15. Legal requirements exist relating to various aspects of location and status of wells. 99. **DEWATERING WELL:** A dewatering well is a well used to lower groundwater levels to allow for construction
 100. or use of underground spaces.

101. **INDUSTRIAL/COMMERCIAL WELL:** An industrial/commercial well is a nonpotable well used to extract
 102. groundwater for any nonpotable use, including groundwater thermal exchange wells (heat pumps and heat
 103. loops).

104. **WELL USE STATUS:** Indicate the use status of each well. CHECK ONLY ONE (1) BOX PER WELL.

105. **IN USE:** A well is “in use” if the well is operated on a daily, regular, or seasonal basis. A well in use includes
 106. a well that operates for the purpose of irrigation, fire protection, or emergency pumping.

107. **NOT IN USE:** A well is “not in use” if the well does not meet the definition of “in use” above and has not been
 108. sealed by a licensed well contractor.

109. **SEALED:** A well is “sealed” if a licensed contractor has completely filled a well by pumping grout material
 110. throughout the entire bore hole after removal of any obstructions from the well. A well is “capped” if it has
 111. a metal or plastic cap or cover which is threaded, bolted or welded into the top of the well to prevent entry
 112. into the well. A “capped” well is not a “sealed” well.

113. If the well has been sealed by someone other than a licensed well contractor or a licensed well sealing
 114. contractor, check the well status as “not in use.”
