#### **3.1 Site Location and Legal Description**

The assessed area referred to as "site" or "subject site" is located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. According to the Lake County Assessors Office, the subject site consists of an approximate 25,264 square foot parcel of land which is identified as Property Index Number (PIN) 05-22-102-006. A legal description was not provided.

#### **3.2 Physical Setting and Hydrogeology**

As determined from the USGS topographical map *Wauconda, Illinois* quadrangle dated 1998, the subject site is situated approximately 757 feet above mean sea level with topography sloping to the southwest. No water bodies are depicted on the site. Based on a review of the topographic map and observations of general area and site topography, surface run-off would be expected to flow to the southwest with areas to the northeast considered topographically upgradient.

The subject site is located within the Central Lowlands Physiographic Province. The soils encountered in this area are the residual product of in-place chemical weathering of rock presently underlying the site and/or historic depositional events. In general, shallow unconfined groundwater movement within the overlying soils is controlled largely by topographic gradients. However, as the ground water percolates downward, it becomes controlled by the subsurface geologic conditions. Thus, the direction of groundwater movement in the deeper aquifers may not be consistent with the reflecting topography.

Surface waters primarily recharge shallow aquifers by infiltration along higher elevations. Once in the shallow aquifer, the groundwater typically discharges into streams or other surface water bodies at lower elevations. The depth of the shallow water table is transient and can vary with seasonal fluctuations in precipitation. Groundwater movement in the shallow aquifer is generally from higher to lower elevations. As such, shallow groundwater is expected to flow generally to the southwest. Based on the presumed groundwater flow direction, properties located to the northeast appear to be upgradient relative to the site. However, regional influences may have an impact on groundwater flow. The actual groundwater flow direction cannot be determined without site-specific information obtained through the installation of groundwater monitoring wells.

#### **3.3 Current Use and Description of the Site**

The subject site consists of an approximate 25,264 square foot parcel of land that is currently vacant and consists of a paved lot with spots of gravel. The site is located in an area that can generally be described as commercial/residential.

#### **4.0 USER PROVIDED INFORMATION**

The ASTM standard includes disclosure and obligations of the User to help the Environmental Professional identify the potential for Recognized Environmental Conditions associated with the site. A User Questionnaire was submitted to and completed by Mr. Kevin Mottlowitz, GMX Real Estate Group, LLC. A copy of the completed User Questionnaire is included in Appendix II.

##### **4.1 Title Information**

ECS was not provided with title information by the User. If title information is provided, we will review it for evidence of environmental concerns and issue an addendum to this report.

##### **4.2 Environmental Liens or Activity and Use Limitations**

ECS was neither contracted to obtain information on environmental liens or activity and use limitations; nor have we been provided with information on environmental liens or activity and use limitations for our review. If this information is provided at a later date, it will be reviewed for evidence of environmental issues and an addendum to this report will be forwarded if the review indicates a material difference in our findings. It should be noted by the User of this report that if the User does not provide activity and use limitation information for evaluation by ECS, the User that is seeking to qualify for an innocent landowner, a contiguous property owner, or a bona fide prospective purchaser liability defense may waive these rights to qualify under CERCLA. If the activity use information is provided following issuance of this report and information contained therein materially changes the outcome of this report, ECS will issue an addendum to this report.

##### **4.3 Specialized Knowledge**

The User indicated that they were not aware of specialized knowledge of environmental concerns.

##### **4.4 Commonly Known or Reasonably Ascertainable Information**

The User indicated that they were not aware of commonly known environmental concerns.

##### **4.5 Valuation Reduction for Environmental Issues**

No information pertaining to valuation reduction for environmental issues was provided to ECS.

##### **4.6 Owner, Property Manager, and Occupant Information**

Owner, manager, and occupant information was not provided by the User.

#### **4.7 Degree of Obviousness**

The User did not provide information related to obvious indicators that point to the presence or likely presence of contamination at the subject site.

