River Walk Rules and Regulations

The following rules and regulations have been provided to help define the requirements and restrictions necessary to be in compliance with the River Walk Restrictive Covenants and the River Walk Recreation Association corporate by-laws. The rules and regulations listed are not all inclusive, may be modified by the Board of Directors, and are in no way intended to change or supersede the requirements defined in the Covenants or By-Laws.

General

1. Trash and yard waste containers are to be placed at the curb no earlier than 7:00 PM the night before the scheduled pickup and are to be removed as soon as possible thereafter.
2. It is the policy of the River Walk Recreation Association to allow only adult resident volunteers or their children as volunteers if supervised by a parent to perform work on Association projects. Payment for these services is not permitted. All other work must be done by insured contractors.
3. In recognition of constitutional and practical considerations, signs may be placed in Members' individual yards under such guidelines as the Board may approve. Approved signs may include, but not be limited to, those associated with neighborhood sponsored activities (for example, River Walk Swim Team), and those related to listing the Member's home for sale or rent. Also, the Board may approve use of signs on Association-owned property as the Board deems necessary or desirable.
4. In accordance with applicable Restrictive Covenants for the neighborhood, for example, Article I (4), each Member shall keep his/her lot, house and any improvements and landscaping thereon in good condition and repair, including but not limited to (a) repairing and painting, or other appropriate external care, of all buildings and structural improvements; (b) seeding, watering and mowing of all lawns; and (c) keeping the yard free of waste and debris, and (d) appropriate pruning and trimming of all trees, hedges and shrubbery, including trimming necessary to prevent the view of street traffic from being obstructed and to prevent dead wood from falling and damaging persons or property. In the event a Member fails to do this, the Architectural Committee, with permission from the Board of Directors, may take such action as it deems reasonable and necessary to remedy the situation, including but not limited to levying fines and liens if the situation is not remedied within reasonable time following notice to the offending Member.
5. Document Retention Policy (See Appendix A)
6. All contractors providing services for the River Walk Recreation Association and working on River Walk property must provide evidence that they maintain current general liability and workers' compensation insurance, as appropriate. Area chairs will need to request updated certificates to this effect for River Walk files each year.

 - i. Outbuilding must be located in the rear yard of the residence.
 - ii. Outbuilding shall be placed to minimize visibility from public streets and neighbors. Shrubs, trees and fences (that otherwise meet all architectural rules) are permitted to accomplish minimizing such visibility.

Once approval has been obtained work related to the project must be started within 90 days and all project work completed within a reasonable time frame considering the scope of the project. Compliance

The function of the Compliance Committee is to manage compliance with River Walk rules, regulations, and covenants. The Committee assists the other committees of River Walk in that effort, particularly the Architectural Committee and the Grounds Committee. The overall objective is to maintain property values while keeping River Walk one of the premier neighborhoods in the area. The Compliance Committee is managed under the direction of the River Walk Vice President.

The Committee is not designed to seek out violations, but to properly respond to complaint submissions as they are received. A minimum of two complaint submissions are needed before action is taken by the Committee. Under normal circumstances, complaints are handled by first contacting the homeowner in person, by phone, email, or letter. Most situations can, and are, remedied by an explanation of the violation and the resident proceeding with a mutually agreed upon remedy. To help expedite compliance, a time-frame is established allowing a reasonable amount of time to complete. Should extenuating circumstances interfere with completion dates, the homeowner is strongly urged to stay in contact the Compliance Committee to provide assurances that compliance will be achieved. Please note that compliance with the mailbox requirements from the covenants is handled by the Architectural Committee, and special rules may apply.

In the event a mutual solution cannot be achieved, the Committee may be required to follow a more aggressive approach. This would normally be a series of escalating sanctions against the homeowner as set forth below. At any time during this process, the homeowner may request a hearing with the Compliance Committee.

1. If the homeowner does not appropriately respond to the initial notification, the next step would usually be a letter sent to the homeowner indicating that a reasonable fine may be imposed if remedial action is not completed within the time frame set forth in the letter. The amount of the fine will require a majority vote of the RWRA Board.
2. If remedial action is not completed within the time allowed in (1), a second letter would then normally be sent indicating the fine to be paid within a specified time frame (usually 15 days) and that use of all River Walk amenities has been suspended. If remedial action is completed prior to the due date, the fine will be dropped and access to amenities restored.
3. If the fine is not paid and remedial action not taken by that due date, a third letter would be sent to the property owner indicating that the Committee will recommend to the RWRA Board that a lien in an amount of the fine be placed on the property. If remedial action is taken prior to implementation of the lien, the lien will be rescinded, and amenities restored.
4. Lastly, following Board approval, and if compliance is still not achieved, a lien will be placed on the property. Subsequently, should compliance be achieved, the lien will be rescinded, and amenities restored. Please note that the homeowner will be responsible for all costs associated with the placement and removal of the lien.
