Dear Melissa Sweeney:

On July 17, 1989, an investigation of the subsurface sewage disposal system, which does not include plumbing and other fixtures preceding the septic tank, was performed at the residence of Rick Sweeney, Canterbury Chase S/O Lot 2, 1903 Thompson Rd. Murfreesboro, TN (City) Rutherford (County)

At the time of the investigation, the following observation(s) were made: (City) (County)

- X There was no evidence of sewage or effluent outcropping to the ground surface.
Sewage or effluent from the sewage system was outcropping to the ground surface.
The house appears vacant; therefore, the performance of the sewage system, when typically loaded, cannot be realistically evaluated.

A thorough search of our files indicates the following:

- X The sewage system was inspected and approved by a representative of this Department. The system was designed on an estimated absorption rate of 45 minutes per inch or a percolation rate of minutes per inch.
The sewage system was inspected and disapproved by a representative of this Department.
No record of the site evaluation could be found.
No record of the sewage system construction or approval could be found.
The site was evaluated on and determined unfavorable for subsurface sewage disposal.
A repair was attempted to the subsurface sewage disposal system on. These modifications do do not meet the minimum standards of this Department.