## 5.0 RECORDS REVIEW

A regulatory records search of ASTM standard and supplemental databases was conducted for the site and is included in Appendix III. The regulatory search report in the appendix includes additional details about the regulatory databases that were reviewed. The regulatory records search involves searching a series of databases for facilities that are located within a specified distance from the subject site. The ASTM standard specifies an approximate minimum search distance from the subject site for each database. Pursuant to ASTM, the approximate minimum search distance may be reduced for each standard environmental record except for Federal NPL site list, and Federal RCRA TSD list. According to ASTM, government information obtained from nongovernmental sources may be considered current if the source updates the information at least every 90 days or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public. The following table indicates the standard environmental record sources and the approximate minimum search distances for each.

<b>Standard Environmental Record Sources</b>	<b>Approximate Minimum Search Distance Per ASTM (miles)</b>
Federal NPL	1.0
Federal Delisted NPL	0.5
Federal CERCLIS	0.5
Federal CERCLIS NFRAP	0.5
Federal RCRA CORRACTS	1.0
Federal RCRA non-CORRACTS TSD	0.5
Federal RCRA Generators	Subject Site and Adjoining Properties
Federal IC/EC	Subject Site Only
Federal ERNS	Subject Site Only
State and Tribal Hazardous Waste Sites (NPL Equivalent)	1.0
State and Tribal Hazardous Waste Sites (CERCLIS Equivalent)	0.5
State and Tribal Landfill and/or solid waste disposal sites	0.5
State and Tribal LUST	0.5
State and Tribal Registered UST	Subject Site and Adjoining Properties
State and Tribal IC/EC	Subject Site Only
State and Tribal Voluntary Cleanup (VCP) Sites	0.5
State and Tribal Brownfield Sites	0.5

Based on our knowledge of the subject site and the surrounding area, ECS attempts to verify and interpret this data. While this attempt at verification is made with due diligence, ECS cannot guarantee the accuracy of the record(s) search beyond that of information provided by the regulatory report(s). Mapped and unmapped sites identified in the regulatory report(s) that are not subsequently addressed below were field verified and are not believed to be within the approximate minimum search distance and are excluded from this ESA report. ECS makes no warranty regarding the accuracy of the database report information included within the regulatory report(s).

The regulatory record search was performed by Environmental Data Resources (EDR). The search distances were not altered from the ASTM standard search distances. The regulatory databases reviewed by ECS included supplemental databases researched by EDR.

## **5.1 Federal Databases**

### **Federal National Priorities List (NPL)**

The NPL is a subset of Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) and identifies "superfund" sites that have had documented contamination incidents.

The site was not identified on the NPL.

No off-site properties within the minimum search distance of inquiry were reported as being on the NPL.

### **Federal Delisted NPL**

The Delisted NPL identifies sites previously listed on the NPL where no further response is appropriate.

The site was not identified on the Delisted NPL.

No off-site properties within the minimum search distance of inquiry were reported as being on the Delisted NPL.

### **Federal CERCLIS**

CERCLIS contains data on potential hazardous waste sites that have been reported to the United States Environmental Protection Agency (USEPA). CERCLIS contains sites that are either proposed to or on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.

The site was not identified on the CERCLIS database.

No off-site properties within the minimum search distance of inquiry were reported as being on the CERCLIS database.

### **Federal CERCLIS No Further Remedial Action Planned (NFRAP)**

CERCLIS sites designated as NFRAP have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the

NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration.

The site was not identified on the CERCLIS NFRAP.

No off-site properties within the minimum search distance of inquiry were reported as being on the CERCLIS NFRAP.

#### **Federal Corrective Action Report (CORRACTS)**

CORRACTS identifies hazardous waste handlers that have been subject to corrective action under Resource Conservation and Recovery Act (RCRA).

The site was not identified by CORRACTS.

No off-site properties within the minimum search distance of inquiry were reported as being on CORRACTS.

#### **Federal Resource Conservation and Recovery Information System (RCRIS) – Treatment, Storage and Disposal (TSD) Facilities**

RCRIS identifies facilities that treat, store or dispose of hazardous wastes as defined by the RCRA. TSDs treat, store or dispose of hazardous waste.

The site was not identified as a hazardous waste TSD facility.

No off-site properties within the minimum search distance of inquiry were reported as being a hazardous waste TSD facility.

