To Whom It May Concern:

On 4-23-26, a site visit was made to Dry Creek Road (Tax Map 25 parcel 192.00) Lois Anderson property in Davidson County to evaluate possible disturbance to the soils mapped on 6-19-23.

There doesn't appear to be significant disturbance to the area that would impact installation of the septic system. Compaction is none to slight in the upper 2-4" within affected areas.

I recommend chisel plowing and/or disking to an acceptable grade in an attempt to reclaim minor ruts and scraping caused by land clearing equipment.

This data was collected using a soil auger and rock probe.

If you have questions concerning this matter, please advise.

Sincerely,

Jay Andrews
