Pioneer Farms Inc. Mr. Keith A. O'Daniel 9040 Roswell Road, Suite 500 Sandy Springs, GA 30350

RE: TIMBER INVENTORY REPORT PIONEER FARMS INC. LOCATED IN JASPER COUNTY, GEORGIA

Mr. O'Daniel,

Enclosed are the results of the timber cruise that was requested for the +/- 559 timbered acres on the Pioneer Farms Inc. tract located in Jasper County, Georgia. The tract was cruised for estimated timber volume and value. The merchantable timber was inventoried using fixed area tenth acre plots. On each sample plot merchantable trees were measured for diameter at breast height, classified by species (pine or hardwood) and product class. One sample plot was installed for every two acres of merchantable timber. Winyield growth and yield software was used to project the growth of the pre-merchantable planted pine stands and discount future harvest revenues into an estimate of net present value using a 7% discount rate. The cruise was conducted during the month of August 2022.

Tract 1 has a total estimated current merchantable value of \$121,088 or \$1,275/ acre.

Tract 2 has a total estimated current merchantable value of \$447,551 or \$2,356/ acre. The +/-20 acres of pre-merchantable 2020 planted loblolly pine has a net present value of \$10,200 or \$510/timbered acre.

Tract 3 has a total estimated current merchantable value of \$3,411 or \$682/ acre. The +/- 42 acres of pre-merchantable 2010 planted longleaf pine has a net present value of \$35,280 or \$840/timbered acre.

Tract 4 has no merchantable timber value.

Tract 5 has a total estimated current merchantable value of \$32,091 or \$1,070/ acre. The +/- 65 acres of pre-merchantable 2020 planted loblolly pine has a net present value of \$35,750 or \$550/timbered acre.

Tract 6 has a total estimated current merchantable value of \$52,615 or \$2,288/ acre. The +/- 37 acres of pre-merchantable 2020 planted loblolly pine has a net present value of \$21,090 or \$570/timbered acre.

Tract 7 has no merchantable timber value. The +/- 35 acres of pre-merchantable 2020 planted loblolly pine has a net present value of \$18,375 or \$525/timbered acre.

All acreages were estimated from aerial photography incorporated into a GIS mapping computer program.

Timber stumpage values coming from comparable sales in the area and published prices from Timber Mart-South were used in the valuation.

Total volume and value summaries for each timber stand are provided.

If you have any questions, please contact our office at your convenience.

Sincerely,

Wes Shiver

Georgia Registered Forester #2809

gw. Shing

General Assumptions and Limiting Conditions

- 1. The timber appraiser assumes no responsibility for matters of a legal nature affecting the timber appraised or the title thereto, nor does the timber appraiser render any opinion as to the title, which is assumed to be good and marketable. The timber is appraised as though under responsible ownership.
- Sketches in the report may show approximate dimensions and are included to assist the reader in visualizing the property. The timber appraiser has not made a survey of the property.
- 3. The timber appraiser is not required to give testimony or appear in court because of having made the appraisal with reference to the property in question.
- 4. Any distribution of the timber valuation in the report applies only under the existing program of utilization. The valuation of the timber as a pure asset should not be necessarily considered as the contributory value of the timber toward the value of the property in its entirety.
- 5. Information, estimates and opinions furnished to the timber appraiser, and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, the timber appraiser can assume no responsibility for the accuracy of such items furnished to the timber appraiser.
- 6. This report was prepared for the Client's use and the Client's sole discretion within the framework of the function stated in the report and its use for any other purpose is beyond the scope contemplated in the appraisal.
- 7. Where the timber appraisal conclusions are subject to satisfactory completion, repairs, or alterations, the appraisal report and value conclusion are contingent upon completion of the improvements in a workmanlike manner consistent with the plans, specification and/or scope contemplated in the appraisal.
- 8. Neither all nor any part of the contents of this report, especially any conclusions as to value, the identity of the appraiser or the firm with which he is connected, shall be disseminated to the public through advertising, public relations, news, sales, or other media without the prior written consent and approval of the author.
- 9. Acceptance of the report by the Clients constitutes acceptance of all assumptions and limiting conditions contained in the report.

Extraordinary Assumptions

The estimates of timber volume for the subject area were determined from a timber inventory conducted by Timberland Services of Southwest GA LLC. A timber inventory is a small statistical sample of the area and is used to estimate the total volume of timber for the area. Timber volumes can vary by the timber product specifications used for an inventory. The timber product specifications used for this inventory are considered average for the area but can change or vary depending on utilization and particular specifications of different wood using mills. Timber volumes can also vary based on the utilization or grading skills of timber products by the harvesting (logging) operation. The estimate of timber volume for the subject should not be relied upon for the purpose other than for what it was designed for. Should the Clients or any third party use the timber volume estimates for any other proposes, they do so at their own risk,

| and Timberland Services of Southwest GA assumes no responsibility for any injury to the client or any third party resulting from such use. |