#### **Federal RCRIS - Generators**

RCRIS identifies facilities that generate hazardous wastes as defined by the RCRA. Conditionally exempt small quantity generators (CESQGs) generate less than 100 kilograms of hazardous waste, or less than 1 kilogram of acutely hazardous waste, per month. Small quantity generators (SQGs) generate between 100 and 1,000 kilograms of hazardous waste per month. Large quantity generators (LQGs) generate more than 1,000 kilograms of hazardous waste or more than 1 kilogram of acutely hazardous waste per month.

The site was not identified as a hazardous waste generator.

No off-site properties within the minimum search distance of inquiry were reported as being a hazardous waste generator.

#### **Federal Engineering Controls (EC) List**

The Federal EC list identifies engineering controls including various forms of caps, building foundations, liners, and treatment methods used to eliminate pathways for regulated substances to enter environmental media or affect human health.

The site was not identified on the EC list.

#### **Federal Institutional Controls (IC) List**

The Federal IC list identifies institutional controls including administrative measures,

such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants.

The site was not identified on the IC list.

### **Federal Emergency Response Notification System (ERNS)**

The ERNS list is a national database that stores and records information on reported releases of hazardous substances, including petroleum products.

The site was not identified on the ERNS list.

## **5.2 State Databases**

### **State Hazardous Waste Sites (SHWS) Inventory**

The IEPA State Hazardous Waste Sites Report is the State of Illinois equivalent to the CERCLIS database. The IEPA State Hazardous Waste Sites Report identifies known or suspected hazardous waste sites that have either been investigated, or are currently under investigation for the release or suspected release of hazardous substances.

The site was not identified on the SHWS List.

No off-site properties within the minimum search distance of inquiry were reported as being on the SHWS List.

### **Leaking Underground Storage Tank (LUST) List**

The Illinois Leaking Underground Storage Tank (LUST) list identifies sites having documented soil and/or groundwater contamination.

The site was not identified on the LUST list.

No off-site properties within the minimum search distance of inquiry were reported as being on the LUST list.

### **Registered Underground Storage Tanks (UST) List.**

The registered UST list underground storage tanks registered with the Illinois Division of State Fire Marshal, Underground Storage Tank System.

The site was not identified on the UST list.

One or more off-site properties within the minimum search distance of inquiry were reported as being on the UST list.

As summarized in the regulatory search, **Big Hollow School Dist # 38**, located at 34699 N HWY 12 (approximately 600 feet southeast of the subject site, across Big Hollow Road) was identified on the UST database. After review of the information, it is ECS' opinion that based upon the distance (approximately 600 feet across a roadway), likely gradient (cross), and its current regulatory status (removed), the listing is not considered a recognized environmental condition to the subject site. Further, a principal responsible party has been identified, which may help mitigate the liability that may be associated with this property.

### **Site Remediation Program Sites**

The Illinois Environmental Protection Agency SRP database identifies the status of all voluntary remediation projects administered through the pre-notice site cleanup program (1989-1995) and the site remediation program (1996 to present).

The site was not identified on the Site Remediation Program Sites List.

No off-site properties within the minimum search distance of inquiry were reported as being on the SRP list.

### **Solid Waste Facilities/Landfill List**

The Illinois Environmental Protection Agency, Bureau of Land maintains a list of permitted solid waste facilities.

The site was not identified on the Illinois Solid Waste list.

No off-site properties within the minimum search distance of inquiry were reported as being on the Illinois Solid Waste list.

## **5.3 Historical Use Information**

### **Sanborn Fire Insurance Map Review**

In an effort to identify past uses, ECS utilized Environmental Data Resources Inc. (EDR) to search for historic Sanborn™ Fire Insurance Maps (Sanborn) for the site and surrounding area. Sanborn maps were reportedly not available for this commercial area. A copy of the "Unmapped Property" report from EDR is included in the Appendix IV. The absence of such maps generally indicates that the site is located in an area where Sanborn maps were not produced because the area was rural or it was not economically feasible. ECS does not consider the lack of Sanborn maps to be a data gap given the amount of historical information obtained from our research, the USGS topographic map, aerial photographs, city directories and other historical records obtained.

### **Aerial Photograph Review**

ECS reviewed aerial photographs of the site and immediately surrounding properties for evidence of former usage which may indicate potential environmental issues. The aerial photographs were obtained from the NETR Online. The aerial photographs reviewed were dated 1939, 1946, 1953, 1961, 1988, 2002, 2005, and 2007. Aerial photographs dated prior to 1939 were not available for review. The ECS review is dependent on the quality and scale of the photographs.

