Cut 15' when you go & the groundhogs will keep their heads down when -U- pass over.

There is no security - there is plenty of opportunity - collect them up w/'94 Ford w/a Cummins.

NH 357 - it works - ground a load of feed this week.

Why take a wheel barrow when -U- can have a Mack w/20' x 6'6" sides?

Just put the GPS in your device, this '92 Chevrolet should take -U- there w/a gooseneck in tow.

If -U- are one wave short of a shipwreck, lower the pond w/a Houle spreader mounted on a full fledged Mac.

Got some narrow gates on the farm – this Kuhn disc cutter will wiggle right thru (ask Shane about this nice 2-pt. hitch).

Just past the Houle spreader by a crop & it may turn green overnight.

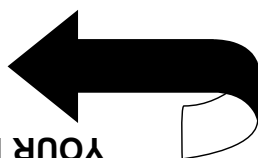

There is a bonus for planting no-till – more ways than one.

Going off road these chassis trailers can stand the test of time.

-U- may have tried the rest – If -U- run a 1560 -U- will know.