#### **1939 Aerial Photograph**

The subject site and adjacent properties appears to be vacant land utilized for agricultural purposes, except for the far south adjacent property appears to be developed with a roadway.

#### **1946, 1953, 1961, 1974, and 1980 Aerial Photographs**

The subject site and northern, eastern, and western adjacent properties appear to be a sand/gravel pit (mine). A roadway is noted to the south.

#### 1993, 1997, and 2000 Aerial Photographs

The subject site and northern, eastern, and western adjacent properties appear to have been filled in and are now vacant land. A roadway is noted to the south.

#### 2002, 2005, and 2007 Aerial Photographs

The subject site appears to be developed with a gas station and convenience store. The north adjacent property appears to be developed with a paved parking lot, followed by vacant land. The east adjacent property appears to be developed a drive isle and vacant land, followed by a roadway. The south adjacent property appears to be developed with two roadways. The west adjacent property appears to be developed with a paved parking lot, followed by a strip mall. By 2005 the west adjacent property was developed with a commercial structure.

### **City Directory Review**

One of the ASTM standard historic sources to be reviewed for previous site use are local street directories, commonly known as City Directories. The purpose of the directory review is to identify past occupants of the site, adjoining properties, or nearby properties. In some rural areas, street directories information is limited.

ECS reviewed Cole Criss-Cross, Cole Information Services, Haines Criss-Cross Directories obtained from EDR. The directories reviewed were dated 1977, 1980, 1985, 1990, 1992, 1995, 1999, 2003, 2008, and 2013. Directories dated prior to 1977 were not available for review. As noted in the directories, the subject site was not identified in any of the searched directories.

### **Other Standard Historical Sources**

In accordance with the ASTM Standard, other historical sources should be reviewed, if necessary and if the information is likely to be useful, to obtain historical site use information. Other Standard Historical Sources may include property tax files, recorded land title records, historic USGS topographic maps, building department records, and zoning or land use records.

In addition to the historical documents reviewed and previously included in this report, ECS also reviewed historical topographic maps. The USGS historical topographic maps were obtained from NETR Online and were dated 1920, 1923, 1932, 1958, 1962, 1965, 1973, 1979, 1981, 1993, and 2003.

#### 1920, 1923, 1932, 1958, 1962, and 1965 Topographic Maps

Structures are not depicted on the subject site or adjacent sites and by 1958 the subject site and adjacent properties are denoted as a gravel pit. The far south adjacent property is depicted with a roadway. By 1962 a proposed road is noted to the west of the subject site.

#### 1973, 1979, and 1981 Topographic Maps

A structure is depicted on the subject site and on the north adjacent property. The remainder of the adjacent properties are consistent with the previous topographic maps.

### 1993 and 2003 Topographic Maps

Structures are not depicted on the subject site or adjacent properties. Additionally, the subject site and adjacent properties are no longer denoted as a gravel pit.

### **Other Local Historical Sources**

Other credible historical sources may be reviewed to identify past uses of the site. These sources may include internet sites, county or State road maps, historical society documents, or local library information.

ECS reviewed the Lake County GIS website to obtain information regarding the site. According to the Lake County GIS website, the subject site is identified as Parcel Index Number (PIN) 05-22-102-006.

### **Freedom of Information (FOIA) Requests**

The Illinois Environmental Protection Agency (IEPA) and the Illinois Office of the State Fire Marshal (OSFM) were contacted to determine if they had any historical information regarding environmental issues or responses at the site. According to the IEPA, the subject site does not appear in any of their online databases.

**Dominick's # 1958**, 1296 South Route 12, (**subject site**) was identified on the OSFM searchable database. According to the OSFM database, the subject site previously maintained three underground storage tanks (USTs) - two 10,000-gallon and one 20,000-gallon gasoline. The USTs, which were installed in February of 2002, were composite double walled tanks with automatic leak detection, overfill protection, and spill containment devices installed. In August of 2014 the USTs were removed without incident. As further discussed in Section 7.2 of this report, soil samples collected upon removal of the USTs did not identify any exceedances of applicable regulatory levels. Given the fact that the USTs have been removed from the subject site and confirmatory samples did not identify soil impacts, the former on-site USTs are not considered to be a recognized environmental condition.

### **Historical Summary**

According to historical records research and other sources, the subject site was utilized for agricultural purposes from at least 1920 until at least 1939. From 1946 until at least 1980, the subject site was a sand/gravel pit (mine). From approximately 1993 until 2000 the subject site was undeveloped. From 2002 until at least 2007, the subject site was developed with a gas station. No obvious indications of recognized environmental conditions were identified in the historical data review.

Please note that **Dominick's # 1958**, 1296 South Route 12, (**subject site**) was identified on the OSFM searchable database. According to the OSFM database, the subject site previously maintained three underground storage tanks (USTs) - two 10,000-gallon and one 20,000-gallon gasoline. The USTs, which were installed in February of 2002, were composite double walled tanks with automatic leak detection, overfill protection, and spill containment devices installed. In August of 2014 the USTs were removed without incident. As further discussed in Section 7.2 of this report, soil samples collected upon removal of the USTs did not identify any exceedances of applicable regulatory levels. Given the fact that the USTs have been removed from the subject site and confirmatory samples did not identify soil impacts, the former on-site USTs are not considered to be a recognized environmental condition.

Data failures (historical data gaps) were identified during the historical research of this site. Use of the site was generally documented back to 1920. Historical information was missing for various periods. However, due to the apparent historical use of the subject site; the historical data gaps are not expected to impact our ability to render a professional opinion regarding the subject site. No other data gaps were identified.

## **6.0 SITE AND AREA RECONNAISSANCE**

### **6.1 Methodology and Limiting Conditions**

Alissa Braun of ECS conducted the field reconnaissance on October 3, 2014. The weather at the time of the reconnaissance was cool and cloudy. Observations were made from a walking reconnaissance around the perimeter and along several transects across the subject site. Site photographs are included in Appendix V. Limiting conditions were not identified.

### **6.2 On-Site Features**

The subject site is currently vacant land consisting of a paved lot with several patches of gravel. The subject site consists of approximately 25,264 square feet and is located in an area that can generally be described as of commercial.

#### **Underground or aboveground storage tanks**

We did not observe aboveground storage tanks or evidence of underground storage tanks at the site.

#### **Strong, pungent or noxious odors**

We did not notice strong, pungent or noxious odors at the site.

#### **Surface waters**

We did not observe streams or other surface waters located on the site.

#### **Standing pools of liquid likely containing petroleum or hazardous substances**

We did not observe standing pools of liquid at the site.

#### **Drums or containers of petroleum or hazardous substances greater than five-gallons**

We did not observe drums or containers of petroleum or hazardous substances greater than five-gallons at the site.

#### **Drums or containers of petroleum or hazardous substances less than or equal to five-gallons**

We did not observe drums or containers of petroleum or hazardous substances less than or equal to five-gallons at the site.

#### **Unidentified opened or damaged containers of hazardous substances or petroleum products**

We did not observe unidentified opened or damaged containers of hazardous substances or petroleum products at the site.

#### **Known or suspect PCB-containing equipment (excluding light ballasts)**

The following observations were made:

A pad-mounted transformer was observed along the southern border of the subject site. The transformer is owned and maintained by the local power supply company. Staining, which could be indicative of leakage, was not observed. In addition "Non-PCB" stickers were also observed on the transformer.

**Stains or corrosion to floors, walls or ceilings**

Not applicable to this site.

**Floor drains and sump pumps**

Not applicable to this site.

**Pits, ponds or lagoons**

We did not observe pits, ponds or lagoons at the site.

**Stained soil or pavement**

We did not observe stained soils or pavement at the site.

**Stressed vegetation**

We did not observe stressed vegetation at the site.

**Solid waste mounds or non-natural fill materials**

We did not observe solid waste mounds or non-natural fill materials at the site.

**Wastewater discharges into drains, ditches or streams**

We did not observe wastewater discharges at the site.

**Groundwater wells including potable, monitoring, dry, irrigation, injection and/or abandoned**

We did not observe groundwater wells at the site.

**Septic systems or cesspools**

We did not observe evidence of septic systems or cesspools on the site.

**Elevators**

Not applicable to this site.

**Dry Cleaning**

We did not observe dry-cleaning operations on the site.

**On-site Emergency Electrical Generators**

We did not observe emergency generators on the site.

**Specialized industrial equipment (paint booths, bag houses, etc.,) on-site**

We did not observe specialized industrial equipment at the site.

**Hydraulic lifts**

We did not observe hydraulic lifts at the site.

**Oil-water separators**

We did not observe oil-water separators at the site.

**Compressors on-site**

We did not observe compressors at the site.

**Grease traps**

We did not observe grease traps at the site.

**6.3 Adjoining and Nearby Properties**

Contiguous and nearby properties were observed during a walking and vehicular reconnaissance of the site boundary and public places. The site is located in a commercial area located in Lake County, Fox Lake, Illinois.

The site is bounded on the north by a paved parking lot, followed by vacant land.

The site is bounded on the east by Bank of America, followed by Route 12.

The site is bounded on the south by two roadways, Frontage Road and Big Hollow Road.

The site is bounded on the west by a paved parking lot, followed by a strip mall.

**6.4 Summary of On-Site and Off-Site RECs**

At the time of our site reconnaissance the subject site was undeveloped and vacant. Details pertaining to our on-site and off-site observations are referenced previously. We did not identify on-site or off-site recognized environmental conditions associated with the site during the reconnaissance.

## **7.0 ADDITIONAL SERVICES**

### **7.1 Non-Scope Issues**

ASTM guidelines identify non-scope issues, which are beyond the scope of this practice. Non-scope issues have the potential to be business environmental risks. Some of these non-scope issues include; asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands and mold.

We were not authorized to conduct non-scope services for the site.

### **7.2 Previous Reports Review**

We have conducted the following environmental and/or engineering assessment(s) for the site:

**Environmental Document Review, Dominick's Gas Station - 1296 South Route 12, Fox Lake, IL, dated July 31, 2014.**

ECS reviewed historical environmental documents concerning the subject site. The provided documents included a 2000 Phase I ESA, a 2000 Phase II ESA, a 2001 Environmental Baseline Study report, a 2001 Preliminary Findings Report, Test Pit Analytical Results dated 2002, Tank Tightness Report dated 2013, a Phase II ESA dated 2014, and a review of documents provided through a Freedom of Information Act Request. Based on our review of the provided documents, ECS offered the following comments:

- ECS recommends that confirmatory soil and/or groundwater samples, for gasoline indicator compounds, are collected during future tank removal activities.
- Given the fact that several PNAs have been identified at concentrations found to exceed applicable remedial objectives and it is unclear what soils have been removed as part of construction of the gasoline station, ECS recommends that additional soil and groundwater samples are collected throughout the subject site prior to future redevelopment.
- As historical arsenic soil concentrations were found to be below the current Tier 1 SROs, ECS does not recommend any additional sampling for arsenic at this time.

We were provided with the following environmental and/or engineering assessment report(s) completed by others:

**No Release Tank Removal Letter, prepared by Kennedy/Jenks, and dated August 29, 2014.**

The 2014 letter documented the removal of the on-site USTs and provided the certificate of removal, site assessment form, and the notification form. The letter concluded that, "Based upon the OSFM SSTS' no release determination and the results of the confirmatory sampling, Kennedy/Jenks certifies that there has been no release from the UST system." A copy of the 2014 letter is provided in Appendix II.

## **8.0 INTERVIEWS**

During the site reconnaissance, ECS personnel interviewed Mr. Isaac Salvador. Mr. Salvador indicated that he is not aware of 1) environmental concerns associated with the site 2) any pending, past, or threatened administrative litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site or 3) any government notices regarding any possible violation of environmental laws or possible liability related to hazardous substances or petroleum products

## **9.0 FINDINGS AND OPINIONS**

The assessed area referred to as "site" or "subject site" is located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. According to the Lake County Assessors Office, the subject site consists of an approximate 25,264 square foot parcel of land which is identified as Property Index Number (PIN) 05-22-102-006. The subject site consists of a vacant paved lot with spots of gravel. The site is located in an area that can generally be described as commercial.

The site is bounded on the north by paved parking lot, followed by vacant land and is bounded on the east by Bank of America, followed by Route 12. The site is bounded on the south by two roadways, Frontage Road and Big Hollow Road and is bounded on the west by a paved parking lot, followed by a strip mall.

A regulatory database search report was provided by EDR. The database search involves researching a series of Federal, State, Local, and other databases for facilities and properties that are located within a specified minimum search distances from the site. The subject site was not identified within any of the searched governmental databases; however, the Illinois Office of the State Fire Marshal (OSFM) did provide information concerning the subject site.

**Dominick's # 1958**, 1296 South Route 12, (**subject site**) was identified on the OSFM searchable database. According to the OSFM database, the subject site previously maintained three underground storage tanks (USTs) - two 10,000-gallon and one 20,000-gallon gasoline. The USTs, which were installed in February of 2002, were composite double walled tanks with automatic leak detection, overfill protection, and spill containment devices installed. In August of 2014 the USTs were removed without incident. As further discussed in Section 7.2 of this report, soil samples collected upon removal of the USTs did not identify any exceedances of applicable regulatory levels. Given the fact that the USTs have been removed from the subject site and confirmatory samples did not identify soil impacts, the former on-site USTs are not considered to be a recognized environmental condition.

There were several additional facilities identified by the regulatory database search. Based on their distances, groundwater flow direction inferred from surface topography or regulatory status, these reported facilities do not represent RECs for the site.

ASTM Standard E 1527-13 defines a "data gap" as: "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information". Significant data gaps were not identified.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13 of the former Fox Lake Dominick's Gas Station located at 1296 South Route 12 in Lake County, Fox Lake, Illinois. Exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

Dear OSFM Representative:

On August 6 and 7, 2014 RW Collins completed tank removal activities at the above referenced facility under Permit #00555-2014REM. Kennedy/Jenks Consultants conducted the site assessment upon completion of the tank removal activities. Enclosed please find the "Certification of Removal", "Site Assessment Report Form" and the "Notification Form for Underground Storage Tanks". Based upon the OSFM SSTS no release determination and the results of the confirmatory sampling Kennedy/Jenks Consultants certifies that there has been no release from the UST system.

If you have any questions regarding the content of this letter, please do not hesitate to call.

Very truly yours,

### SITE ASSESSMENT REPORT FORM

Within 45 days after receipt of lab results from a site assessment, a facility must complete this form to indicate whether or not a release has occurred. If a facility wishes to certify that there has been no release, then this form must be completed by a licensed professional engineer or licensed environmental geologist who is experienced in performing site assessments instead of the owner or operator (176.330(c)).

**NOTE: Upon the first confirmation of a release, the owner or operator shall immediately notify IEMA and obtain an incident number. All further work regarding the release is then conducted under the oversight of Illinois EPA (176.330(d)).**

**Notification Form for Underground Storage Tanks**

OSWE60

## General Information

Notification is required by state law for all underground storage tanks (USTs) that have been in use any time since January 1, 1974 and were in ground as of September 24, 1987 (other than heating oil tanks). Federal law required notification by May, 8 1986.

The primary purpose of this notification program is to locate and evaluate USTs that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief or recollection.

**Who must notify?** Owners of USTs are responsible for notification. Owner means: In the case of a UST system in use on November 8, 1984, or bought into use after that date, any person who owns a UST system for storage, use of dispensing of regulated substance; and

- (b) In the case of any UST system in use before November 8, 1984, but no longer in use on that date, any person who owned such UST immediately before the discontinuation of its use.

**What tanks are included?** a UST must contain or have contained a regulated substance, regulated substances include petroleum or hazardous substances.

**Are Heating Oil Tanks included?** Although Federal Law excludes these tanks used for consumptive use on the premises where stored, the state includes them, if: They are 1100 gallons or greater and were in the ground as of July 11, 1990; or they are less than 110 gallons or 1100 gallons and were in the ground as of September 6, 1991. Heating oil USTs located on one and two family residences and farms are excluded.

**When to notify?** Owners of USTs other than heating oil that have been in use at any time since January 1, 1974 and were in the ground as of September 24, 1987, should be registered immediately, including USTs already removed. In the case of heating oil USTs, see the dates above. Any owner of newly installed UST is required to register within 30 days after product is placed in tank. Any new owner of a UST who was previously registered, is required to file an amended notification form within 30 days after acquiring ownership. There must be an amended notification on a previously filed form within 30 days of such change.

**Where to notify?** Completed notification forms should be sent to: Office of the State Fire Marshal, Division of Petroleum and Chemical Safety, 1035 Stevenson Dr., Springfield, IL 62703-4259.

**Penalties:** The Office of the State Fire Marshal is requesting this information pursuant to the Gasoline Storage Act, 430 ILCS 15/4. This information is REQUIRED. Failure to provide the information can result in a fine up to \$10,000 per day and a loss of registration. Additionally, under Federal Law, any owner who knowingly fails to notify or submits false information may be subject to a federal civil penalty not to exceed \$10,000, plus any applicable state fines, for each tank which notification is not given or of which false information is submitted.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the UST list, as provided by EDR, and dated 07/28/2014 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Federal NPL site list*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Federal CERCLIS list***

### **CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System**

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site List***

### **CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned**

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release; an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

## HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted.

Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

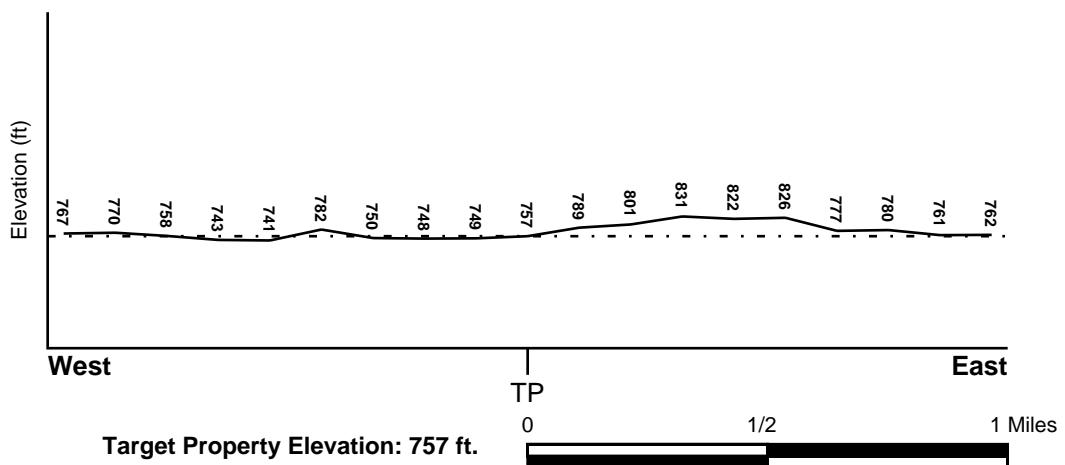

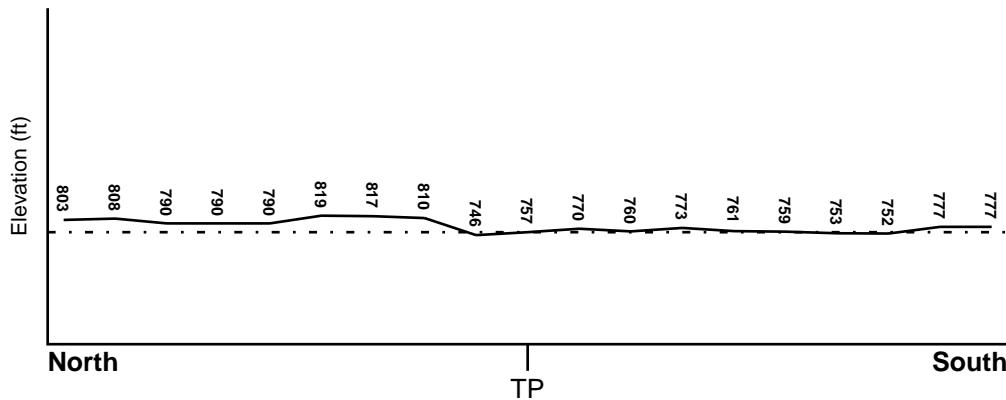

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### Soil Map ID: 6

Soil Component Name: Casco

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## **EXECUTIVE SUMMARY**

### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.
